fluid back into the circulation.

Q Now, all of this fluid buildup we have been talking about, was that as a direct result of the malignant mesothelioma?

A Yes.

Q Now, at this point in time we are now in the area of September of 1981.

What, if any, symptoms or complaints was Mr. Vandergucht experiencing at that time concerning his weight, his appetite, his breath?

A Well, the fluid continued to accumulate at a much more rapid rate as the tumor grew and expanded.

His symptoms became more noticeable, and the LeVeen shunt obstructed or blocked within about approximately a month, it was no longer functional.

He had to be readmitted into the hospital in October of '81 and tapped on two occasions in the hospital.

Q Did you do that, Doctor --

A No. That was done by -- I am sorry. Yes, I did that. The two of October of '81.
