

March 28, 1973

Mr. Lauren W. Choate
General Manager
Interpace Corporation
Mountain View Drive
Willsboro, New York 12996

Dear Lauren:

During your visit on March 15 you asked that we provide you with a letter regarding our intended use of your Wollastonite fiber.

Currently, we need approximately 850 tons per month of the F-1 Grade, and our best estimate is that this will increase to 1,000 tons per month in 1974, and will thereafter grow by approximately 20% per annum.

We foresee no change of plans for the next three or four years which would reduce our need for this material, and in fact we believe it is possible that our demand could be substantially greater than the above figures indicate. For this reason we hope that the Interpace Corporation will vigorously expedite the current expansion program, and will take whatever steps are necessary to see that our increasing demands for this material are fully met.

Sincerely,

POSECO, INC.

Frank S. Bilton

Director of Purchases
