INSPECTION PROCEDURE FOR CHECKING FLY CUTTER MACHINE NO. 724

1. Look at Tally Card for Factory Standard, Part Number, Size and Gauge, Type of Material.

2. Check Coil of Material at rear of machine for correct width damaged edges, tears etc., because of poor handling.

3. When material has been set into machine to be cut, check the gauge.

4. Make sure machine is set to cut material to size shown on Tally Card.

5. After a few sheets are cut, measure for length and width, also check gauge, look for hard spots etc.
