CUMULATIVE INDEX TO TEXT AND BOOK REVIEWS

In the indexing of authors' names, the following—and names of a similar nature—are arranged as if spelled alike: Abbot—Abbott; Clark—Clarke; Douglas—Douglass; Heiman—Heimann; and names beginning Mc and Mac are all arranged as if spelled Mac.

Asterisk denotes Book Reviews

***Abrasive** wheels, safe installation and use (International Labor Office), 27: 36, 1945

***Absenteeism**, sickness absence and labor wastage. I. Measurement and incidence in light work (Smith, Leiper and Culpin). II. Labor wastage (Greenwood and Smith), 18: 581, 1936

***Accident** prevention in construction, manual (Assoc. General Contractors of America, Accident Prevention Com.), 22: 51, 1940

***statistics**, manual on (Kossoris), 22: 379, 1940

***Accidents** and diseases, industrial, from chemical action (Berger), 18: 368, 1936

***and** their prevention (Vernon), 19: 108, 1937

***electrical**, fatal, electric current strength in (von Holstein-Rathlou), 18: 468, 1936

***industrial**, Seventh International Congress of Occupational Accidents and Diseases, Brussels, July, 1935, 18: 130, 1936

***occupational**, prevention of (Judson and Brown), 27: 121, 1945

***Accidental** injuries; medico-legal aspects of compensation (Kessler), 23: 412, 1941

Acetic acids, chloracetic, dichloracetic and trichloracetic, acute oral toxicity of (Woodard, Lange, Nelson and Calvery), 23: 78, 1941

Acetone-methanol; health hazards in manufacture of "fused collars", II. Exposure to (Greenburg, Mayers, Goldwater and Burke), 20: 148, 1938

methylalcohol and their mixtures, relative toxicity of. I. (Sklianskaia, Urieva and Mashbitz), 18: 106, 1936

methylalcohol and their mixtures, relative toxicity of. II. Their action on white mice (Mashbitz, Sklianskaia and Urieva), 18: 117, 1936

physiological principles governing action of, with determination of toxicity (Haggard, Greenberg and Turner), 26: 133, 1944

Acetylene, oxy-, cutting of painted structural steel, plumbism resulting from (Tabershaw, Ruotolo and Gleason), 25: 189, 1943

toxicology of welding (Wirtschafter and Schwartz), 18: 158, 1936

Acne *see* **Skin diseases**

Acrylonitrile, toxicology of. *I. A study of the acute toxicity* (Dudley and Neal), 24: 27, 1942

II. Studies of effects of daily inhalation (Dudley, Sweeney and Miller), 24: 255, 1942

III. Determination of thiocyanates in blood and urine (Lawton, Sweeney and Dudley), 25: 13, 1943

Adams, E. M., Spencer, H. C. and Irish, D. D.: The acute vapor toxicity of allyl chloride, 22: 79, 1940

see **Irish, D. D.**, 22: 218, 1940; 23: 408, 1941

see **Rowe, V. K.**, 25: 348, 1943

see **Spencer, H. C.**, 24: 295, 1942

Adhesive tape, hypersensitivity to. Report of cases and etiology (*Keil*), 25: 238, 1943

***Adjustment** guide: standard body parts (Insurance Statistical Service of North America), 24: 163, 1942

Aerosol-OT, chronic toxicity of (Benaglia, Robinson, Utley and Cleverdon), 25: 175, 1943

Aging, problems of, request for information (U. S. Pub. Health Service), 23: 50, 1941

Air, bacterial contamination in textile mills; special reference to artificial humidification (Wells and Riley), 19: 513, 1937

Air-borne infection (Chope and Smillie), 18: 780, 1936

***infection** (O'Hara), 25: 422, 1943

solids, filter paper spot sampling (Tebbens), 27: 292, 1945

Air conditioning *see also* **Ventilation**

***(Fuller)**, 21: 27, 1939

air currents and drafts as factors in (MacLean and Partridge), 19: 562, 1937

***analysis**, with psychrometric charts and tables (Goodman), 25: 197, 1943

***artificial** climate and human environment (Breuer and Schmidt), 19: 187, 1937

***controlled** humidity in industry (Marsh), 18: 369, 1936

***engineering** and refrigeration (Raber and Hutchinson), 27: 182, 1945

***heating** and (Allen and Walker), 18: 90, 1936; 22: 50, 1940

***heating** and ventilating (Dalzell and Hubbard), 20: 591, 1938

hospital (Yaglou), 18: 741, 1936

in normal life (Drinker), 18: 767, 1936

***manual**, Trane Company (Goodman), 20: 495, 1938

seasonal changes in body's response to ventilative conditions (MacLean and Partridge), 22: 244, 1940

Air conditions in industry, effects on workers and methods of control (Yaglou), 19: 12, 1937

Air flow, heated thermometer anemometer (Yaglou), 20: 497, 1938

***Air Hygiene Foundation of America, Inc.**, Proceedings of special meeting, 20: 267, 1938

Silicosis and allied disorders, 19: 346, 1937

Air of textile mills, bacterial contamination and influence of humidification (Wells and Riley), 19: 513, 1937

purification in inhabited rooms by spraying hypochlorites (Masterman), 20: 278, 1938

sampling unit for contaminants, use of exposed worker as (*Silverman and Drinker*), 27: 22, 1945

sterilization, introduction of glycols by new vaporization method (Bigg and Jennings), 26: 307, 1944

travel, medical problems of (Heim), 24: 109, 1942

velocity and cooling power, calculation from katathermometer readings (Vincent), 19: 571, 1937

Alcohols, amyl, and their ketones; metabolic fates and comparative toxicities (Haggard, Miller and Greenberg), 27: 1, 1945

***Alden, John L.**: Design of industrial exhaust systems for dust and fume removal, 21: 152, 1939

Alexander, Leo: Clinical and neuropathological aspects of electrical injuries, 20: 191, 1938

Clinical neuropathological aspects of electrical injuries, 20: 191, 1938

see **Weeks, Arthur W.**, 21: 517, 1939

Allavdin, N. and Peregood, E.: Lead content in the duodenal juice in cases of saturnism, preliminary report, 18: 139, 1936

*Allen, John R. and Walker, James H.: Heating and air conditioning. 4th edition, 18: 90, 1936; 5th edition, 22: 50, 1940

Allergy and neoplasia with special reference to occupational tumor formation (Hueper), 18: 140, 1936
*essentials of (Criep), 27: 181, 1945
*of nose and paranasal sinuses (Hansel), 18: 469, 1936

Allyl chloride, acute vapor toxicity of (Adams, Spencer and Irish), 22: 79, 1940

Alpers, B. J. *see* Lewey, F. H., 23: 415, 1941

*Altitude, life, heat and (Dill), 20: 590, 1938

Alumina dust, health hazard of group of workers exposed to (Sutherland, Meiklejohn and Price), 19: 312, 1937

Aluminum dust, case of bronchial asthma due to (Cotter), 25: 421, 1943
therapy in silicosis, experimental study (Gardner, Dworski and Delahant), 26: 211, 1944

