SUBJECT: NOTICE OF GUIDANCE; ASBESTOS NESHAP TRAINING REQUIREMENTS

In the final rule revising the asbestos NESHAP promulgated on November 20, 1990, EPA included a new requirement that, effective November 20, 1991, an on-site representative (foreman or management level personnel), trained in the provisions of the NESHAP, be present during the stripping, removal or handling of "Regulated Asbestos Containing Material" (RACM). Refresher training every two years thereafter is also required.

In the September 12, 1991 Federal Register (56 FR 46380), EPA published a "Notice of Guidance" to explain how the new Asbestos NESHAP training requirements may be met. A copy of the notice is attached, and is summarized below:

A four day "Asbestos Abatement Contractor/Supervisor" (AAC/S) curriculum has been previously accredited as a training program to meet the training requirements of the "Asbestos Hazard Emergency Response Act" (AHERA). AHERA was originally intended only for asbestos abatement in schools.

Successful completion of the AHERA accredited AAC/S program is "strongly recommended" to satisfy the Asbestos NESHAP training requirements. Successful completion requires attendance at an accredited four day training class and passing an examination.

Completion of the AAC/S refresher training course every 2 years will comply with the Asbestos NESHAP training requirements.

Persons accredited as an AHERA Asbestos Abatement Contractor/Supervisor at the time the NESHAP training requirement takes place (11/20/91) will be accredited as a NESHAP on-site representative until the certificate expiration

LAM 025643

ABS-029961

date. Completion of the appropriate AHERA refresher training is required thereafter.

A listing of approved AAC/S training courses is also attached.

allow additional interrogatories upon motion therefor showing good cause, or upon stipulation of the parties. A motion for leave to serve additional interrogatories must be filed and granted prior to the service of the proposed additional interrogatories; and must be accompanied by a copy of the interrogatories, if any, which have already been served by the moving party, and by a copy of the interrogatories proposed to be served. If a party upon which interrogatories have been served believes that the number of interrogatories served exceed the limitation specified in this paragraph, and is not willing to waive this basis for objection, the party shall, within the time for (and instead of) serving answers and specific objections to the interrogatories, serve a general objection on the ground of their excessive number. If the inquiring party, in turn, files a motion to compel discovery, the motion must be accompanied by a copy of the set(s) of interrogatories which together are said to exceed the limitation, and must otherwise comply with the requirements of paragraph (e) of this section.

Dated: September 8, 1991.

Harry F. Manbeck, Jr.,
Assistant Secretary and Commissioner of
Patents and Trademarks.

[FRL-3995-4]

Asbestos NESHAP Training Requirements for On-Site Representative

AGENCY: Environmental Protection

Agency.
ACTION: Notice of guidance.

SUMMARY: The purpose of this guidance is to explain how the new Asbestos NESHAP training requirements may be met. The Asbestos NESHAP was revised on November 20, 1990. One of the new requirements of the Asbestos NESHAP is that an on-site representative (such as a foreman or management level person), trained in the asbestos demolition and renovation provisions and the means of complying with them, be present when the regulated asbestos-containing material (RACM) is stripped, removed or otherwise handled or disturbed. Evidence that the required training has

been completed shall be posted at the demolition or renovation site and made available for inspection by EPA or the delegated Agency.

EFFECTIVE DATE: November 20, 1991.

FOR FURTHER INFORMATION CONTACT: Ms. Omayra Salgado at (703) 308-8728.

SUPPLEMENTARY INFORMATION: The Asbestos School Hazard Abatement Reauthorization Act (ASHARA), signed into law on November 28, 1990, included an amendment to the Asbestos Hazard Emergency Response Act (AHERA) which requires that EPA revise the AHERA Model Accreditation Plan, originally intended only for schools, to extend accreditation requirements to include persons performing asbestos-related work in public and commercial buildings. These requirements would apply to the asbestos removal associated with the demolition and renovation of buildings that are subject to the NESHAP. These requirements may be in effect as early as 1992.

