RETIRED EMPLOYEES' NOTIFICATION
OF X-RAY FINDINGS

JOINT MEMORANDUM

Mr. R. J. Fischbach ✓
Mr. J. C. Grant
Dr. H. Herman
Mr. J. V. Leaphart
Mr. J. E. Tuohy

In September 1981, Texaco's Eagle Point Plant reached a Settlement Agreement with OSHA concerning certain chest X-ray findings and their possible relation to past asbestos exposure. Eagle Point's Health Division was also required to review their chest X-ray reports for the preceding five (5) years for the presence of these findings.

As a result of this review, four retired employees were identified whose chest X-ray reports were included in this group. Because we are uncertain whether or not the results were previously made known to these employees, I propose to advise them using a letter similar to the enclosed draft. I would appreciate your review of the attachment and your prompt advice of any changes, corrections or additions which may be indicated.

DRAFT

Dear _____:

The Occupational Safety and Health Agency (OSHA) recently requested a review of all chest X-rays taken at Eagle Point Plant for the last five years. The purpose of this was to determine the presence of a variety of X-ray findings which might be related to asbestos exposure in the past.

Your chest X-ray report, dated _____, was one of those reviewed. Because we are uncertain as to whether or not the Plant doctor at that time advised you of the findings, I am sending you a copy of the report for discussion with your personal physician. Should you or he require additional information, please let me know or contact Harold Herman at Eagle Point Plant.

Yours very truly,

WA-TEX 005740
