Subject: Chemicals Strategy for Sustainability

Dear [redacted],

We understand that the Commission is in the process of reviewing its draft on the upcoming Chemical Strategy for Sustainability.
As the European Association for Soaps and Detergents, we have a strong interest in the matter. We would be interested in understanding the perspective from DG SANTE, when it comes to its overall objectives, but also in relation to the future of biocidal products. Our industry has been very active over the past few months adapting its processes and engaging with authorities to provide European citizens with cleaning products and disinfectants. We believe the ongoing public health crisis should be considered in this context.

Would it be possible to organise a short exchange (30 min) before 9 July with our Director General?
Many thanks for your consideration.
Kind regards,
