W.R. RICHARDS,
Organic Division, St. Louis.

Herewith copy of a letter we received from Syracuse University Research Corporation asking for reference standards of polychlorobiphenyls. We have made small samples of such materials available before to other workers who have been examining pesticide residues in birds of prey but we have no pure samples remaining, certainly not in the 5 gm. quantity. I wonder, therefore, if you or Ag. Division can deal with this matter?
