Summaries

AIR

Arizona SIP/San Manuel Area SO2 NAAQS Maintenance Plan AIR

Proposed rule of the EPA would approve a revision to the Arizona SIP concerning the second 10-year maintenance plan for the San Manuel area in Arizona for the 1971 sulfur dioxide (SO₂) NAAQS. The plan demonstrates the area's continued maintenance of the NAAQS, in part, by showing that future emissions of SO₂ will not exceed the level of the attainment inventory. The plan includes emissions inventories representing current emissions for 2014 for area sources, projected emissions for two interim years during the second maintenance period, and projected emissions for the tenth year of the second maintenance period. Comments are due Nov. 6, 2017. Contact: Ashley Graham; EPA Region 9, Air Planning Office; 415-972-3877; graham.ashleyr@epa.gov. Citations: 40 CFR 52

Regulatory Update

AIR

Illinois SIP/Lemont and Pekin SO2 NAAQS Nonattainment Areas AIR

Proposed rule of the EPA would approve revisions to the Illinois SIP regarding the nonattainment plans for the 2010 one-hour sulfur dioxide NAAQS for the Lemont and Pekin nonattainment areas. The revisions include the attainment demonstration and address requirements for emissions inventories, reasonably available control measures and reasonably available control technology, reasonable further progress toward attainment, and contingency measures. The revisions also address limits to the sulfur content of distillate and residual fuel oil combusted at stationary sources. Comments are due Nov. 6, 2017. Contact: John Summerhays; EPA Region 5, Air Programs Branch; 312-886-6067, summerhays.john@epa.gov. Citations: 40 CFR 52

Regulatory Update

AIR

Nebraska SIP/Operating Permits Program

AIR

Direct final rule of the EPA approves portions of revisions to the Nebraska SIP, the operating permits program, and the Section 112(l) program. The revisions incorporate by reference the list of organic compounds that are exempt from the definition of volatile organic compound and updates notification requirements for the operating permits program. The revisions also extend the process of off-permit changes to Class I operating permits. The agency takes no action on proposed revisions of the definition of "solid waste" because they do not conform with federal standards. The rule is effective Dec. 4, 2017, unless adverse comments are received by Nov. 6, 2017. Contact: Greg Crable; EPA Region 7, Air Planning and Development Branch; 913-551-7391; crable.gregory@epa.gov. Citations: 40 CFR 52.1420; 70, Appendix A

AIR

Nebraska SIP/Operating Permits Program

AIR

Proposed rule of the EPA would approve portions of revisions to the Nebraska SIP, the operating permits program, and the Section 112(l) program. The revisions incorporate by reference the list of organic compounds that are exempt from the definition of volatile organic compound and update notification requirements for the operating permits program. The revisions also extend the process of off-permit changes to Class I operating permits. The agency is not proposing to take action on revisions of the definition of "solid waste" because they do not conform with federal standards. A concurrent direct final rule adopts the revisions, effective Dec. 4, 2017. Comments are due Nov. 6, 2017. Contact: Greg Crable; EPA Region 7, Air Planning and Development Branch; 913-551-7391; crable.gregory@epa.gov. Citations: 40 CFR 52.1420; 70, Appendix A

AIR

Nebraska SIP/Regional Haze, Visibility Protection

AIR

Direct final rule of the EPA approves revisions to the Nebraska SIP regarding regional haze. The revisions add visibility protection provisions that allow the state to implement federal standards relating to regional haze and best available retrofit technology. The rule is effective Dec. 4, 2017, unless adverse comments are received by Nov. 6, 2017. Contact: Greg Crable; EPA Region 7, Air Planning and Development Branch; 913-551-7391; crable.gregory@epa.gov. Citations: 40 CFR 52.1420

Regulatory Update

AIR

Texas SIP/Dallas-Fort Worth

AIR

Proposed rule of the EPA would approve revisions to the Texas SIP concerning reasonably available control technology (RACT) requirements under the 2008 eight-hour ozone NAAQS for the Dallas-Fort Worth moderate nonattainment area. The revisions address volatile organic compounds emission limits and control requirements at major sources in newly designated Wise County. The revisions also concern testing, monitoring, and recordkeeping requirements; exemptions; compliance schedules; and definitions. In addition, the rule would approve negative declarations for certain source categories subject to RACT in the nonattainment area. Comments are due Nov. 6, 2017. Contact: Robert Todd; EPA Region 6; 214-665-2156; todd.robert@epa.gov. Citations: 40 CFR 52

Regulatory Update

AIR

Utah SIP/Davis and Salt Lake Counties Major Source Ozone Offset Requirements

AIR

Final rule of the EPA approves revisions to the Utah SIP concerning ozone offset requirements for major sources in Davis and Salt Lake counties. The revisions update definitions and applicability and address offset provisions of the nonattainment area new source review permitting program after the area is redesignated to attainment for ozone. The revisions also establish more stringent offset requirements for nitrogen oxides that may be triggered as a contingency measure under the ozone maintenance plan. The rule is effective Nov. 6, 2017. Contact: Kevin Leone; EPA Region 8, Air Program; 303-312-6227; leone.kevin@epa.gov. Citations: 40 CFR 52.2320

