PRODUCTS—A very complete line of compressed air operated and self-operating temperature, humidity and air flow controls for automatically regulating heating, cooling, ventilating and air conditioning systems and industrial processes.

A complete line of self-operating and compressed air operated valves and regulators made for: Control-

ling steam heated hot water heaters and submerged type heaters; and for automatically mixing hot and cold water or steam and cold water delivering a mixture at a pre-temperature. Dial and Recording Thermometer-Regulators. e steam traps and pres- valves.

Powers Compressed Air Operated Apparatus

Compressed Air Operated Apparatus—Continued

Three of the Many Types of Powers Self-Operating Regulators

POWERS ENGINEERING SERVICE

As the accurate performance of a heating, cooling, ventilating or an air conditioning system, or an industrial process is so dependent upon its automatic control equipment, and as the cost of such control is but a fraction of the entire system, the use of the proper type of regulation is always sound economy.

To secure the maximum return on the investment in automatic control equipment, it is exceedingly important that proper selection of control apparatus be made

| when each installation is being planned.

Forty-nine years of experience in furnishing and installing temperature and humidity control for every conceivable purpose in all types of buildings have given us a wealth of experience from which you can draw in selecting the proper type of control for any purpose.