Ambrose, Anthony M.: Studies on the physiological effects of sulfamic acid and ammonium sulfamate, 25: 26, 1943

*American Foundrymen's Association: Code of recommended good practices for metal cleaning sanitation, 22: 51, 1940
*Tentative recommended good practice code and handbook on the fundamentals of design, construction, operation and maintenance of exhaust systems, 20: 494, 1938

*American Public Health Association: Methods for determining lead in air and in biological materials (Report of Committee on Ventilation and Atmospheric Pollution, 1944), 27: 120, 1945
*Occupational lead exposure and lead poisoning (Report of Committee on Lead Poisoning, 1943), 26: 131, 1944
*Yearbook, 1936-37, 19: 280, 1937

Amides, n-isobutyl, of aliphatic acids, toxicological studies (Deichmann-Gruebler), 21: 48, 1939

Ammonia gas poisoning, experimental, in rabbits and cats (Boyd, MacLachlan and Perry), 26: 29, 1944

Ammonium picrate, studies of effects on man and experimental animals (Sunderman, Weidman and Batson), 27: 241, 1945

Ammonium sulfamate and sulfamic acid, studies on the physiological effects of (Ambrose), 25: 26, 1943

*Amor, Arthur J.: An X-ray atlas of silicosis, 23: 455, 1941

*Analysis, colorimetric methods. I. Inorganic (Snell and Snell), 18: 338, 1936
*colorimetric methods. II. Organic and biological (Snell and Snell), 20: 94, 1938
*volumetric. Vol. I. (Kolthoff and Stenger), 24: 293, 1942

Anderson, R. L.: The effect of certain impingement dust sampling instruments on the dust particles, 21: 39, 1939

Andreeva, E. C. *see* Vigdortschik, N. A., 19: 469, 1937

Anemia, aplastic (Meyer and Ginsberg), 24: 37, 1942
granulopenic, and toxic encephalopathy from volatile solvents, two cases (Parsons and Parsons), 20: 124, 1938
toxic (Browning), 25: 124, 1943

Anemometer, heated thermometer (Yaglou), 20: 497, 1938

Angus, T. C. and Stewart, Donald: Dust hazards and their control in a ceramic industry, 19: 58, 1937

Aniline cancer, experimental investigation of (Berenblum and Bonser), 19: 86, 1937
intoxication, acute experimental (Clark, Van Loon and Morrissey), 25: 1, 1943
tumors, experimental investigation on etiology (Hueper, Briggs and Wolfe), 20: 85, 1938

Annetts, May and Leitch, John D.: The effect of various physical factors on the counting of silica dust suspended in water, 18: 98, 1936

Anoxia, acute, in silicosis and heart disease, respiratory and circulatory adaptation to (Seevers, Enzer and Becker), 20: 593, 1938

Anthracene and chrysene, possible carcinogenic effect. I. Effect of painting on the skin of mice (Pollia), 21: 219, 1939
possible carcinogenic effect. II. Effect of subcutaneous injection in rats (Pollia), 23: 449, 1941

Anthraco-silicosis *see* Silicosis, anthraco-

Anthrax infection, prevention of, in woolen textile processing (Macdonald), 18: 357, 1936
symposium on (Pennsylvania Dept. of Health; Fulton, compiler), 24: 210, 1942

Antimony trioxide, inhaled, animal studies on the toxicity of (Dernehl, Nau and Sweets), 27: 256, 1945

Apple, ability to counteract toxic effects of lead and arsenic (Manville), 22: 36, 1940

Arc welding *see* Welding

Arieff, Alex J. *see* Rubin, Henry H., 27: 123, 1945

Armstrong, D. W. and Brackett, F. S.: Spectroscopic analysis of biological fluids for heavy metals, 21: 448, 1939

*Armstrong, Harry G.: Principles and practice of aviation medicine, 22: 87, 1940

*Arnaoutov, G. *see* Gelman, I., 18: 466, 1936

Arsenate of lead, how toxic is? (Cardiff), 22: 333, 1940

Arsenic and lead, ability of the apple or its constituents to counteract toxic effects of (Manville, Reithel, Yamada, Spencer and Richardson), 22: 36, 1940
in tobacco smoke, determined by a rapid titrimetric method, concentration of (Thomas and Collier), 27: 201, 1945
*presence of, in Reichenstein, and Reichenstein disease (Kathe), 20: 266, 1938

Arsine poisoning, chronic, among workers employed in cyanide extraction of gold; 14 cases (Bulmer, Rothwell, Polack and Stewart), 22: 111, 1940

Asbestos dust, survey of employees exposed to (McPheeters), 18: 229, 1936

*Asbestosis and silicosis (Lanza), 21: 56, 1939
*in manufacture of asbestos, study of (Vighiani), 23: 90, 1941
*of the lungs, roentgenological atlas of (Saupe), 21: 103, 1939
*pulmonary, clinical aspects of, serial examinations (Wedler), 21: 319, 1939
pulmonary: incidence and prognosis (Donnelly), 18: 222, 1936
survey of employees exposed to asbestos dust (McPheeters), 18: 229, 1936

Ascher, L.: Influence of working hours upon health of the worker, 18: 211, 1936

*Aschoff, L.: Dust elimination from lungs, 18: 793, 1936

Ashe, William F.: Industrial lead poisoning as a clinical syndrome, 25: 55, 1943
see Eichna, Ludwig W., 27: 59, 1945

*Aslett, E. A., *see* Hart, P. D'Arcy, 24: 241, 1942

*Asphyxia, carbon monoxide (Drinker), 21: 101, 1939
*carbon monoxide, and resuscitation with oxygen and carbon dioxide (Henderson), 18: 135, 1936

*Asphyxiation and resuscitation, adventures in respiration (Henderson), 21: 27, 1939

*Associated General Contractors of America, Accident Prevention Com.: Manual of accident prevention in construction, 22: 51, 1940

Asthma, bronchial, due to aluminum dust (Cotter), 25: 421, 1943

Atchison, G. J. *see* Rowe, V. K., 25: 348, 1943

Atmospheres, industrial. II. Determination of solvent vapors by means of activated charcoal (Cook and Coleman), 18: 194, 1936

Atmospheric contaminants. I. Organic halogen compounds (Elkins, Hobby and Fuller), 19: 474, 1937
II. Methyl cellosolve (Elkins, Storlazzi and Hammond), 24: 229, 1942
containing nitrate groupings, analysis (Yagoda and Goldman), 25: 440, 1943

Atmospheric contamination from high temperature lead baths (Tebbens), 19: 6, 1937
from the casting of magnesium (Williams), 24: 277, 1942

