DATE: March 8, 1983
SUBJECT: PVC RESIN PRODUCTION

ROUTE TO:	_____
COPIES TO:	_____
FILE:	_____

This is to confirm the information I gave you over the phone regarding historical PVC resin production at OKC and Aberdeen. I understand that you will use these numbers to calculate a "VCM relief valve release per million pounds of production" value used to compare Conoco performance versus the industry for internal use.

The PVC production according to the blue book is:

	<u>MM POUNDS OF PVC PRODUCTION</u>	
	<u>OKC</u>	<u>Aberdeen</u>
1980	177.6	274.5
1981	188.9	262.0
1982 (first half)	121.1	172.4