When the Asbestos NESHAP was last revised, these statutory changes had not been foreseen. As a consequence, the Asbestos NESHAP, contained a requirement for training and a refresher course. EPA wishes to avoid duplicative asbestos training requirements; therefore, the Agency has decided to recognize valid accreditation as an AHERA Asbestos Abatement Contractor/Supervisor as satisfying the Asbestos NESHAP training requirements.

The Asbestos Abatement Contractor/Supervisor curriculum is a training program under the current AHERA that meets the NESHAP requirements. Persons are presently required to complete four days of training and then pass an examination to become accredited under this program. Completion of the Asbestos Abatement Contractor/Supervisor training course to comply with the NESHAP training requirement is strongly recommended since all persons performing asbestos-related work will be required to take AHERA training when EPA revises the AHERA Model Accreditation Plan to include public and commercial buildings. In light of this requirement, it would appear to be ill-advised to develop a training course that does not qualify for AHERA accreditation.

Guidance.

- Successful completion of the AHERA Model Accreditation Plan course titled Asbestos Abatement Contractor/Supervisor is strongly recommended to satisfy the Asbestos NESHAP training requirements.

- Completion of the Asbestos Abatement Contractor/Supervisor refresher training course every 2 years will comply with the Asbestos NESHAP training requirements. However, completion of the refresher course, every year, is required to maintain AHERA accreditation. For this reason an accredited person probably will need to complete the refresher course each year in order to continue working as an AHERA accredited Contractor/Supervisor, and also to qualify for refresher training.

- Those persons who are accredited as an AHERA Asbestos Abatement Contractor/Supervisor at the time the NESHAP training requirement takes effect (November 20, 1991), will be accredited as a NESHAP on-site representative until the certificate expiration date. Completion of the appropriate AHERA refresher training is required thereafter.

Dated: September 8, 1991.

John B. Reanic,
Director, Stationary Source Compliance
Division, Office of Air Quality Planning and
Standards.

Medicaid Program; State Share of Financial Participation

AGENCY: Health Care Financing
Administration (HCFA), HHS.

ACTION: Interim final rule with comment.

SUMMARY: Under certain circumstances, States are currently permitted to use voluntary contributions (donated funds) from providers and all revenues from State-imposed taxes, as the State share of the costs of the Medicaid program. There is now widespread use of State donations or other voluntary provider payment programs that unfairly affect the Federal share of Federal Financial Participation (FFP). This practice circumvents the States' statutory obligation to expend funds for medical assistance. Therefore, effective January 1, 1992, this interim final rule requires that the amount of funds donated from Medicaid providers be offset from Medicaid expenditures incurred on or

Asbestos-Containing Materials In Schools; EPA-Approved Courses Under the Asbestos Hazard Emergency Response Act (AHERA)**AGENCY:** Environmental Protection Agency (EPA).**ACTION:** Notice.

SUMMARY: Section 206(c)(3) of the Toxic Substances Control Act (TSCA) directs the EPA Administrator to publish (and revise as necessary) a list of EPA-approved asbestos courses and tests which are consistent with the Agency's Model Accreditation Plan required under section 206(b) of TSCA. Also required is a list of those courses and tests which had qualified for equivalency treatment for interim accreditation during the time period established by Congress in AHERA. Effective July 1990, that time period has expired in all States. All courses approved for interim accreditation have therefore been included in this list for information purposes only.

Section 206(f) of TSCA Title II required the Administrator to publish quarterly in the Federal Register, beginning August 31, 1988, and ending August 31, 1991, a list of EPA-approved asbestos training courses. Accordingly, this Federal Register notice is the sixteenth and final cumulative listing of EPA-approved courses and also includes a list of State accreditation programs that EPA has approved as meeting the requirements of the Model Plan. EPA will continue maintaining this information in a National data base, and publish quarterly notices in the Federal Register as to how, when, and where to obtain this information.

