J. G. Bryant - New York

CONTACTED: Gene Riall - Mgr. Compressors Station Operation (by phone)

OBJECTIVE: Determine status of Turbinol 1122 trial.

RESULTS: Turbinol 1122: The hydraulic fluid change our program here is proceeding as planned. Riall said Texas Eastern would still like to change out to turbines prior to the normal maintenance program which begins June 1. He said Turbinol 1122 is a part of that program. One delay that T-E is experiencing is delay in delivery of parts needed for the change over to Turbinol 153. Once the pump impellers and other parts are received, the change over date of the two turbines previously mentioned can be established and hydraulic fluid can be ordered. I stressed the importance of ordering Turbinol 1122 with as much lead time as possible, and Gene said he thought he would be able to give us as much as two weeks lead time.

Because I am not completely satisfied by Rialls comments regarding 1122, I will be making an indepth call in Shreveport in the next week to 10 days.

FUTURE ACTION: JGF- Call at T-E by April 7.