AIR

Voluntary Criteria for Radon Credentialing Organizations

AIR

Notice of the EPA announces the extension of the comment period for an Aug. 23, 2017, notice (82 FR 39993) regarding the establishment of voluntary criteria specifying a standard of competence for organizations that credential radon service providers under the Indoor Radon Abatement Act. The EPA intends to establish an ongoing and open evaluation process of the National Radon Proficiency Program, the National Radon Safety Board, and state-run certification programs. The EPA also intends to require the organizations to meet the specified standards of the International Organization of Standardization and the International Electrotechnical Commission, and to incorporate device requirements. The EPA seeks comments regarding three separate scenarios, including the agency's development of a basic framework for credentialing organizations, the agency's support for the development of the initial certification scheme, and the agency's support for the development and maintenance of a certification scheme. Comments now are due Nov. 23, 2017. Contact: Katrin Kral; EPA, Indoor Environments Division; 202-343-9454; kral.katrin@epa.gov

ENDANGERED SPECIES

Endangered/Threatened Status Petitions

ENDANGERED SPECIES

Notice of the U.S. Fish and Wildlife Service announces the availability of 12-month findings on petitions to list 25 species as threatened or endangered. The agency has determined that it is not warranted at this time to list 14 Nevada springsnail species, the Barbour's map turtle, Bicknell's thrush, Big Blue Spring cave crayfish, Florida Keys mole skink, Great Sand Dunes tiger beetle, Kirtland's snake, Pacific walrus, or San Felipe gambusia. The agency also has determined that it is not warranted at this time to list certain populations of the black-backed woodpecker, boreal toad, or fisher. Comments on the petition findings may be submitted at any time. Contact: Carolyn Swed; USFWS, Northern Nevada Office; 775-861-6337. Citations: 50 CFR 17

GENERAL ENVIRONMENT AND SAFETY

Draft Fiscal Year 2018-2022 Strategic Plan

GENERAL ENVIRONMENT AND SAFETY

Notice of the EPA announces the availability of the draft EPA Strategic Plan for fiscal years 2018-2022. The plan describes three strategic goals and associated objectives for advancing the agency's mission to protect human health and the environment, including to provide Americans with clean air, land, and water; rebalancing the power between Washington, D.C., and the rest of the country to create tangible environmental results; and administering the law as intended by Congress to refocus the agency on its statutory obligations. The agency anticipates the final strategic plan will be submitted to Congress in February 2018. Comments are due Oct. 31, 2017. NCEH/ATSDR Board of Scientific Counselors Meeting

GENERAL ENVIRONMENT AND SAFETY

Notice of the National Center for Environmental Health/Agency for Toxic Substances and Disease Registry (NCEH/ATSDR) announces a meeting of the Board of Scientific Counselors. The agenda includes discussions on noise-induced hearing loss, program responses to the board's guidance and action items, hurricane season response, the Flint Registry, and the status of blood lead level reference value updates. The agenda also includes discussion of legislative requirements of the new Lead Exposure Poisoning Federal Advisory Committee and updates concerning the amyotrophic lateral sclerosis, lead poisoning prevention, and environmental health tracking programs. In addition, the agenda includes updates from the center's director and from the National Institute of Environmental Health Sciences, the National Institute for Occupational Safety and Health, the Energy Department, and the EPA. The meeting is scheduled for Nov. 15-16, 2017, in Atlanta and via teleconference. Contact: Shirley Little; CDC, NCEH/ATSDR; 770-488-0577; snl7@cdc.gov

GENERAL ENVIRONMENT AND SAFETY

Regulatory Review Period/Impella 2.5 System

GENERAL ENVIRONMENT AND SAFETY

Notice of the FDA announces a determination of the regulatory review period for the medical device Impella 2.5 System in response to an application submitted by Abiomed Europe GmbH, of Aachen, Germany. The device is indicated for temporary ventricular support during high-risk percutaneous coronary interventions performed in elective or urgent hemodynamically stable

patients with severe coronary artery disease and depressed left ventricular ejection fraction. Comments are due Dec. 4, 2017. Petitions for a determination of whether the applicant for extension acted with due diligence during the regulatory review period are due April 3, 2018. Contact: Beverly Friedman; FDA, Office of Regulatory Policy; 301-796-3600

Puerto Rico Emergency Waiver

HAZARDOUS MATERIALS TRANSPORTATION

Notice of PHMSA announces an order of emergency waiver for hazardous material training, testing, and certification requirements for individuals offering and transporting fuel under the direction of the Puerto Rico Public Service Commission within the Hurricane Maria emergency and disaster areas in Puerto Rico. The waiver requires the fuel transport to be accompanied by law enforcement or military escort; the escort vehicle to have a copy of the Emergency Response Guidebook, Response Guide 128; and drivers to have three years professional experience. The waiver also requires unloading procedures to be overseen by a qualified individual or a driver who has received specified training and for the unloading area to be cleared of all nonessential personnel within 100 feet during driver unloading. All other hazardous materials standards apply. The waiver is effective Sept. 28, 2017, and expires Oct. 5, 2017. Contact: Adam Horsley; PHMSA; 202-366-4400. HAZARDOUS WASTE CLEANUP