FOR FURTHER INFORMATION CONTACT: David J. Kling, Acting Director, Environmental Assistance Division (TS-799), Office of Toxic Substances, Environmental Protection Agency, rm. E-545, 401 M St., SW., Washington, DC 20460. Telephone: (202) 554-1404. TDD: (202) 554-0551.

SUPPLEMENTARY INFORMATION: Section 206 of Title II of the Toxic Substances Control Act (TSCA), 15 U.S.C. 2646, required EPA to develop a Model Accreditation Plan by April 20, 1987. The Plan was issued on April 20, 1987, and was published in the Federal Register of April 30, 1987 (52 FR 15875), as appendix C to subpart E, 40 CFR part 763. Persons must receive accreditation in order to inspect school buildings for asbestos, develop school asbestos

management plans, and design or conduct school asbestos response actions. Such persons can be accredited by States, which are required under Title II to adopt contractor accreditation plans at least as stringent as the EPA Model Plan, or by completing an EPA-approved training course and passing an examination for such course. The EPA Model Accreditation Plan establishes those areas of knowledge of asbestos inspection, management plan development, and response action technology that persons seeking accreditation must demonstrate and States must include in their accreditation programs.

In the Federal Register of October 30, 1987 (52 FR 41826), EPA promulgated a final "Asbestos-Containing Materials In Schools" rule (40 CFR part 763, subpart E) which required all local education agencies (LEAs) to identify asbestos-containing materials (ACM) in their school buildings and take appropriate actions to control the release of asbestos fibers. The LEAs are also required to describe their activities in management plans, which must be made available to the public and submitted to State governors. Under Title II, LEAs are required to use specially trained persons to conduct inspections for asbestos, develop the management plans, and design or conduct major actions to control asbestos. The rule took effect on December 14, 1987.

The length of initial training courses for accreditation under the Model Plan varies by discipline. Briefly, inspectors must take a 3-day training course; management planners must take the inspection course plus an additional 2 days devoted to management planning; and abatement project designers are required to have at least 3 days of training. In addition, asbestos abatement contractors and supervisors must take a 4-day training course and asbestos abatement workers are required to take a 3-day training course. For all disciplines, persons seeking accreditation must also pass an examination and participate in annual re-training courses. A complete description of accreditation requirements can be found in the Model Accreditation Plan at 40 CFR part 763, subpart E, appendix C.I.1.A through E.

In Section 206(c)(3) of Title II, and as amended by section 206(f), the Administrator, in consultation with affected organizations, is directed to publish quarterly a list of asbestos courses and tests in effect before the date of enactment of this title which qualified for equivalency treatment for interim accreditation purposes, and a list of EPA-approved asbestos courses

and tests which the Administrator has determined are consistent with the Model Plan and which qualify a contractor for accreditation.

This quarterly notice formerly included a list of laboratories accredited by the National Institute of Standards and Technology (NIST) for the polarize light microscopy (PLM) analysis of bulk materials for asbestos. The EPA is no longer publishing this laboratory list because it is now available from the NIST National Voluntary Laboratory Accreditation Program (NVLAP). Persons wishing to obtain current information on the accreditation of asbestos laboratories in general or the accreditation status of any particular laboratory should contact NIST directly for this information by: (1) Writing to: Chief, Laboratory Accreditation Program, National Institute of Standards and Technology, Bldg. 411, room A124, Gaithersburg, MD 20899 (please include a self-addressed mailing label); (2) computer-to-computer communication with the NVLAP electronic bulletin board on 301-948-2058; (3) Fax on 301-975-3839; or (4) calling NVLAP on 301-975-4016. EPA interim approval for laboratories ended October 30, 1989, as since that date laboratory asbestos accreditation has been administered by NIST through the NVLAP.

