REPLY TO SAN FRANCISCO OFFICE

July 8, 1932

Dr. Robert A. Kehoe
College of Medicine
University of Cincinnati
Cincinnati, Ohio

Dear Doctor:

At the suggestion of the Ethyl Corporation, we are writing you regarding the Bullard Gas Mask and are sending you under separate head our complete catalog showing the new development in facepieces, which gives greater comfort and efficiency.

We have for a number of years supplied the large petroleum companies with their gas mask equipment, having specialized in safety equipment and gas mask work since 1915. This new development of the facepiece however, has only been on the market for the past four months.

We are quite anxious to get the approval of the Ethyl Corporation on our facepiece particularly, and would be more than pleased to forward you a complete facepiece or a complete mask if you desire, for any tests you would like to run so that our mask will be on the approved list of the Ethyl Corporation.

Would you be kind enough to let us know what type of mask you want, whether complete or in part, and we will see that it goes forward to you promptly.

Yours very truly,

E. D. BULLARD COMPANY

E. W. BULLARD
President