*Atmospheric pollution (Batta, Firket and Leclerc), 19: 212, 1937

Becker, K. *see* Gudjonsson, Sk. V., 18: 215, 1936

Becker, T. J. *see* Seevers, M. H., 20: 593, 1938

*Bedford, T.: Modern principles of ventilation and heating. Three lectures given under the Heath Clark bequest to the National Institute of Industrial Psychology, Great Britain, 19: 280, 1937
*The warmth factor in comfort at work, a physiological study of heating and ventilation (Great Britain, Industrial Health Research Board Report), 18: 578, 1936
and Warner, C. G.: Measurements of concentrations of air-borne dusts, 24: 315, 1942

Beebe, Palmer L. and Mallette, Frederick S.: The solubility of lead borosilicates in tissue fluid, 26: 109, 1944

Behnke, A. R. *see* Yarbrough, O. D., 21: 213, 1939

Belknap, Elston L.: Clinical studies on lead absorption in the human. III. Blood pressure observations, 18: 380, 1936
Studies of the lead hazards in certain phases of printing. II. Actual lead absorption as measured by physical examination, blood and urine studies, 22: 445, 1940
Reply to Dr. Kehoe's criticism, 23: 161, 1941

Bellet, S. *see* Lewey, F. H., 23: 415, 1941

Benaglia, A. E., Robinson, E. J., Utley, E. and Cleverdon, M. A.: The chronic toxicity of aerosol-OT, 25: 175, 1943

Bennett, Granville, A., Drinker, Cecil K. and Warren, Madeleine Field: Morphological changes in the livers of rats resulting from exposure to certain chlorinated hydrocarbons, 20: 97, 1938
see Drinker, Cecil K., 19: 283, 1937

Benzene, absorption, distribution and elimination by body tissues and fluids of exposed dogs (Schrenk, Yant, Pearce, Patty and Sayers), 23: 20, 1941
acute toxicity of solvent vapors containing toluene and (Svirbely, Dunn and von Oettingen), 25: 366, 1943
and homologs, facts and reflections on problem of poisoning by (Schwarz and Teleky), 23: 1, 1941
chronic exposure to. I. Industrial aspects (Bowditch and Elkins), 21: 321, 1939
chronic exposure to. II. Clinical aspects (Hunter), 21: 331, 1939

Benzene—*Cont'd.*
chronic exposure to. III. Pathologic results (Mallory, Gall and Brickley), 21: 355, 1939
chronic toxicity of moderate concentrations, and of mixtures of benzene and its homologues, for rats and dogs (Svirbely, Dunn and von Oettingen), 26: 37, 1944
commercial, and mixture of benzene, toluene and xylene, studies on the toxicity of (Hough, Gunn and Freeman), 26: 296, 1944
exposure, urine sulfate determinations as measure of (Yant, Schrenk, Sayers, Horvath and Reinhart), 18: 69, 1936
exposure, urine sulfate determinations as measure of, plant study (Yant, Schrenk and Patty), 18: 349, 1936
poisoning, hematological effects (Erf and Rhoads), 21: 421, 1939
poisoning, rotogravure printing in New York City (Greenburg, Mayers, Goldwater and Smith), 21: 395, 1939
pure, commercial and crude, comparative physiological effects (Schrenk, Yant, Pearce and Sayers), 22: 53, 1940
recovery following exposure to (Goldwater and Tewksbury), 23: 217, 1941
*toluene, xylene, spectrographic analysis of technical aromatic hydrocarbons (Lusaczak), 19: 466, 1937
*toxicology of (Laurian), 20: 266, 1938
vapor, effects of inhalation on red blood cells of rabbits (Robinson and Climenko), 23: 232, 1941
workers, urinary sulfate test (Jephcott and Bulmer), 21: 132, 1939
*Benzine vapors in air, testing light (Lusaczak), 19: 466, 1937
Benzol, *see also* **Benzene**
Benzol, leucotoxic action (Climenko and MacLeod), 24: 289, 1942
poisoning, delayed; case report (Smith), 27: 118, 1945
poisoning, thrombocytopenic purpura due to; case report (Vaughan), 26: 274, 1944
toluol and styrene inhalation, comparison of narcotic effect with 1:3-butadiene (Carpenter, Shaffer, Weil and Smyth), 24: 69, 1944

and heating problems, altitude chamber for study of (Crowell), 27: 41, 1945
and rayon (Lewis), 19: 205, 1937
and refrigeration, industrial, papers presented at Lehigh University, Nov. 1939 (Refrigerating Engineering), 22: 47, 1940
and treatment of disease (Yaglou), 20: 30, 1938
apparatus, construction and application to industry (Konak), 20: 95, 1938
application of effective temperature scheme to comfort zone in Netherlands India (Wiesebron, Moen, Courtice and Kip), 25: 21, 1943
at slight expense (Mills), 19: 50, 1937
bacterial control in (Carswell, Nason and Fleming), 20: 169, 1938
better air, better work (Easton), 19: 205, 1937
bombproof underground spaces for shelters and factories (Ledoux), 23: 191, 1941
bulletin (League of Nations, Health Organization), 21: 32, 1939
Butte mine (Richardson), 20: 70, 1938
chemical dehydration (Kaufman), 18: 15, 1936
comfort, code of minimum requirements (Heating, Piping and Air Conditioning), 20: 167, 1938
comfort, cooling requirements for summer (Houghten, Giesecke, Tasker and Gutberlet), 19: 71, 1937
comfort figure, definition and use (Liese), 22: 196, 1940
condensed list of references (Cruse), 18: 171, 1936
control of air-borne bacteria in operating rooms and wards (Robertson and Doyle), 22: 171, 1940
control of air-borne organisms (Murphy), 20: 169, 1938
control of indoor environment in tropics (Crowden and Angus), 21: 82, 1939
crane cabs, steel production aided by (Moore), 24: 126, 1942
deep mines (Larcombe), 24: 102, 1942
dehumidification of air with coils (Goodman), 19: 50, 1937
disinfection of air by (Yaglou and Wilson), 24: 164, 1942
drying air and commercial gases with activated alumina (Derr), 20: 167, 1938
drying materials in trays, evaporation of surface moisture (Shepherd, Hadlock and Brewer), 20: 167, 1938
electrostatic air filters (Pound), 24: 80, 1942
equipment (Hayhurst, Brown and Kahn), 20: 55, 1938
equipment, dermatitis among operators (Schwartz and Dunn), 24: 179, 1942
equipment, methods of rating noise from (Parkinson), 23: 20, 1941
equipment, proposed standard method of rating and testing (Amer. Soc. Refrigerating Engineers), 18: 46, 1936
equivalent temperature of warmed room (Dufton), 18: 170, 1936
exposure, etiologic factor in respiratory and neuritic afflictions (Riley), 23: 20, 1941
factors (Chester), 20: 117, 1938
factors affecting mine air (Tromp and Duminy), 19: 49, 1937
factors in choice of plant for improving temperature and humidity conditions of mine atmospheres at great depths (Dobson), 23: 21, 1941
fever therapy induced by conditioned air (Houghten, Ferderber and Gutberlet), 19: 169, 1937
fever therapy locally induced by (Ferderber, Houghten and Gutberlet), 23: 21, 1941
first air conditioned metal mine (Mining Congress Jour.), 19: 186, 1937
for advancement of health and safety in mines, literature on (Harrington and Davenport), 20: 167, 1938
for mines (Kooistra), 20: 70, 1938
Griffin Wheel Co. (Murdoch), 24: 81, 1942
health and safety in mines (Harrington and Davenport), 24: 42, 1942
health aspects of (McConnell), 18: 57, 1936; (McConnell, Fellows and Stephens), 20: 30, 1938
hospital (Yaglou), 20: 212, 1938
hospital rooms, observations on patients (Hosmer), 19: 71, 1937
hygro-xylometric control of (Tunis), 19: 49, 1937
importance of clothing in (Yaglou and Messer), 24: 41, 1942
in factories (Price), 20: 30, 1938
in industry. VI. Improved efficiency of workmen (Soroka), 19: 205, 1937
in industry, in America (Tasker), 24: 103, 1942
in industry, reactions to high effective temperatures (Fleisher, Stacey, Houghton and Ferderber), 21: 205, 1939
in tropics (Mom), 19: 184, 1937
independent dehumidification (Ourusoff), 19: 50, 1937
instruments for recording thermal factors (Yaglou), 18: 93, 1936
lithium chloride for (Bichowsky), 18: 145, 1936
Magma mine (Koernes and Forsker), 20: 70, 1938
mine air with special regard to purification (Joseph), 18: 15, 1936
mines; study of Kata thermometer cooling power and effective temperature (Nelson), 25: 114, 1943
noise characteristics of air supply outlets (Stewart and Drake), 19: 142, 1937
noise control as by-product (McCord, Teal and Witheridge), 21: 31, 1939
odor concentration in air conditioned structures (Gant and Shaw), 19: 97, 1937
odor control with activated coconut carbon (Munkelt), 19: 205, 1937
of cinemas (Henton), 21: 83, 1939