The Federal Register notice of October 30, 1987, included EPA's initial list of course approvals. In addition, the initial list also included those State accreditation programs that EPA had approved as meeting the requirements of the Model Plan. The second Federal Register notice of February 10, 1988 (53 FR 3982), the third Federal Register notice of June 1, 1988 (53 FR 20066), the fourth Federal Register notice of August 31, 1988 (53 FR 33574), the fifth Federal Register notice of November 30, 1988 (53 FR 48424), the sixth Federal Register notice of February 28, 1989 (54 FR 8438), the seventh Federal Register notice of May 31, 1989 (54 FR 23392), the eighth Federal Register notice of August 31, 1989 (54 FR 36166), the ninth Federal Register notice of November 29, 1989 (54 FR 49190), the tenth Federal Register notice of February 28, 1990 (55 FR 7202), the eleventh Federal Register notice of May 31, 1990 (55 FR 22176), the twelfth Federal Register notice of August 31, 1990 (55 FR 35760), the thirteenth Federal Register notice of November 30, 1990 (55 FR 49756), the fourteenth Federal Register notice of February 28, 1991 (56 FR 8396), the fifteenth Federal Register notice of May 31, 1991 (56 FR 24884), and this, the sixteenth and final Federal Register notice are the subsequent cumulative listings of EPA

BEST
AVAILABLE
COPY

course approvals and EPA-Approved State Accreditation Programs.

This Federal Register notice is divided into four units. Unit I discusses EPA approval of State accreditation programs. Unit II covers EPA approval of training courses. Unit III discusses the AHERA-imposed deadline for persons with interim accreditation. Unit IV provides the list of State accreditation programs and training courses approved by EPA as of July 8, 1991. Subsequent published lists of the data base will add other State programs as they are approved.

As announced in the Federal Register of September 20, 1989, EPA is no longer accepting for review and contingent approval training courses for AHERA accreditation after October 15, 1989. However, a course's status may change after that cut-off date. For example, a contingently approved course may become fully approved and a course with full approval may become disapproved. As mentioned in the September 1989 Federal Register notice, EPA has said it would continue to conduct full approval audits of courses that already have received contingent approval and review for contingent approval and subsequent full approval, courses received by EPA which had been postmarked on or before October 15, 1989. EPA may reach agreements with States that do not currently have an accreditation program, to turn over responsibility for auditing courses with contingent and full approval, as these States develop accreditation programs.

I. EPA Approval of State Accreditation Programs

As discussed in the Model Plan, EPA may approve State accreditation programs that the Agency determines are at least as stringent as the Model Plan. In addition, the Agency is able to approve individual disciplines within a State's accreditation program. For example, a State that currently only has an accreditation requirement for inspectors can receive EPA approval for that discipline immediately, rather than waiting to develop accreditation requirements for all disciplines in the Model Plan before seeking EPA approval.

As listed in Unit IV, Alabama, Alaska, Arkansas, Colorado, Connecticut, Delaware, Florida, Idaho, Illinois, Indiana, Iowa, Kansas, Maine, Massachusetts, Michigan, Minnesota, Mississippi, Montana, Nebraska, New Jersey, New York, North Carolina, North Dakota, Oregon, Pennsylvania, Rhode Island, South Dakota, Utah, Virginia, Washington, West Virginia, and Wisconsin have received EPA full

approval for two accreditation disciplines, abatement workers as well as contractors and supervisors, that are at least as stringent as the Model Plan. In addition, the States of Alabama, Colorado, Connecticut, Florida, Idaho, Illinois, Indiana, Iowa, Maine, Massachusetts, Michigan, Mississippi, Montana, Nebraska, New York, North Carolina, North Dakota, Pennsylvania, Rhode Island, South Dakota, Utah, Virginia, West Virginia, and Wisconsin have received full approval for their inspector/management planner and project designer disciplines. Any of the initial or refresher training courses in those disciplines approved by the aforementioned States are EPA-approved courses for purposes of accreditation. These training courses are EPA-approved courses for purposes of TSCA Title II in these States and in all States without an EPA-approved accreditation program for the discipline. Current lists of training courses approved by Alabama, Alaska, Arkansas, Colorado, Connecticut, Delaware, Florida, Idaho, Illinois, Iowa, Kansas, Maine, Massachusetts, Michigan, Minnesota, Mississippi, Montana, Nebraska, New Jersey, New York, North Carolina, North Dakota, Oregon, Pennsylvania, Rhode Island, South Dakota, Utah, Virginia, Washington, West Virginia, and Wisconsin are listed under Unit IV. Connecticut, Florida, North Carolina, and Mississippi do not have separate provider listings since they have not independently approved any additional courses.

