Re: Sack Cement Market
Southern California
Plastic Cement

On July 27th you sent a copy of my original memo of December 20th concerning the subject with a handwritten note, "How are you doing on this?"

To bring you up-to-date, the Karr Corn Cob Flour which Burt Lenell put forth as an additive to take the place of asbestos fiber is finally arriving upon the scene. Burt is going to forward this sample to Jim Post at Permanente for evaluation. Burt has also heard of a couple of other possibilities which he will follow through on and keep us advised.
