

ABI, Inc.

To: W. Clark May 7, 1988
From: D. R. McCloskey Memo

Safety Meeting for April, 1988

The movie entitled "Construction Hazard Communications" was shown to ABI employees. The speaker talked about looking out for Number One. The safety steps that should be taken on different types of jobs are use all personal safety protective equipment, watch out for changing conditions, bad weather, and know the locations or area. Employees must work safely together. The speaker discussed the "M.S.D.S." (Material Safety Data Sheet) and the four hazardous factors; flammable, corrosive, toxic, and reactive. Use the correct respirator when working with toxic vapors. You should always be cautious of falling, slipping, or flying objects.

Things That Were Discussed

- Good housekeeping around the job site.
- Safety showers and eye wash locations.
- Hot weather and working conditions.
- Personal safety protective equipment.
