FINAL REPORT

ASSESSMENT OF WASTEWATER MANAGEMENT, TREATMENT TECHNOLOGY, AND ASSOCIATED COSTS FOR ABATEMENT OF PCBs CONCENTRATIONS IN INDUSTRIAL EFFLUENTS

Task II

Contract No. 68-01-3759

Submitted to:

U. S. Environmental Protection Agency
Office of Toxic Substances
Special Projects Branch
Washington, D. C.

Submitted by:

VERSAR INC.
6621 Electronic Drive
Springfield, Va. 22151
(703) 354-3350

TO BE UPDATED

MONS 205525

POLYCHLORINATED BIPHENYLS IN THE ENVIRONMENT

WITH RECOMMENDATIONS FOR CRITERIA FOR PCBs IN AMBIENT WATER

MONS 205526

TABLE OF CONTENTS

I. INTRODUCTION.....
I.1. Principal sources of information.....
I.2. Uses and releases of PCBs into the environment.....
I.3. PCB mixtures and contaminants: the problem of evaluation.....

II. CHEMICAL AND PHYSICAL PROPERTIES.....
II.1. Nomenclature of chlorobiphenyls and isomers.....
II.2. Manufacture and nomenclature of commercial PCB mixtures.....
II.3. Constitution of Aroclor mixtures.....
II.3.1. Molecular composition.....
II.3.2. Isomeric constitution.....
II.4. Constitution of other commercial mixtures.....
II.5. Occurrence of certain substitution patterns in PCB mixtures....
II.5.1. Adjacent unsubstituted positions.....
II.5.2. Number of ortho-chlorines.....
II.5.3. 4,4'-substitution.....
II.5.4. 3,4 - substitution.....
II.5.5. Toxic contaminants in commercial PCB mixtures.....
II.6. Physical properties of chlorobiphenyls and PCB mixtures.....
II.6.1. General properties.....
II.6.2. Vapor pressure and volatilization.....
II.6.2.1. Factors affecting the rate of volatilization.....
II.6.3. Solubility in water.....
II.6.4. Solubility in organic solvents and partitioning into lipids.....
II.6.5. Adsorption to soils, sediments, and particulates...
II.6.6. Concentration at the air-water interface.....
II.7. Physical properties of chlorinated dibenzofurans.....
II.8. Chemical properties of chlorobiphenyls and commercial mixtures.
II.8.1. General chemical stability.....
II.8.2. Photochemical reactions.....
II.8.3. Photochemical production and degradation of chlorinated dibenzofurans.....
II.8.4. Probable formation of PCDFs from PCBs in service...

III. TOXIC EFFECTS.....
III.1. Introduction.....
III.2. Effects on microbial systems.....
III.3. Effects on phytoplankton.....
III.4. Effects on aquatic invertebrates.....
III.4.1. Effects on fresh-water organisms.....
III.4.2. Effects on estuarine organisms.....
III.4.3. Effects on a marine invertebrate community.....
III.5. Effects on fish.....
III.5.1. Lethal concentrations of PCBs to fish.....
III.5.2. Effects on fish reproduction.....

