

January 24, 1946

Professor Philip Drinker
55 Shattuck Street
Boston 15, Massachusetts

Dear Phil:

Thank you for the copy of your letter of January 21 to Allen Brandt and the enclosures therewith. Since I have not received the questionnaire to which you refer, I cannot intelligently respond. This may be due to wrong addressing, though all of my mail sent to 23 Joy Street, Boston, seems to be very promptly forwarded. I am sending a copy of this to Dr. Elkins, so that if anything is delayed there he can straighten it out. As soon as I have the necessary information, you will hear from me further.

Answering your "humble prayer" with regard to new addresses, my impression has been that the fact that I am now here is fairly generally known. For the benefit of those receiving a copy of this letter, "here" is The Saranac Laboratory, 7 Church Street, Saranac Lake, New York. My home address is One Birch Street in the same municipality. Needless to say, though missing their former Boston surroundings, the Bowditches are thoroughly sold on their new environment.

Sincerely yours,

Manfred Bowditch
Field Director