Each State accreditation program may have different requirements. For example, New Jersey requires participants of its courses to take the State exam. Therefore, those New Jersey-approved course sponsors who want to provide training in another State must develop their own examination. They must also submit for EPA approval to the Regional Asbestos Coordinator in their Region, a detailed statement about the development of the course examination as required by the Model Plan.

II. EPA Approval of Training Courses

A cumulative list of training courses approved by EPA is included under Unit IV. The examinations for these approved courses under Unit IV have also been approved by EPA. EPA has three categories of course approval: full, contingent, and approved for interim accreditation. As noted in Unit III, interim accreditation is no longer in effect as of July 1990. Each course that had been approved for interim accreditation will show inclusive dates

of this approval. EPA's deadlines for interim accreditation are discussed further in Unit III.

Full approval means EPA has reviewed and found acceptable the course's written submission seeking EPA approval and has conducted an on-site audit and determined that the training course meets or exceeds the Model Plan's training requirements for the relevant discipline.

Contingent approval means the Agency has reviewed the course's written submission seeking EPA approval and found the material to be acceptable (i.e., the written course materials meet or exceed the Model Plan's training course requirements). However, EPA has not yet conducted an on-site audit.

Successful completion of either a fully approved course or a contingently approved course provides full accreditation for course attendees. If EPA subsequently audits a contingently approved course and withdraws approval due to deficiencies discovered during the audit, future course offerings would no longer have EPA approval. However, withdrawal of EPA approval would not affect the accreditation of persons who took previously offered training courses, including the course audited by EPA.

Thus far, EPA has taken formal action to revoke or suspend course approvals in two instances. EPA revoked approval from Living Word College's inspector and management planner training courses offered after May 6, 1988. Living Word College is located in EPA Region VII. In addition, EPA has suspended approval from the Safety Management Institute's training courses and refresher courses for workers, inspectors/management planners, and contractors/supervisors. The effective date for the course suspensions is the first week of October 1989. Safety Management Institute is located in EPA Region III. Certain EPA-approved State programs have also taken actions to suspend or revoke courses within their jurisdictions.

EPA-approved training courses listed under Unit IV are approved on a national basis. EPA has organized Unit IV by EPA Region to assist the public in locating those training courses that are offered nearby. Training courses are listed in the Region where the training course is headquartered. Although several sponsors offer their courses in various locations throughout the United States, a large number of course sponsors provide most of their training within their own Region.

State accreditation programs may have more stringent requirements than

LAM 025648

ABS-029966

does the Model Plan. As a result, some EPA-approved training courses listed under Unit IV may not meet the requirements of a particular State's accreditation program. Sponsors of training courses and persons who have received accreditation should contact individual States to check on accreditation requirements.

A number of training courses offered before EPA issued the Model Plan equaled or exceeded the subsequently issued Model Plan's training course requirements. These courses are listed under Unit IV as being approved. It should be noted that the persons who have successfully completed these courses are fully accredited; they are not only accredited on an interim basis.