MONS 205527

III.5.3. Other sublethal effects on fish.....
III.5.4. Effects on ATPase and osmoregulation.....
III.5.5. Effects of PCDFs on fish.....
III.6. Effects on birds.....
III.6.1. Lethal concentrations in diet: subacute and semi-chronic studies.....
III.6.2. Chick edema disease and the role of PCDFs in PCB toxicity.....
III.6.3. Porphyria and induction of ALA-synthetase.....
III.6.4. Effects on reproduction.....
III.6.4.1. Effects in chickens.....
III.6.4.2. Effects in pheasants.....
III.6.4.3. Effects in Mallards.....
III.6.4.4. Effects in Bobwhite Quail.....
III.6.4.5. Effects in Ring Doves.....
III.6.4.6. Effects in American Kestrels.....
III.6.4.7. Effects in Japanese Quail.....
III.6.4.8. Summary of effects on reproduction in birds.....
III.6.5. Liver and microsomal enzymes.....
III.6.6. Other toxic effects in birds.....
III.7. Toxic effects in mammals: acute and subacute studies.....
III.7.1. Acute toxicity.....
III.7.2. Subacute toxicity.....
III.8. Toxicity of PCDFs in mammals and the role of PCDFs in the toxicity of commercial PCBs.....
III.9. Chronic effects of PCBs in mammals and effects on reproduction.
III.9.1. Effects on rats.....
III.9.2. Effects on mice.....
III.9.3. Effects on dogs.....
III.9.3. Effects on non-human primates.....
III.9.4. Effects on mink.....
III.9.5. Effects on swine.....
III.9.6. Effects on rabbits.....
III.10. Enzyme induction and other effects on the liver.....
III.10.1. Effects on liver weight.....
III.10.2. Proliferation of smooth endoplasmic reticulum.....
III.10.3. Microsomal enzyme induction.....
III.10.4. Structure-activity relationships.....
III.10.5. Enzyme induction by Aroclor 1016.....
III.10.6. Enzyme induction by PCDFs.....
III.10.7. Synergistic effects on enzyme induction.....
III.10.8. Structural changes in liver.....
III.10.9. Changes in biochemical composition of the liver...
III.11. Induction of porphyria.....
III.12. Miscellaneous biochemical effects.....
III.12.1. Hypertriglyceridemia.....
III.12.2. Effects on the adrenal gland.....
III.12.3. Effects on thyroxine.....
III.12.4. Hematological effects.....
III.12.5. Enzyme inhibition.....

III.13. Immunosuppressive effects.....
III.14. Carcinogenic and co-carcinogenic effects.....
III.15. Mutagenic and teratogenic effects.....
III.16. Effects in humans.....
III.16.1. Chloracne.....
III.16.2. Yusho.....
III.16.3. Animal models for Yusho and chloracne.....
III.16.4. The role of PCDFs in the toxicity of PCBs to humans.....

IV. ENVIRONMENTAL FATE AND EFFECTS.....
IV.1. Persistence, metabolism and fate.....
IV.1.1. Persistence.....
IV.1.2. Differential persistence of lower and higher chlorinated biphenyls.....
IV.1.3. Metabolism.....
IV.1.4. Photodegradation.....
IV.1.5. Transport.....
IV.1.6. Fate.....
IV.2. Bio-accumulation and bio-magnification.....
IV.2.1. Mechanisms of uptake and accumulation.....
IV.2.2. Bio-accumulation in aquatic invertebrates.....
IV.2.3. Bio-accumulation in fish.....
IV.2.4. Bio-accumulation in model aquatic ecosystems.....
IV.2.5. Storage and bio-magnification in birds.....
IV.2.6. Storage and bio-magnification in mammals.....
IV.2.7. Storage and bio-magnification in humans.....
IV.2.8. Bio-accumulation and bio-magnification in natural ecosystems.....
IV.3. Presence in the aquatic environment.....
IV.4. Effects on biota and natural ecosystems.....
IV.4.1. Effects observed in the laboratory.....
IV.4.2. Effects observed in the field.....
IV.5. Potential effects in the human population.....

V. CONSIDERATIONS UNDERLYING SELECTION OF CRITERIA.....
V.1. Critical toxicological effects: natural systems.....
V.2. Critical toxicological effects in mammals.....
V.3. Considerations underlying the selection of acceptable exposure levels.....
V.4. Differential toxicity of PCB components and mixtures.....
V.5. Formulation of criteria.....

MONS 205529

APPENDIX A. The Chemistry of PCBs (Hutzinger, Safe & Zitko).

APPENDIX B. The Toxicity of Polychlorinated Polycyclic Compounds and Related Chemicals (Kimbrough).

APPENDIX C. Review of PCB Levels in the Environment (U.S. EPA, Office of Toxic Substances, Draft report).

APPENDIX D. Review of Carcinogenic and Co-Carcinogenic Effects of PCBs. D-34

APPENDIX E. Metabolism and Biodegradation.

APPENDIX F. Low-dose Risk Extrapolation for Carcinogenic Effects.