Air conditioning—*Cont'd.*
plant at Ooregum Mine, Kolar gold field (Spalding and Parker), 23: 21, 1941; (further description), 23: 129, 1941
physical and physiological principles of, II. (Yaglou), 19: 238, 1937
reactions of office workers in south Texas (Rummel, Giesecke, Badgett and Moses), 21: 182, 1939
reactions of 274 office workers to summer cooling (Houghten, Newton, Qualley and Witkowski), 20: 212, 1938
reactions to various humidities (Winslow, Herrington and Gagge), 21: 80, 1939
respiratory tract diseases and (McCord), 23: 129, 1941
sanitary aspects of (Yaglou), 20: 167, 1938
sensation of warmth as affected by color of environment (Houghten, Olson and Suciu), 23: 21, 1941
summer (Chester and others), 24: 42, 1942
summer, comfort standards for (Houghten and Gutberlet), 18: 15, 1936
summer cooling as affected by heat gain through dry, sprinkled and water covered roofs (Houghten, Olson and Gutberlet), 23: 20, 1941
summer cooling of research residence by use of city water (Kratz, Fahnestock, Konzo and Broderick), 18: 171, 1936
summer cooling requirements (Houghten, Gutberlet and Rosenberg), 22: 26, 1940
summer cooling requirements of 275 workers in air conditioned office (Newton, Houghten, Gutberlet and Qualley), 20: 95, 1938
systems, determining sound attenuation in (Wilbur and Simons), 25: 20, 1943
systems, regulations for installation of (National Board of Fire Underwriters), 22: 45, 1940
systems, suggestions for reducing fire hazards of (Neale), 27: 45, 1945
ultraviolet in systems (Porter), 24: 186, 1942
ultraviolet radiation in operating rooms (Kaisal, Cimiotti and Meleney), 22: 171, 1940
use of silica gel in (Patterson), 19: 143, 1937
ventilating and heating, warship (Urdahl and Whittlesey), 25: 70, 1943
ventilation conditions and their investigation (Frederick), 20: 30, 1938
ventilation of Butte mines (Richardson), 24: 80, 1942
with lithium chloride system (Knapp), 19: 185, 1937
Wright Aeronautical Corp. (Whitaker and Linsley), 24: 81, 1942
Air conditions, measurement of (McCord and Witheridge), 21: 55, 1939
contaminants, removal of (Harrold), 24: 64, 1942
contaminants, sampling and analysis of; methods in war industries (Goldman), 26: 84, 1944
contaminants that affect health (Meller), 19: 39, 1937
contamination and sterilization (Robertson, Doyle, Tisdall, Koller and Ward), 22: 109, 1940
contamination, technic which completely excludes air contamination of bacterial cultures (Spencer), 18: 19, 1936
cooling, refrigeration applied to (Green), 21: 130, 1939
country and town, nature of dispersoids in (Coste), 19: 66, 1937
Air disinfection *see also* **Air sterilization** *and* **Disinfection**
Air disinfection by glycol vapors, summary of 3-year study of clinical applications (Harris and Stokes), 27: 101, 1945
by ultraviolet energy, physical basis of (Buttolph), 27: 65, 1945
germicidal mists and vapors (Baker and Twort), 27: 65, 1945
importance in freeing air passages of infectious disease (Kliewe and Früchte), 26: 104, 1944
in ventilation (Wells), 27: 43, 1945
propylene glycol vapor, I. (Challinor and Duguid), 27: 21, 1945
propylene glycol vapor, II. (Duguid and Challinor), 27: 143, 1945
rationale and means; air-borne infection (Mudd), 27: 184, 1945
Air distribution from side wall outlets (Nelson and Stewart), 20: 167, 1938
exhaled by man, toxicity of (Gramenitzkii and Sivertzev), 18: 124, 1936
filters, electrostatic (Pound), 24: 80, 1942
filters, electrostatic, engineering facts (Nutting), 27: 161, 1945
filters, viscous, overloading during accelerated tests (Rowley and Jordan), 24: 185, 1942
filtration (Nelson), 21: 31 (1939)
Air Hygiene Foundation of America, Inc.: Determination of lead in air, 21: 24, 1939
Protecting health of workers, 21: 54, 1939
Air, hygienic needs in ventilation of work places (Liese), 19: 238, 1937
movement as stimulus to skin, reflex effects on muscle tonus and blood circulation; therapeutic baths (Henderson, Oughterson, Greenberg and Searle), 19: 181, 1937
movement, influence on heat loss from clothed body (Winslow, Gagge and Herrington), 22: 66, 1940
pollution by Diesel engines (Maurin and Kling), 20: 187, 1938
pollution in New York City (Pincus and Stern), 19: 146, 1937
pollution, urban, and respiratory diseases (Mills), 25: 115, 1943
pressure, diminished, morphological changes in central nervous system in experiments (Merk), 22: 133, 1940
purification (Joseph), 21: 56, 1939; 25: 48, 1943
purification and allergic conditions (Fraenkel), 20: 26, 1938
purification, by hypochlorous acid gas (Masterman), 25: 23, 1943
Air raid shelters, heat and ventilation (McGuinness), 25: 137, 1943
hygiene of (Stock), 24: 86, 1942
hygiene of, Bristol (Davies), 24: 70, 1942
ventilation of (Angus), 22: 170, 1940; (Weiner), 23: 101, 1941
Air, rarefied, changes in central nervous system in, and in hunger (Dellaporte), 21: 153, 1939
Air sampling. Alundum gas diffusers (Williams and Haines), 27: 42, 1945
aspirating unit for (Silverman and Wardlow), 23: 15, 1941
device for field work (Van Atta and McClure), 23: 187, 1941
device, hand pump (Kronenberg and Setterling), 23: 187, 1941
isolation of pathogenic bacteria (Pressman), 19: 191, 1937
procedures, flowmeter for use in (Lemon and Wise), 26: 84, 1944

acute leucosis from (Perris, Kissel and Pierquin), 21: 12, 1939
aminoazo-, carcinogenic effect of (Kirby), 27: 152, 1945
analysis of toluene for (Cole and Armstrong), 24: 123, 1942

