

1 metal expanded and constrict.

2 I don't know how you say it. I mean up and
3 down.

4 Q What would you use to sand the brake shoes?

5 A Okay. The brake shoes I was using sometime,
6 like, on the end, I used the machine, my grounding
7 machine. On the top, I was using sandpaper.

8 What I did, I put the shoe on the vice and I
9 took the sandpaper and did like this so it would be
10 round, so it would not be one side this and one side
11 this.

12 It is how Mr. Grewe, rest in peace, showed
13 me what to do.

14 Q And did you ever -- you saw him do that on
15 brake jobs, also?

16 A That is correct.

17 Q Did that sanding process create any dust?

18 A That is correct. It had a lot of dust.
19 When you used these pads, they had dust.

20 Most of all, also, is on the brake pads when
21 you do the sawing or the machine to make the X or go
