

1           A     I do.

2           Q     You mentioned a few minutes ago about the  
3     number of cases you saw in the Bremerton area?

4           A     Correct.

5           Q     About how many have you seen in that area?

6           A     Since I have been in Bremerton, I worked  
7     there now going on the 7th year, and I have seen close  
8     to about 90, 100 cases.

9           Q     How many of those cases in your opinion,  
10    Dr. Hammar, were asbestos related?

11          A     100 percent of them were.

12          Q     100 percent?

13          A     Yes.

14          Q     Is mesothelioma a common tumor in humans?

15          A     Extremely uncommon.

16          Q     What is the rate of mesothelioma in the  
17    general population?

18          A     The current studies indicate, and this would  
19    depend a little bit where you took your sample from,  
20    but if you just looked at the general population of  
21    the United States, and looked at what the incidence
