

1 Q How do you know it would blow around the
2 air?

3 A Oh, you could definitely see it. It would
4 get all over you. You could breathe it in. You could
5 taste it.

6 Q Did you have to manipulate the brake lining
7 material in any way, the new brake lining material
8 that you would install at Foreign Motors?

9 A Same thing. You would have to chamfer some
10 of the brake shoes to get them on and the brake disc,
11 it had a lot of squealing and all in it. They
12 recommended that we chamfer the edges of them or cut
13 grooves into the lining with either a file or
14 hacksaw.

15 Q What would happen when you would take the
16 hacksaw to these brake lining pads?

17 A Create a lot of dust.

18 Q And what happened to that dust?

19 A Breathe it in.

20 Q What are the brand names or manufacturers of
21 brake lining material that you worked with or around