Benzene and benzine (Teleky), 21: 43, 1939
acute and subacute poisoning (Petrini), 24: 54, 1942
effect on respiratory center of frog (Gladychevskaya), 18: 175, 1936
hydrocarbons as solvents (Engel), 23: 74, 1941
protection of the worker (Stassens), 21: 43, 1939

Benzene and carbon tetrachloride, effects on the organism (Mytnick), 24: 156, 1942
and phenols (Hett and Mask), 21: 68, 1939
and homologs, experiments on industrial exposure to (Geoffroy and Luce), 20: 83, 1938
and its homologs, mass poisoning of printers by (Ehrhardt), 18: 65, 1936
and pyramidon, late damage to leucopoietic bone marrow function by (Stodtmeister), 23: 200, 1941
and radium, effect of, on blood and blood forming organs, leucocytes (Feller), 20: 45, 1938
and thorium x, effects on leucocytic reactions, comparative examinations (Wallisch), 22: 56, 1940
and toluene in air, determination of small amount (Alekseeva), 25: 138, 1943
and toluene in air, determination of the concentration by a spectroscopic method (Cole), 25: 71, 1943
and xylene, influence on tuberculous infection (Rix and Schedtler), 23: 113, 1941
aplastic myelosis in plane maker (Weil, Perles and Seror), 22: 186, 1940
aplastic myelosis, myeloblastic reaction of blood and bone marrow in case (Weil and Perles), 22: 186, 1940
atypical hemopathy caused by, repeated angina without neutropenia (Aubertin and Durbovsky), 23: 34, 1941
benzine and protection of worker (Stassens), 21: 43, 1939
(benzol) poisoning; fatal case report with autopsy findings (Ackerly and Hawlick), 26: 163, 1944
blood disturbances after exposure to (Goldwater), 23: 146, 1941
blood dyscrasias caused by X-ray, radium, lead and (Held and Lieberson), 20: 103, 1938
bromo-, influence on induction of skin tumors by 3,4-benzpyrene (Crabtree), 27: 52, 1945
cellophane and linseed oil, poisoning from vapors of (Undritz), 20: 146, 1938
commercial, and a mixture of benzene, toluene and xylene, relative toxicity (Hough and Freeman), 26: 163, 1944
determination in the air of industrial plants (Alekseeva), 24: 101, 1942
determination of; in the presence of toluene, xylene and other substances (Dolin), 25: 138, 1943
effect on blood and hematopoietic organs of rat (Latta and Davies), 23: 180, 1941
exposure, aplastic bone marrow and pseudoaplastic leucemia in (Penati and Vigliani), 21: 96, 1939
exposure, new procedure for control (Schrenk, Yant and Sayers), 18: 175, 1936
hazards in leather industry (Schweisheimer), 27: 32, 1945
hazards in vulcanizing (Humperdinck), 24: 10, 1942

Benzene, health injury in photoengraving (Brachmann), 20: 12, 1938
hemopathies caused by (Mignolet), 22: 9, 1940
hydrocarbons in lacquer solvents, determination of (Mayer and Lasaczak), 21: 219, 1939
in air, apparatus for signalling dangerous concentrations (Kogan), 24: 164, 1942
in blood and urine microcolorimetric determination of (Pearce, Schrenk and Yant), 18: 133, 1936
in natural gas (Schrenk, Yant and Pearce), 18: 10, 1936
industrial hygiene defense program, rubber industry (Mayers), 23: 200, 1941
influence of nitro and amido derivatives of (Gorkin and Kagan), 18: 156, 1936
influence of temperature on toxicity (Lifschiz), 18: 29, 1936
inhalation, chronic, functioning and reacting ability of blood forming organs in (Schmittmann, Linnig and Camerer), 23: 97, 1940
injury, hematology in (Kimm), 19: 108, 1937

Benzene intoxication (Duvoir and Desoille), 21: 140, 1939
chronic, medical prevention with reference to urine sulfates (Vigliani and Gisannini), 21: 140, 1939
investigation in workers using airplane dope and rubber solvents (Hunter, Milton, Perry and others), 27: 93, 1945

Benzene, isopropyl-, possible toxicity (J. A. M. A., Queries and Minor Notes), 26: 137, 1944
microcolorimetric determination of (Schrenk, Pearce and Yant), 18: 9, 1936
myelotoxicosis from, study of 10 cases (Lamy, Kissel and Pierquin), 22: 33, 1940
nail changes in automobile driver, koilonychia (Toegel), 19: 130, 1937
notice sheet (Germany, Ministry of Labor), 20: 12, 1938
orthodichlor- (Riedel), 24: 11, 1942
plant workers, medical supervision of (Kammer, Isenberg and Berg), 21: 11, 1939

Benzene poisoning (Dinberg), 27: 74, 1945
acute experimental, cardiovascular system in (Caccuri), 23: 34, 1941
acute, its prevention (Symanski), 21: 68, 1939
among printers (Castrovilli), 22: 55, 1940
and hypovitaminosis (Heim de Balzac and others), 24: 119, 1942
chronic (Hamilton-Peterson), 23: 91, 1941
chronic; accumulated cases in rubber industry (Helmer), 27: 135, 1945
chronic, among photoengravers, vitamin C treatment of (Hagen), 22: 98, 1940
chronic, diagnosis of (Friemann), 19: 107, 1937
chronic, early recognition and treatment (Hagen), 21: 43, 1939
chronic, in plastics industry, liver damage (Heimann and Ford), 23: 74, 1941
chronic occupational, marrow and blood picture (Stodtmeister), 21: 68, 1939
clinical aspects (Budelmann), 21: 48, 1939
death from, with unusual skin phenomena (Schwarz), 19: 5, 1937

