the NIOSH documents.

Q Sir, I would assume that since you have placed these studies on your board, these numbers, the time-weighted average of .21, the time-weighted average of .23, time-weighted average of .20, the time-weighted average of .04, you consider Mr. Roberts to be someone that you can rely upon in order to put them on your board and talk to the jury about those, don't you?

A Well, certainly Mr. Roberts was a functionary of the Cincinnati NIOSH operation during that interval in time.

He was a function of an official governmental agency that published a document in the federal bureaucracy, and I have every reason to consider that he did adequate work based on his description of that work.

I have nothing further to go on than that.

Q And, therefore, part of the reason you say that you can rely upon him is because, in fact, you put him on your own chart and they, in fact, confirm
