Hi,

“Hydrofluorocarbons act as safe propellants to aerosolize the active pharmaceutical ingredients (API) and ensure the delivery of the medicine to the lungs”

Zie bijlage voor meer info. (en om ons voor te bereiden op hun komst 😊)

Hieruit blijkt dat PFAS in een hele range in de pharma industrie wordt gebruikt:

- 1) Active Pharmaceutical Ingredients
- 2) Starting Materials and Chemical Intermediates
- 3) Auxiliaries and Production Material
- 4) Synthetic and Analytical Reagents
- 5) Primary Packaging Materials
- 6) Medical Devices

Groetjes,

■■■■■

Onderwerp: RE: Meeting request – Zoetis Europe

Bonjour ■■■■■,

Non je n'ai pas de connaissance de ça. C'est possible que des F-gasses sont présent, mais je n'ai pas sûr.

There are PFAS present in some human pharmaceuticals so maybe something like this?
It would nonetheless be interesting to have them present something for more info.

Cheers,

Van: [REDACTED] (SPF Santé Publique - FOD Volksgezondheid) <[REDACTED]@health.fgov.be>

Onderwerp: RE: Meeting request – Zoetis Europe

Savez-vous s'il s'agit de PFAS dans des aérosols qui sont directement inhalés par les animaux ?

Moesten ze een meeting willen plannen, ben ik wel geïnteresseerd om mee te volgen. Een paar maanden geleden heb ik een AfA dossier van hun behandeld.

Dear ██████████,

Thank you for your email and all the information you provided.

Given the high complexity and technicality of this dossier and the fact that it is not a legislative dossier as such, I kindly ask you to address your request to our Belgian Reach Committee (the contact address is copied in this e-mail). You will have the opportunity, with the agreement of the Chair, to present your industry and your opinion/concerns in front of a panel of experts (which I think is more interesting).

Best regards,

██████████

Objet : Meeting request – Zoetis Europe

Dear Mr. ██████████,

I hope you are well.

I am writing to request a meeting the week of 7 November or thereafter to discuss an important regulatory issue that will significantly impact on innovation and the competitiveness of the European animal health sector, and on production of leading veterinary medicine products in Belgium.

Member State regulators and the European Commission are planning to restrict the use of per- and polyfluoroalkyl (PFAS) substances in most products. The restriction proposal will come soon and will have serious impacts on the animal health sector. A ban on PFAS use would remove best-in-class animal medicines from the EU market and restrict the availability of inhalation anaesthetics that are used in complex surgeries in humans and animals. A restriction would also affect manufacturing of animal health products in Europe for local use and for export. It would also restrict the ability to meet the objectives of the EU Pharmaceutical Strategy.

We would appreciate the opportunity to sit down with you to discuss Zoetis' role as a global market leader in animal medicines innovation, and outline how veterinary medicinal products and industrial emissions from production in our

██████████ (██████████ ██████████ at Zoetis and ██████████ in the AnimalHealthEurope Working Group on PFAS) and I would join the meeting.

With kind regards,

zoetis
