Dear [REDACTED] dear all,

I think it would be very useful to add this to our agenda of next week.

Jenny and [REDACTED] also have sent around statements by resp SE and NO in relation to the polymer discussion.

Not sure what we can/will discuss in our group; in my view it is quit clear that from a PFAS perspective, fluoropolymers are causing environmental concerns especially during manufacture and in waste stage. I do not see how at this moment fluoropolymers would fit into a circular non-toxic economy.

Kind regards,
[REDACTED]

Subject: CASG - polymers

Dear all,

Happy New Year. I hope that you all have a good Christmas.

I'm writing about the 'CASG polymers' issue that we briefly discussed at the last co-ordination meeting. I understand that this relates to 'polymers of low concern' for REACH polymer registration and whether fluoropolymers should be included. This came up in discussions with [REDACTED] (DG ENV) who confirmed that they are aware of the issue. [REDACTED] wondered if this could be discussed as part of the open agenda at the next coordination meeting on the 24th of January. The next CASG meeting is the 4th of February.

I think that this could be useful. What do you think?

Yours,

Senior Scientific Officer / Restriction Process Coordinator