ST0851838

Benzene poisoning—*Cont'd.*
and poisoning due to such medicinal materials as dinitrophenol, arseno-benzenes, pyramidon (Danielopolu, Marcou, Petresco and Gingold), 19: 62 1937
early chronic industrial, diagnosis and pathology of (Fellinger), 21: 68, 1939
effect of dietary protein on the susceptibility of dogs to (Tsan-Wen Li, Hough and Freeman), 26: 163, 1944
experimental, action of sulfates (Ramazzotti), 27: 57, 1945
fatal, splenectomy in two cases (Cain, Cattein and Hertz), 20: 146, 1938
histaminemia in experimental leucopenia and agranulocytosis after (Tanzi), 25: 201, 1943
in artificial silk finishing mills (Martin), 22: 186, 1940
in Belgium (Glibert), 18: 83, 1936
in industry (Wilson), 25: 33, 1943
in manufacture of mirrors (Glibert), 19: 151, 1937
in pregnant woman (Leroage), 21: 12, 1939
in women doing home-work, two cases (Capellini), 23: 113, 1941
industrial (Pabst), 20: 84, 1938
industrial, and its remedies (Florentin), 24: 90, 1942
industrial, clinical and hematological studies on 9 cases of (Kissel and Pierquin), 20: 196, 1938
influence upon streptococcal infections in rabbits. I. Benzene poisoning and natural resistance to intracutaneous streptococcal infection (Schnitzer and Goddard), 25: 152, 1943; II. Benzene poisoning and active and passive immunity to intracutaneous streptococcal infection (Schnitzer), 25: 153, 1943
isolated thrombopenia from (Kern), 20: 196, 1938
latent (Emile-Weil, Perles and Aschkenasy), 20: 104, 1938
leukemic myelopathy caused by (Rosso), 25: 195, 1943
occupational (Martin), 22: 186, 1940
occupational (France, Ministry of Labor), 22: 186, 1940
occupational, prevention of (Feil), 27: 114, 1945
occupational, role of individual predisposition, lack of vitamin C, prophylactic measures (Roubinet), 23: 34, 1941
permeability of hematoencephalic barrier and blood changes in (Shachnovskaia), 18: 155, 1936
prevention (Weil), 23: 10, 1941; 24: 54, 1942
prevention and treatment (Friesanna), 20: 84, 1938
vitamin C metabolism and (Hagen), 20: 146, 1938
with extra-medullary hematopoiesis (Gall), 20: 176, 1938
Benzene polyneuritis, is there a? (Duvoir, Pollet and Arnoldson), 20: 122, 1938
present status of (Davis), 22: 124, 1940
pure and commercial, comparative action on vasomotor system of dogs (Chartier and Angenot), 21: 139, 1939
pure and crystallizable commercial, action on heart volume of dogs (Barsin and Charlier), 22: 78, 1940
research on toxicity of (Charlier), 21: 139, 1939
sickness in workers applying rubber glues (Holstein), 19: 130, 1937

lime, of the eye, use of rabbit peritoneum (Brown), 24: 60, 1942
lithium (J. A. M. A., Queries and Minor Notes), 27: 10, 1945
liver necrosis in burns treated with tannic acid (Jackson), 27: 39, 1945
local treatment with sulfadiasine spray (Colovirus, West and Armour), 25: 44, 1943
magnesium, in industry (Jarsynka), 25: 204, 1943
management of (Walton), 26: 145, 1944
management of, using occlusive compression dressing with sulfathiazole emulsion (Ackman, Gerrie and Pritchard), 26: 102, 1944
massive repairs with thick split-skin grafts (Brown and McDowell), 24: 146, 1942
methyl bromide (Butler, Perry and Williams), 27: 134, 1945
minor and medium, treatment with sulfathiazole (Biram), 25: 16, 1943
modern treatment (Ainslie), 25: 43, 1943; (Richardson), 25: 43, 1943; (Smith), 25: 43, 1943
modified non-adherent gauze pressure treatment (Marshall and Greenfield), 26: 121, 1944
new treatment (Pickrell), 24: 33, 1942
nitrogen balance in (Nutrition Rev.), 27: 161, 1945
ocular, chemical, therapy of (Dashevskii and Marmorstein), 23: 188, 1941
ocular lime (Torres Estrada), 23: 125, 1941
ocular, local application of cod-liver oil (Tichova), 23: 208, 1941
of eye, acid or alkali, preparedness for (Middleton), 18: 122, 1936
of eye, chemical, improved treatment (Oaks), 27: 139, 1945
of eye, ultraviolet (J. A. M. A., Queries and Minor Notes), 24: 114, 168, 1942
of hand, treatment of superficial injuries and (Allen), 23: 135, 1941
paraffin wax open air treatment (Pendleton), 25: 160, 1943
pathological physiology, studies of (Necheles and Olson), 26: 56, 1944
pathology; autopsy of 61 fatal cases, Toronto, Canada (Erb, Morgan and Farmer), 25: 159, 1943
pathology, recent research (Harkins), 27: 13, 1945
penicillin and propamidine; elimination of hemolytic streptococci and staphylococci (Clark, Colebrook and others), 26: 14, 1944
phosphorus, treatment (Godding and Notton), 24: 189, 1942; (Great Britain, Ministry of Health), 25: 158, 1943; (Jones), 25: 16, 1943; (J. A. M. A., Queries and Minor Notes), 24: 145, 1942; (Lascot), 25: 134, 1943; (Obermer), 26: 41, 1944; (Rabinowitch), 25: 134, 1943; (Wagner), 27: 96, 1945; (Walton), 24: 168, 1942
physiochemical disturbance (Ficarra and Naclerio), 27: 61, 1945
physiologic analysis of nature and treatment (Glenn), 27: 12, 1945
physiology and biochemistry of quantitative; observations (Glenn, Muns and Drinker), 25: 178, 1943
plasma loss in: review of the literature (Rossiter), 26: 101, 1944
plasma therapy in severe (Harkins, Lam and Romence), 25: 89, 1943
poison gas, of the eye, treatment (J. A. M. A., Queries and Minor Notes), 25: 44, 1943
present-day treatment (Bulmer), 26: 59, 1944
principle from liver effective against shock from (Prinzmetal, Hechter, Margolies and Feigen), 25: 184, 1943
principles of treatment (Franklin), 26: 143, 1944
problem of (Ravdin), 25: 107, 1943
propamidine in (Morley and Bentley), 25: 160, 1943
rational treatment of (Sewell), 27: 79, 1945
relation of crush syndrome to that of burns and other types of traumatic injuries of human tissues (Lee), 25: 205, 1943
relation of tannic acid to liver necrosis occurring in burns (Wells, Humphrey and Coll), 24: 188, 1942
restoration of function in burnt hands (Bodenham and Brist), 26: 15, 1944
severe, treatment of patients (Allen and Koch), 24: 186, 1942
shock, closed plaster method in prevention of (Sellers and Goranson), 26: 192, 1944
shock, intensive human serum treatment, and formula for calculating amount of infusion (Pressman, Janota, Weston and others), 25: 204, 1943

