Subject: The Future of Connected and Automated Vehicles Starts Here

Dear Bill,

Where will you be June 20-21, when experts from the automotive industry, academia and government gather to address the many questions and challenges that remain open regarding testing of automated vehicles? If you are as interested as I am in understanding the new paradigms needed to address the concerns facing the future of connectivity, you'll be at the [Automated and Connected Vehicle Systems Testing Symposium](#), taking place in Greenville, South Carolina.

Presented by SAE, the global leader in automotive engineering, and hosted by Clemson University-International Center for Automotive Research (CU-ICAR), this groundbreaking debut event will delve into the underlying engineering assessment and test frameworks required to safely deploy automated vehicles within the public transportation system. Technical experts will address infrastructure and software/hardware integration, systematic choices and down-selection processes required for validation, and so much more.

I hope you'll join me as we dive deep into the enablers required to bridge the gap from technologies to products to solve problems and implement changes to positively impact the future of connectivity. [Learn more](#) and register today. I look forward to seeing you in South Carolina.

Best regards,

A handwritten signature in black ink that reads "Venkat Krovi". The signature is written in a cursive, slightly slanted style.
