Hi,

FAO: [REDACTED]

We recently attended a workshop by AECOM where they mentioned they have written an internal guidance document for the EA on PFAS and had undertaken some catchment sampling for PFAS. These documents would be useful context for us and for developing sampling methodology, particularly for our background river samples. Please could you share these documents with us:

Env. Agency River Sampling (for the EA's increasing database of PFAS in surface and groundwater)

- Systematic river sampling of three catchments
- Area reconnaissance, stringent QA/QC, sampling and factual reporting

Env. Agency Phase 4 Guidance (internal EA guidance)

- Literature review and expert elicitation of global PFAS management
- Literature review report and Phase 4 guidance

Kind regards,

[REDACTED]

AGC Chemicals Europe, Ltd.