shock, oral sodium lactate in treatment of (Fox), 26: 79, 1944
skin, due to molten magnesium (Wilson and Egeberg), 24: 190, 1942
skin grafting, immediate; preliminary report (Young), 25: 184, 1943
sodium hydroxide, prevention and treatment (Terry), 25: 185, 1943
studies. I. Effect of plaster confinement (Alrich and Lehman), 27: 11, 1945; II. Observations on vasoconstrictor substance in lymph from burned area (Alrich), 27: 12, 1945
sulfadiasine treatment (Adams and Crawford), 24: 189, 1942
sulfathiazole ointment in treatment (Allen, Owens, Evans and Dragstedt), 24: 189, 1942
sulfhydryl solution in treatment (Mellon), 24: 49, 1942
sulfuric acid, case (Cashell, Shay and Bodenham), 26: 170, 1944
surface treatment (Clowes, Land and Levenson), 26: 59, 1944
tannic acid and sulfanilamide treatment of (de Vidas and McEachern), 24: 86, 1942
tannic acid method in treatment; present status (Lee and Rhoads), 26: 191, 1944
tannic acid-silver nitrate treatment (Cotter and Kimbell), 18: 49, 1936; (Bettman), 19: 146, 1937
therapy, experimental study of pliable gelatin film, and effect of firm dressings on rate of healing (Reback and Ivy), 27: 79, 1945
therapy, in industry (Mersai), 26: 144, 1944
Burns, thermal (Gordon and Gordon), 25: 134, 1943; (Harkins), 26: 190, 1944; 27: 181, 1945
abnormal carbohydrate metabolism (Taylor, Levenson and Adams), 27: 13, 1945
abnormal nitrogen metabolism (Taylor, Levenson and others), 26: 102, 1944
cutaneous, local treatment (American Medical Association Councils on Industrial Health and on Pharmacy and Chemistry), 27: 11, 1945
healing of; preliminary report (Connor and Harvey), 27: 13, 1945
hemoglobinuria in patients with. III. Studies on destruction of red blood cells (Shen and Ham), 26: 79, 1944
in diabetes mellitus (Root), 27: 96, 1945

diagnosis (Rodenacker), 25: 131, 1943
experimental, lipemia in (Bianchi), 21: 49, 1939
in animals and man, changes in nervous system (Alpers and Lewy), 23: 31, 1941
in production of optical glass (Ramazzotti), 27: 56, 1945
in viscose rayon industry (Hamilton), 22: 180, 1940
industrial (Warnecke), 25: 60, 1943
neuropathological changes in cats (Ferraro, Jervis and Flicker), 24: 73, 1942
of nervous system (Baumann), 22: 33, 1940
six cases (Gordy and Trumper), 20: 148, 1938
unusual case (Schramm), 23: 50, 1941
Carbon disulfide, precautions against poisoning, fire and explosion (Great Britain, Ministry of Labor and National Service), 25: 130, 1943
reports of occupational diseases attributed to volatile solvents (Quadland), 26: 74, 1944
retrobulbar neuritis and amblyopia caused by poisons (Terrien), 20: 125, 1938
safe practice in viscose rayon industry (Chestnut), 22: 39, 1940
solvent vapor; absorption, elimination, metabolism and mode of action (McKee, Kiper, Fountain, Riskin and Drinker), 25: 175, 1943
sulfur dioxide and hydrogen sulfide, removal from staple fiber and rayon mills (Viblein), 27: 41, 1945
toxicity and dangers (U. S. Dept. of Public Health), 23: 118, 1941
vapor, detection of (Great Britain, Dept. of Scientific and Industrial Research), 21: 218, 1939
Carbon monoxide (Stampe, Nanjok and others), 20: 102, 1938; (Rossiter), 25: 61, 1943
accident prevention in blast furnaces (Rabenecick), 20: 103, 1938
acclimatisation of mice to low concentrations (Killick), 20: 79, 1938
action on thyroid (Schulze), 18: 175, 1936
analysis of mine air (Romashchenko), 26: 64, 1944
and anterior lobe of pituitary (Kampelmann and Schulze), 19: 84, 1937
and barbituric acid derivatives, poisoning by, action of various stimulants (Thiel), 19: 83, 1937
and carbon dioxide (and benzine vapor) in air, conductometric determinations of (Gorbachev), 19: 16, 1937
and epilepsy (Symanski), 21: 44, 1939
and generation of nitric oxide during welding in small spaces (Reinarski and Konachak), 23: 48, 1941
and hydrocyanic acid poisoning, value of methylene blue in therapy (Ztschr. f. Gewerbehyg.), 20: 15, 1938
and hydrogen, oxidation by bacteria (Jones and Scott), 22: 60, 1940
and hydrogen sulfide poisoning and protection (Neitzel), 23: 145, 1941
and hypertonia (Stimmler and Parade), 22: 32, 1940
and particulate matter in Holland Tunnel (Yant and others), 24: 65, 1942
anemia (Killick), 23: 10, 1941
as tissue poison (Schulze), 19: 129, 1937
asphyxia (Davis), 20: 15, 1938; (Kammer and Carleton), 25: 130, 1943
asphyxia, spirazies and neurological sequelae, case report (Nichols and Keller), 19: 174, 1937
asphyxia, mental and neurological sequelae after 15 years (Raskin and Mullaney), 23: 73, 1941
asphyxiation, slow (Beck), 18: 176, 1936
at high altitudes, toxicity (Heim), 22: 143, 1940
average time spent by the blood in human lung capillary and its relation to the rates of carbon monoxide uptake and elimination (Roughton), 27: 128, 1945
Basedow's disease (Baader), 19: 108, 1937
blood, and anoxemia (Binet, Strumza and Nicolle), 25: 84, 1943
blood content in asphyxiated persons (Looper and Tennat), 24: 17, 1942
blood, reduction after X-ray treatment (Camerun), 23: 145, 1941
blood, stability with regard to examination (Hödy6 and Wehrli), 18: 181, 1936
chronic, growth and reproduction during exposure to (Sukie and Miller), 26: 186, 1944
chronic inhalation, increase of chromaffin substance of adrenal (Schmeisser), 18: 101, 1936
clinical aspects of poisoning (Budelmann), 21: 48, 1939
coma, respiration during, modification by bilateral vagotomy, treatment with methylene blue and carbon dioxide (Prisco), 21: 166, 1939
combustion products study (Beck, Roetman and Sater), 25: 175, 1943
comparison of methods for determination (Goldman and Brandt), 24: 142, 1942
content of blood of smokers (Schmidt), 22: 123, 1940
content of blood under various conditions (Gettler and Freimuth), 23: 114, 1941
content of illuminating gas in Paris, demand for permission to increase (Kohn-Abrest), 19: 108, 1937
damage to midbrain and polycythemia (Dittmar), 21: 166, 1939
danger in garages (Mershacher and Thaler), 18: 4, 1936
detection of (Great Britain, Dept. of Scientific and Industrial Research), 22: 102, 1940
detection with Dræger indicator (Hetzel), 20: 51, 1938
detector, Travelers' (Travelers Insurance Co.), 21: 26, 1939
determination by pyrogallic-tannic acid method adapted to standard gas analysis equipment (Cook), 23: 15, 1941
determination for legal experts and for clinical investigation (Breitenecker), 21: 219, 1939
determination in blood, by infra-red photography (Eggert), 18: 88, 1936
determination of low concentrations (J. Soc. Chemical Industry), 20: 162, 1938
determination of small amounts by iodine pentoxide method (Fischinger), 19: 16, 1937
determination with iodine pentoxide (Katzurbski), 24: 102, 1942

