mill...

and produce our own asbestos products

We mine...

test...

That's quality control!

Ruberoid operates a completely integrated asbestos operation. So we can control quality all the way from the mine to the finished product. When our asbestos corrugated siding, for instance, finally makes it to the construction site, it's been through the mill in more ways than one. We've given it test after test at each stage to assure that it's top notch. Remember, too, Ruberoid offers a complete line of chrysotile fibers for use in electrolytic cells, compressed sheets, brake linings, gaskets, plastics, shingle stock, asbestos papers, insulation cement, floor tile and phenolic molding compounds.

Need assured quality in asbestos? Call or write Ruberoid.
