## GYPSUM PRODUCTS SPECIFICATION DIRECTORY

### MISCELLANEOUS PRODUCTS

| BRAND       | PRODUCT                | ASTM STANDARDS | FEDERAL SPEC.         | APPLIED UNDER |
|-------------|------------------------|----------------|-----------------------|---------------|
| GP/BESTWALL | JOINT SYSTEM MATERIALS | C 475-64       | SS-J-570a<br>10/24/66 | ASA A97.1     |

Any question not answered by the information on this sheet or available from local sources should be referred to the General Sales Office. Be sure to give all information as to issuing office, date of specification, job description, location, enforcing party, product involved, description of use if other than normal, amount involved, etc. This is particularly important when special limitations under standard specifications are involved.

Gypsum Division field locations have a book of applicable Federal and ASTM Specifications. Each Specification is preceded with a detailed analysis prepared by the Laboratory of which GP/Bestwall products meet the specification and any limitations. The Local Sales Office is authorized to write a letter of certification in accordance with the Laboratory analysis.
