Reference: A. July 19, 1990 Phone Conversation - H. W. Braun, Delaval Condenser Division, and Agnes Potepan, Garlock Inc.

Dear Ms. Potepan:

Thank you very much for the courtesy extended and information you supplied me during our phone conversation (Reference A).

As I understood you, Garlock can provide documentation showing that Garlock 3200 material meets the requirements of MIL-G-24696 with regard to composition and physical properties and leaching of detrimental materials.

Would you please send us a copy of this data and also a letter indicating what your current status is for obtain your QPL listing?

Currently, we have purchased your Garlock 3200 material from one of your distributors; James E. Dooley Company, 1101 Sussex Boulevard, Broomall, PA 19008. The use of the material prior to full qualification has been approved by our customer; however, to satisfy our rigorous quality conformance requirements, we need objective evidence. A copy of this letter is being provided to your distributor.

Again, thank you for your assistance and offer to provide objective evidence on Garlock 3200 testing to date.

Yours very truly,

Henry W. Braun
Manager of Engineering