III. Phase out of Interim Accreditation

TSCA Title II allowed EPA to accredit persons on an interim basis if they had attended EPA-approved asbestos training before the effective date of the AHERA regulation and passed an asbestos exam. As a result, the Agency approved, on an interim basis, a number of training courses which had been offered prior to the effective date of the AHERA regulation. Only those persons who had taken training courses equivalent to the Model Plan's requirements between January 1, 1985 and December 14, 1987, were considered accredited under these interim provisions. Equivalent means that the courses had to be essentially similar in length and content to the curriculum found in the Model Plan. In addition, an examination had to be essentially equivalent to the examination requirements found in the Model Plan. If no examination was offered at the time, course providers seeking interim approval needed to provide an examination.

Persons who took one of the EPA-approved courses for interim accreditation, and could produce evidence that they had successfully completed the course by passing an examination, were accredited on an interim basis. This accreditation was interim since the person was considered accredited for only 1 year after the date on which the State where the person was employed was required to have established an accreditation program at least as stringent as the EPA Model Plan. TSCA Title II requires States to adopt a contractor accreditation program at least as stringent as the Model Plan within 180 days after the first regular session of the State's legislature convened following the date EPA issued the Model Plan.

The deadline for all States to establish a complete accreditation program was

July 1989. In fact, most States were required to have developed a program by July 1988. As a result, after July 1989, the period of interim accreditation expired for persons in all States but Arkansas, Montana, Nevada, North Carolina, Oregon, Pennsylvania, and Texas. In these seven States, the legislatures meet on a bi-annual basis and last met in January 1989; therefore, persons in these States with interim accreditation lost their interim status in these States after July 1990. Because interim accreditation has now expired in all States, anyone who had previously received interim accreditation is no longer eligible to perform AHERA work unless he or she has subsequently acquired AHERA accreditation by completing an approved course. To receive accreditation, such persons, if they have not already done so, must complete an EPA-approved course or a State course under a State plan at least as stringent as the EPA Model Plan. For example, a person who had interim accreditation as a supervisor would have to take a 4-day supervisor course approved by EPA or an EPA-approved State program to become fully accredited.

IV. List of EPA-Approved State Accreditation Programs and Training Courses

This sixteenth and final cumulative listing of EPA-approved State accreditation programs and training courses follows. As discussed above, notifications of EPA approval of State accreditation programs and EPA approval of training courses will be published in subsequent lists. Quarterly notices will be published in the Federal Register regarding availability of the list. The closing date for the acceptance of submissions to EPA for inclusion in this sixteenth and final notice was July 8, 1991. Omission from this list does not imply disapproval by EPA, nor does the order of the courses reflect priority or quality. The format of the notification lists first the State accreditation programs approved by EPA, followed by EPA-approved training courses grouped by Region. The name, address, phone number, and contact person is provided for each training provider followed by the courses and type of course approval (i.e., full, contingent, or for interim purposes).

As of July 8, 1991, a total of 598 EPA-approved training providers are offering 1,178 training courses for accreditation under TSCA Title II. There are 507 asbestos abatement worker courses, 397 contractor/supervisor courses, 209 inspector/management planner courses, 18 inspector-only courses, and 47 project

designer courses. In addition, EPA has approved 774 refresher courses.

Thirty-two States currently have EPA-approved State accreditation programs in one or more disciplines. These State programs have approved a total of 985 courses, including 496 worker courses, 346 contractor/supervisor courses, 24 inspector-only courses, 90 inspector/management planner courses and 29 project designer courses. In addition, these State programs have approved 762 refresher courses. It should be noted that certain training course providers may have course approval in more than one State; therefore, there may be some double-counting of these courses reflected in the above numbers.

An EPA-funded model course for inspectors and management planners is available for use by training providers. In addition, an earlier EPA-developed course for asbestos abatement contractors and supervisors has been revised and is also available, as is a model worker course. A fee for each course will be charged to cover the reproduction and shipping costs for the written and visual aid materials. Interested parties should contact the following firm to receive copies of the training courses: ATLIS Federal Services, Inc., EPA AHERA Program, 6011 Executive Blvd., Rockville, MD 20852, Phone number: (301) 468-1916.

The following is the cumulative list of EPA-approved State accreditation programs and training courses:
