Social Security Administration Study

In regard to this matter of furnishing the Department of Health a list of our former employees, it is my understanding that this was entirely voluntary on our part.

The Occupational Health Division is apparently interested in gathering information on tremolite asbestos exposure, and we are one of the relatively few plants where the condition exists.

I do not know that we have a legal requirement to furnish this. Mr. Dugan should be the one to answer this question.

On August 1, I notified Mr. Lynch that we did not wish to release this information and since then have heard nothing further.
