Re: Voluntary Actions to Evaluate and Control Emissions of Ammonium Perfluorooctanoate

This refers to the industry's letter to the Honorable Stephen Johnson, Assistant Administrator of the United States Environmental Protection Agency dated March 14, 2003 regarding "Voluntary Actions to Evaluate and Control Emissions of Ammonium Perfluorooctanoate". One of the actions is to provide a list of each site in the United States, within 30 days, where ammonium perfluorooctanoate is used to make fluoropolymers and which fluoropolymers, including CAS numbers, are produced at that site.

In accordance with this commitment, please find below the following information:

Site Location: 229 East 22nd Street, Bayonne, New Jersey 07002
Fluoropolymer Produced: CBI Redacted
CAS Number: CBI Redacted

Respectfully submitted,

Noel Misa
