White Plains, NY 10604

Dear Ed:

As we have discussed, below are the approximate numbers of people to be tested, by location and month, for "periodic exams" as defined in the enclosure.

Aberdeen Chemical Plant

Month: July

123 People to receive VCM physicals (Attachment I)
56 people to receive lead physicals
179 people approximate total (72 of the 123 will receive both)

This would take approximately three days to cover all shifts.

Baltimore Chemical Plant

Month: November

Approximately 100 people to receive urinary phenols and blood work.
(Attachment II)

This could be done in two days time and cover all shifts.

Lake Charles VCM Plant

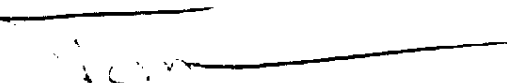

Month: October

Approximately 80 people to receive VCM physicals.

This could be done in two days and cover all shifts.

The attachments referred to are those in the enclosure. No protocols are there for the lead exams but I believe it only involves blood work. I will get this information from Dr. Massad. Once you have reviewed this information, please call and we can discuss further details of doing these periodic exams with your people.

Sincerely,

Thomas G. Grumbles, Director
Industrial Hygiene
