Subject: Draft first BE input on the Universal PFAS restriction Public Consultation

Dear colleagues,

In preparation of the next meeting of the CCIM PFAS working group you can find in the annex a first draft Belgian comment to the Public Consultation of the Universal PFAS restriction.
It is important to note that this first comment is mainly a compilation of newly generated information and data from Belgian authorities, and not in any way a first position of Belgium on this restriction.

We would like to invite you to give feedback on this comment, and more importantly, to check whether there is any additional information or data that you could share at this stage. Note that it is also possible to send in confidential input, so in case you would like to share info via this route then please let me know so we can have a look.
Furthermore I would like to invite you to have a specific look at the end of the document to the specific information requests that have been identified. For some questions I have identified some of you that might be able to provide some additional info/data.

Don't hesitate to send in any info/data/feedback on this first draft by **18/04 COB**, we can then discuss and try to finalize this first comment during the meeting of 19/04.

Many thanks for all your input!

Kind regards,

Pieter Luys