West Virginia/Coyne Textile Services Superfund Site

HAZARDOUS WASTE CLEANUP

Notice of the Department of Justice announces a proposed consent decree in United States v. Aramark Uniform & Career Apparel LLC (Civil Action No. 3:17-cv-04062), lodged on Sept. 28,

2017, with the U.S. District Court for the Southern District of West Virginia. The consent decree resolves a claim under CERCLA for past response costs related to the release of perchloroethylene at the Coyne Textile Services Superfund Site in Huntington, W.Va. The consent decree requires Aramark to reimburse the U.S. \$1.6 million for past response costs and provides Aramark a covenant not to use for response costs incurred through May 10, 2017. Comments are due Nov. 6, 2017. Contact: DOJ, Environment and Natural Resources Division; 202-514-2701

Regulatory Update

OCCUPATIONAL SAFETY AND HEALTH
Examinations of Working Places in Metal and Nonmetal Mines
OCCUPATIONAL SAFETY AND HEALTH

Final rule of the Mine Safety and Health Administration delays until June 2, 2018, the effective date of a Jan. 23, 2017, final rule (82 FR 7680) that updated standards for the examination of working places in metal and nonmetal mines. Working place examination standards that were in effect as of Oct. 1, 2017, are reinstated until June 2, 2018. The delayed rule requires operators to promptly notify miners of any conditions found that may adversely affect their safety or health, and requires operators to promptly take corrective action. The rule also requires the examination record to include the name of the examiner, examination date, location of areas examined, a description of adverse conditions found, and the date of corrective action. In addition, the rule requires operators to make the examination record available to authorized representatives of the secretary of Labor and miners' representatives and to provide a copy upon request. MSHA previously delayed the effective date to assure that mine operators and miners affected by the rule have the required training and compliance assistance (82 FR 15173; 03/27/2017) and to allow additional time for the agency to provide stakeholders training and compliance assistance (82 FR 23139; 05/22/2017). The current action allows additional time for MSHA to provide stakeholders training and compliance assistance and provides more time to train inspectors. A Sept. 12, 2017, proposed rule (82 FR 42757) would make limited changes to the delayed rule concerning working place examinations. The rule is effective Oct. 5, 2017. Contact: Sheila McConnell; MSHA, Office of Standards, Regulations, and Variances; 202-693-9440; mcconnell.sheila.a@dol.gov. Citations: 30 CFR 56.18002, 57.18002

Regulatory Update

OIL AND GAS INDUSTRY

Onshore Oil and Gas Leases/Venting and Flaring of Waste Gases

OIL AND GAS INDUSTRY

Proposed rule of the Bureau of Land Management would temporarily suspend or delay until Jan. 1, 2019, certain provisions of a Nov. 18, 2016, final rule (81 FR 83008) regarding requirements to reduce waste of natural gas from venting, flaring, and leaks during oil and natural gas production activities on onshore federal and Indian leases. The current action would address drilling applications and plans; gas capture requirements; measuring and reporting of volumes of gas vented and flared from wells; determinations for royalty-free flaring; well drilling, completion, and related activities; equipment requirements for pneumatic controllers, pneumatic diaphragm pumps, and storage vessels; downhole maintenance and liquid unloading; and operator responsibilities. The provisions, some of which were previously the subject of a June 15, 2017, notice of postponement (82 FR 27430), are proposed for suspension or delay to avoid imposition of temporary or permanent compliance costs on operators during BLM review of the final rule and in light of ongoing litigation. Comments are due Nov. 6, 2017. Contact: Catherine Cook; BLM, Fluid Minerals Division; 202-912-7145; ccook@blm.gov. Citations: 43 CFR 3162.3-1, 3179.7 through 3179.301 (nonconsecutive)

Pesticide Registration Notice/Notifications, Non-Notifications, and Minor Formulation Amendments

PESTICIDES

Notice of the EPA announces an extension of the comment period for a Sept. 6, 2017, draft pesticide registration notice (PR Notice 2017-XX) (82 FR 42094) on notifications, non-notifications, and minor formulation amendments for all pesticide products. The Office of Pesticide Programs issues PR notices to inform registrants concerning policies, procedures, and registration-related decisions and to provide guidance for registrants and agency personnel. The draft notice aligns the notification program with the requirements of the Food Quality Protection Act and the Pesticide Registration Improvement Act and clarifies the processes for accepting minor, low-risk registration amendments. The draft notice supersedes PR Notices 95-2 and 98-10 in their entirety. Comments now are due Dec. 5, 2017.
