Patricia H. Travers, R.N., M.S.
Occupational Health Specialist
Boston University Medical Center
Department of Neurology
80 East Concord Street
Boston, Massachusetts 02118

Dear Ms. Travers:

I sincerely hope that you enjoyed the holiday season
and I wish you a very happy and healthy New Year.

In answer to your question regarding the tables that
summarize urine and blood lead levels for each of the
subjects, there are quite a few. They will be published
when Dr. Kehoe's book is completed on this study.

Dr. Kehoe wishes me to convey this to you concerning the
Subject, Ivan Ferneau. He is one of the most important
subjects because he was administered the largest dose of
lead of all the subjects in the study. The dosage was
stopped when Dr. Kehoe considered it to be potentially
dangerous.

Once again I extend best wishes for a happy New Year to
both you and Dr. Feldman.

Sincerely,

Mary D. Isenhour
Sec'y/Robert A. Kehoe, M.D.
