

Your Partners

The professional painter and pure lead paint have saved homes by the thousands. Make them your partners.

YOU can make your home safe against the elements simply by employing two partners. One is the professional painter. His skill assures the proper mixing and application of the paint. The other is pure lead paint—the standard for generations... the choice of skilled painters everywhere.

For lasting, economical protection, get these two partners on the job. Your own skilled painter will tell you how lead paint made with Dutch Boy white-lead has for years guarded homes like yours. This paint does not crack and scale. When repainting time eventually comes, there is no old, scaly paint to be burned or scraped off—a job which sometimes

costs as much as the actual repainting itself.

Mixed for each job

Dutch Boy white-lead, in either heavy paste or soft paste form, is sold by leading paint dealers.

Mixed with linseed oil, it produces a superior gloss paint for exterior use. Mixed with Dutch Boy flattening oil, it makes a thoroughly washable flat paint for interiors. In either case, the paint can be colored to exactly the tint or shade you desire.

Free to property-owners

Write our nearest office for the booklet "The House We Live In." It tells important facts about painting; also how to select colors for exterior and interior work.

White Lead in NEW FORM
Dutch Boy soft paste white-lead, a new product, thins to brushing consistency at the rate of a gallon of paint a minute. It is wonderfully easy to use. Painters and other paint buyers: See your dealer about this remarkable product.

This trademark, a guarantee of high quality, is on all Dutch Boy products—white-lead, red-lead, linseed oil, flattening oil, solder, bab-bitt metal. It is the trademark of National Lead Company which manufactures lead products for the hundreds of uses for which lead is especially fitted in art, industry and daily life.
