

CHEMICAL MANUFACTURERS ASSOCIATION  
Vinyl Chloride Panel  
Action Item Status Report  
April 26, 1994

| Item                                                  | GEON                                                                                                                                                                                                                                   | Oxy | PPG | Vista | G. Gulf | Formosa | Dow | Borden |
|-------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----|-------|---------|---------|-----|--------|
| 1) 1994 Comm. Form Received                           | X                                                                                                                                                                                                                                      |     | X   | X     | X       | X       | X   | X      |
| 2) Review of "For-Hire" Contr. Props. DUE: July, 1994 | V. Perry, G. Jordan, and M. Lunsford will review the "for-hire" contractor proposals from IT and Spiltech once they are received by CMA.                                                                                               |     |     |       |         |         |     |        |
| 3) VCNet Map Shipment Route DUE: July, 1994           | All Panel members should send any changes to the VCNet map shipment routes to Dr. Shah by July 31 for incorporation into the map this August.                                                                                          |     |     |       |         |         |     |        |
| 4) "For-Hire" Contract Renewals                       | H. Shah will contact OH Materials and EmTech to renew their contracts with the Panel and to request a list of each contractors' offices.                                                                                               |     |     |       |         |         |     |        |
| 5) OSHA Vinyl Chloride Standard Issue                 | P. de la Cruz will draft a letter to the Panel summarizing the meeting with OSHA on Jan. 5 and will copy OSHA representatives on the letter.                                                                                           |     |     |       |         |         |     |        |
| 6) VCNet Brochure DUE: April 18                       | B. Wronko will send copies of train derailment photos to J. Klimavicz. Panel members should have the draft reviewed by legal counsel. All comments on the draft are due to J. Klimavicz by April 18.                                   |     |     |       |         |         |     |        |
| 7) VC Safety Awareness Training Prg. June 8-9         | R. Taylor and G. Marshall will organize the training program to be held at OxyChem, Ingleside Facility, Corpus Christi, TX. Panel member companies with an interest in the training workshop should contact R. Taylor at 512/242-5024. |     |     |       |         |         |     |        |
| 8) Identif. of Potential Training Sites               | B. Wronko will investigate Niagara Falls as a possible VCNet training site, and V. Perry will contact UP railroad to see if it could organize a workshop in Little Rock, AR.                                                           |     |     |       |         |         |     |        |
| 9) VCNet Video Preparation DUE: June 6                | M. Lunsford will draft a video script outline to be distributed to the Panel for review.                                                                                                                                               |     |     |       |         |         |     |        |
| 10) DOT Final Rule                                    | Panel members will check within their companies to see how the companies plan to address a final rule due out this summer that will require emergency response plans and extensive drills for all shippers and carriers.               |     |     |       |         |         |     |        |
| 11) Transfer Procedures for Vinyl Chloride            | Panel members will bring copies of their transfer procedures for vinyl chloride to the next meeting for discussion purposes.                                                                                                           |     |     |       |         |         |     |        |
| 12) Next Panel Meeting                                | The next Vinyl Chloride Panel meeting is scheduled for July 21, 1994 at the CMA offices in Washington, D.C. from 9:00 a.m. - 3:00 p.m. Please make your travel arrangements accordingly.                                               |     |     |       |         |         |     |        |
