To Division Managers:

Dear Sir:

This is to inform you that a representative of the medical staff of the Ethyl Gasoline Corporation is starting his regular visit into your territory. It is highly important that every member of the Ethyl Gasoline field staff should be examined at the time of this trip, except as some plan has been made for this examination at another date. It is our purpose to see that each of these men is examined once annually. This refers to any and all persons including the district manager, whose work in any way entails exposure to Ethyl Fluid. Dr. will be in on or about . Will you be good enough to make such arrangements with your men as will make it possible for him to see them?

Very truly yours,
