G. A. Hippe
A. E. Leisy

Alice

hold for a "just in case situation"

TO: W. C. Engman

The attached memo was prepared as an "in hand" document that could be passed to the federal authorities in the event we were asked, "What have you done at WGK in the past to control PCB entrances into the environment."

I have reviewed with Jim Savage and he says okay.

Paul Hodges is on vacation but Des Hosmer is reviewing.

Bill Papageorge is out of town and has not reviewed.

I gave a copy to Phocion Park, Senior Attorney, MICC, and discussed this with him. He needs more time to review and will pass up the line for additional review. He wants Wink Corey to be knowledgeable and be in agreement. This will take from one to two weeks.

In the mean-time he suggests that any comments that would have to be made to outsiders should be made through Ed John, MICC Public Relations. Comments to federal authorities should be restricted to Bill Papageorge until our document is approved.
