You will be sent copies of one or the other of the subject new formulas for Y-2251. The "C-1" does not contain mildewcide, and the "C-2" does contain mildewcide.

Work has been completed on the development of this formula to make it lead-free. Cost savings are in the area of 21 cents per gallon.

The new formula is being scaled up in Chicago and, as soon as the test results are available from the first production batch, the new formulas will be sent out. In the meantime, purchasing agents should carefully watch their stocks of W-423 because of its reduced movement as a result of this change.

Thixo alkyd has also been added to this new formula, as well as a change to the new high concentration dryers.

Label information will be sent to you along with the formula cards.
