Dear Dr. Keho:

I am a friend of Mr. Charles Keller, president of the Richardson Company, in Chicago, and we manufacture and produce under license in Australia.

I was talking to Charles Keller last week about various aspects of the battery business, I am also a storage battery manufacturer, and mentioned that I could find very little information in the United States relating to lead poisoning, its effects, diagnosis, and cures.

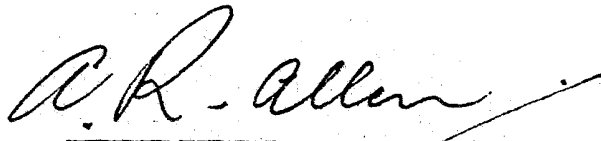

Charles mentioned that you were an old friend of his and that he remembered seeing an article in your magazine "NEWS WEEK" having relation to a new cure you were developing for the poisoning, and he suggested that I write you and see if you would have anything that would be of interest to me.

I am returning to Australia within the next two weeks and will be moving around rapidly, so if it would not be too much trouble I would greatly appreciate if you would write me at the Biltmore Hotel, in Los Angeles, where I will be staying from the 12th to the 15th of October.

I trust that I am not presuming too much on your time but I am very very interested in the above subject.

Yours truly,

VESTA BATTERY CO. PTY. LTD.

Managing Director
