Dear Dr. Kehoe:

For your information, we are attaching copy of a letter received from the Texas Company, in which one of their customers appear to think their mechanics are being poisoned by working on carburetors containing sediment from leaded gasoline.

Very truly yours,

O. B. Lewis

The Texas Company

Port Arthur, Tex.

Dear Sir:

Several mechanics working in the shops in this town have been poisoned in the hands, the doctors here say that it is poison caused by working on carburetors with the sediment from leaded gasoline.

I would like to know if this is possible and if so what treatment should be given.

Dean Walker Motor Co.

Signed: DEAN F. WALKER
