Subject: Follow up meeting question from today.

Ryan,

I totally forgot to ask you this question before I left today. I completely understand if you do not know or cannot answer this question but I was wondering if you have any idea if a decision has been made at EPA relative to Navajo Nation Abandoned Uranium Mine program out of Region 9. It is funded through the Tronox settlement and EPA is the Trustee. EPA put out an RFP some time ago and word has it they have finally decided but have not told anyone yet. I know you cannot tell me who has been awarded the contract/contracts but is there a way to find out if a decision has been made or if they are still deciding. I have been asked this by two different groups.

Thanks again for meeting with us today.

Best

Tom Medaglia
