Cincinnati 19, Ohio

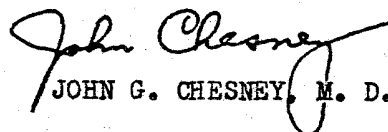

Dear Doctor Kehoe:

I would like to thank you very much for your informative letter concerning the problem of possible broncho-pulmonary reaction to inhaled fiber glass grindings. Our interest was provoked by what I believe was coincidental uncomplicated hemoptysis in two workers in the same plant within a period of one month. Their x-rays have been unremarkable as have their clinical history and physical examination but it was very reassuring to have your letter.

Before closing I must convey the very hearty good wishes of your friend, Park Smith, whom I see almost daily and is continuing to set a wonderful example both on how to practice the finest medicine and get the most out of life in every way.

Thanks again for your help and with best wishes, I remain

Sincerely yours,

JOHN G. CHESNEY, M. D.
