ASBESTOS TEXTILE INSTITUTE will hold its 20th Anniversary Conference October 8th and 9th, 1964, in New York City at the Borchsen-Hua Hotel. Along with this conference will be AIT's 30th Anniversary Celebration on the 9th of October, featuring the usual order of business, "Anniversary and Legal Topics", "The First Twenty Years" by J. A. Bettes, Jr., and "What Makes A Star Salesman A Star?" by the guest speaker, H. B. (How) Shaver, of the L. S. Rubber Company.

PIEMONTE ITALIANA - On September 2nd, 1964, the Archbishop of Monrovi blessed the foundation stone of the new factory of *Piemonte Italiana S.p.A.*, a subsidiary of *Turner & Newall Limited*. Monrovi is 5th miles south of Turin and the factory site is only a mile from the proposed *Turin-Savona autobahn*. Work on the new factory has just begun. The first phase, costing £2 million, is due for completion towards the end of 1965 and first production is planned for the same time. Linings (for drum brakes, shoe brakes and clutches) for the automotive industry will be manufactured. For the initial equipment and development markets, Veneto linings are already established on truck and ground in Italy. So far these linings have been imported from the United Kingdom. But the founding of Italian vehicle production in the past five years has created a new situation—local manufacture will provide shorter supply lines and closer technical liaison with Italian vehicle manufacturers. Linings at the ceremony will be able to inspect a car which is equipped as a mobile test bed, with instruments to reveal brake wear, life, fatigue, the number of brake applications and rates of deceleration at various brake pressures.

THE RIBBONERS' CO. has formally broken ground to sign the start of construction of its new \$3,000,000 plant tile plant at Yonkers, in New York's Hudson Valley.

Get the widest range of styles and textures with J.M. Asbestos Cloth

Whatever you manufacture—fire blankets, shoe soles, insulation, curtains, filter cloths, clothing—there's a J.M. Asbestos Cloth in a style and texture that's exactly right for the job. They are produced by skilled artisans who, using modern equipment, maintain complete control from mine to finished textile. These products reflect the thoroughness and quality associated with the Johns Manville name for more than 100 years. Today, there are three convenient plant locations including our newest, in Marlsville, N. C. for full details and specification data on all styles and textures, send for our 16 page illustrated brochure, JM 17A. Write to Johns Manville, Box 359, New York, N. Y. 10016. In Canada: Port Credit, Ontario, Canada: Johnsmanville.

JOHNS-MANVILLE J.M. ASBESTOS TEXTILES

sales and in the replacement market. This situation will continue throughout this year and should continue well into 1965.

Asbestos Paper at Millboard. The demand for these materials continues at an even pace and competition is keen, especially for large requirements. A continuation of present conditions is anticipated through the end of the year.

Asbestos Natural Paper. After a usual first six months, the amount of sales has substantially increased and indications are that a high level of business will occur during the balance of the year.

High Pressure Insulation. Volume of orders for this material remains strong but business is highly competitive. This situation should remain for the balance of 1964.

Low Pressure Insulation. Demand is continuing at a steady rate and should remain so for the rest of the year.

Asbestos Cement Pipe. Present market is not quite as good as this time last month due to the softening of the housing market and the fall-off of the Accelerated Public Works Program.

Asbestos Filter Fiber. The asbestos filter fiber market remains strong due to water and beer filter demand and also demand for sugar filter which is normal for this time of year. The demand for white low iron asbestos present and acid washed asbestos filter fiber, for the balance of 1964, is expected to exceed 1963 by approximately 2%.

The above comments have been made by various informed executives in the industry. All comments are welcome.
