PLAINTIFF'S EXHIBIT

MON-1189

The Plant Services Department will take the following actions
to maintain our safety effort at a high level:

1. Discuss with all supervision the hazards of reduced attention during this season of the year and from what is going on in the plant. Encourage all to double effort in making observations. To be alert to peoples' actions and to carefully discuss safety with their people.
2. Supervision will discuss, through personal contact, with all hourly personnel the potential of the above hazards and encourage them to be aware of "how to do each job safely."
