confident, wouldn't you, that by the time Mr. Wood and Mr. Butler got to the post office, those old vehicles that they were working on probably didn't have their original brakes?

A Oh, yeah, yeah. We are talking about the age range of the old model As was -- model As were built late '20s to early '30s.

Q I think they said they had a range between '28 and '32, something like that?

A Yes. That would be right. So that is what, 16 years. That is minimum.

Q Okay. I would like next to ask you a couple of questions about the properties of asbestos as they stay in the air.

We talked about this at your deposition, and you have testified about it today.

Is there anything about the work environment of a garage that would affect once an asbestos fiber got to the ground its ability to go back in the air?

A No. You know, garage is rough and greasy and it got oil on the floor from time to time.
