Totally off-the-record, first he had to approve your release language, LOL. Now, we can proceed to next level of engagement: getting you a quote.

This may take some doing.

James Marshall Crotty
Director of Communications
US Congressman Jeff Fortenberry (R-NE)

Scratch that. Found your original attachment and sent to DC.

Stand by.

Hi Michael:

Can you send the latest draft of the release here to this email?

Tx.

JC

Hey Jim had a Nebraska related press release come up to be sent out nationally later this week. Wanted to see if Congressman Fortenberry would like to add a quote in favor of the grant which should benefit the state in a variety of ways. I attached a draft of the

press release above for you to run by the Congressman and help with drafting the quote. (Ignore the dates as this got pushed back to 2018.)
Feel free to call or email back if you have any questions.

Here are some sample quote from other press releases put out in the past year with Congressional members.

“These grants are great news. Clean air is not only important for public health and our quality of life in Palm Beach, but it’s critical to our tourism economy as well. As a member of the bipartisan Climate Solutions Caucus, I remain committed to strengthening efforts to protect our air quality,” **said U.S. Representative Brian Mast (FL-18).**

<https://www.epa.gov/newsreleases/epa-awards-palm-beach-county-florida-133135-reduce-air-pollution>

"These Brownfields grants are welcome news for our communities in Oxford, Kennebec, Waldo and Somerset counties and will help lay the groundwork for economic development, more jobs and continued stewardship of Maine's environment," **said Congressman Poliquin.** "I applaud the EPA for this important support and I will continue to push for sensible environmental policies, which are critical not only to our health and recreation, but also for job creation in our State."

“This grant award is a win-win for our community, as it trains unemployed and underemployed area residents for meaningful well-paying jobs that will have a lasting impact on our community by helping to improve our environment,” **said U.S. Rep. Al Lawson (FL-5).** Florida State College at Jacksonville is well suited to perform this important work. I look forward to working them on this important project.”