determination with palladium chloride paper (Labat), 23: 16, 1941
device for detecting (Chaignon), 19: 17, 1937
Diesel locomotives in gassy mine workings of Belgium (Breyre and Fripiat), 23: 15, 1941
domestic and occupational hazard (Schulze), 23: 202, 1941
domestic hazard, problem in West Virginia (Beck, Schulze and Suter), 22: 183, 1940
duration in the blood (J. A. M. A., Queries and Minor Notes), 25: 33, 1943
effect of breathing of air containing small amounts of (Nishyama), 24: 74, 1942
effect of cardiazol and veritol in elimination of (Müller), 26: 186, 1944
effects of exposure to known concentrations of (Sievers, Edwards, Murray and Schrenk), 24: 94, 1942
effect on respiration of frog muscle (Stannard), 22: 143, 1940
effect on thyroid, experiments (Replob), 21: 9, 1939
elimination from blood, speed of (Breitenecker), 20: 80, 1938
encephalitis, severe, successful physical and medicinal treatment of (Schultz and Zaschneid), 25: 60, 1943
extrarenal uremia in intoxication with illuminating gas (Mach and Naville), 21: 213, 1939
filters (Mitscheonborn), 21: 103, 1939
firedamp in atmosphere, grisumetanatic determination of (Chovin and Gion), 19: 17, 1937
gas detoxification by removal of (Meager), 18: 134, 1936
gas mixed with other gases is more toxic (Mayers), 19: 223, 1937
Hartridge reversion spectroscope for examination of blood for (Frederick), 19: 201, 1937
hazard and California highway accidents (U. S. Dept. of Public Health), 22: 10, 1940
hazard, industrial (Hoffman), 18: 181, 1936
hazard, occupational (Hoffman), 19: 67, 1937
hazard of combustion products of natural gas upon public health (Beck), 24: 178, 1942
hazards (Sõming), 23: 73, 1941; (Rossiter), 27: 30, 1945
hazards and mechanism of action (von Oettingen), 27: 170, 1945
headache and anoxemia (Mayers), 20: 194, 1938
health hazards from (Spitta), 18: 38, 1936
hemoglobin, continuous registration of, in circulating blood (Matthes and Gross), 21: 219, 1939
hemoglobin determination, photometric, for clinical and forensic purposes (Oettel), 20: 203, 1938
hemoglobin in blood, determination with photoelectric colorimeter (Havemann), 23: 77, 1941
hemoglobin in blood, measurement of very small amounts (May), 19: 233, 1937
hyperpyrexia from, or infection? (J. A. M. A., Queries and Minor Notes), 20: 120, 1938
in air and blood, determination of small amounts (Holden), 26: 85, 1944
in air and carbon monoxide hemoglobin, relationship (May), 23: 178, 1941
in air, determination of (Kling, Rouilly and Claras), 18: 130, 1936; (Christman, Block and Schultz), 19: 139, 1937; (Mample), 24: 55, 1942
in air, method for estimating the amount (Gigon and Noverraz), 26: 18, 1944
in blood, detection of small amounts (Schmidt), 22: 41, 129, 1940
Carbon monoxide in blood, determination of (Gigon and Noverraz), 20: 68, 1938; (Roughton), 23: 96, 1941; (Amaruudeen and Grut), 27: 73, 1945
in blood, micromethod for determination of (Bland), 23: 16, 1941
in blood, pyrogallol test for, and preparing carbon monoxide blood artificially (Kreuland), 23: 96, 1941
in blood, pyrotannic acid method of determination (Komatu), 22: 102, 1940
in foundries, studies of (Burke), 20: 15, 1938
in gas mixtures, determination of (Nell), 23: 155, 1941; (Seadroy and Fitzsimmons), 27: 121, 1945
in testing motors, and harmful effect on ears (Gaulejac), 20: 48, 1938
in vehicles (Van Deventer), 18: 134, 1936
indicators, recent developments (Pohl), 20: 22, 1938
industrial hygiene in connection with work with lime furnaces (Abramovitsch, Ploskin and Meriahof), 18: 69, 1936
influence on tissue culture (Rix and Ehrhardt), 20: 195, 1938
infrared spectrophotometric studies on hemoglobin as affected by cyanide, methylene blue and (Brooks), 23: 114, 1941
intoxication, cases among motor bus drivers (Castroviili), 18: 69, 1936
kinetics of the reaction of CO with hemoglobin (Roughton), 27: 128, 1945
light absorption by normal blood and by blood containing (Loyarte, Carratala and Vucetich), 25: 201, 1943
loss in transporting blood specimens, theoretical estimation of (Wehrli), 18: 134, 1936
low concentrations, acclimatization of human subject to (Killick), 18: 142, 1936
low concentrations, colorimetric determination by use of palladium chloride-phosphomolybdic acid-acetone reagent (Polis, Berger and Schrenk), 27: 101, 1945
mass poisoning (Öttel), 21: 69, 1939
medical study of men exposed to measured amounts in Holland tunnel (Sievers, Edwards and Murray), 25: 8, 1943
methods for detection of (Berger and Schrenk), 21: 55, 1939
microcephalus and tetraplegia of child following mother's poisoning during pregnancy (Brander), 23: 93, 1941
new method for determination in blood (Weaneland), 23: 37, 1941
ocular disturbance from motor gas (Kosiowski), 21: 9, 1939
Carbon monoxide poisoning (Koch), 18: 101, 1936; (Germany, Conference of Scientists and Physicians), 19: 9, 1937; (Berwald), 19: 108, 1937; (Schurts), 21: 97, 1939; (McNally), 22: 123, 1940; (Binet), 25: 175, 1943
acute and chronic (Symanski), 18: 158, 1936
acute, blood pressure responses to (Brewer), 19: 223, 1937
acute, change of personality as sequel of (Nielsen and Ingham), 23: 48, 1941
acute, disturbance of sugar metabolism (Mocschlin), 22: 97, 1940
acute, in cleaning supply line to Martin oven (Koch), 23: 179, 1941
acute, in factory making office equipment (May), 23: 179, 1941
acute, in gas plant worker, Basedow's disease in (Baader), 18: 176, 1936
acute; prophylaxis (Varshavskii and Shakhnovskaya), 27: 115, 1945
acute, respiratory and circulatory responses (Chiodi and others), 24: 6, 1942

ST0851848

Carbon monoxide poisoning—*Cont'd.*
acute severe, blood transfusions (Koch), 21: 118, 1939
analysis of causes of 100 cases (Hammers), 20: 80, 1938
and Bassedow's disease (Mahaim), 24: 6, 1942
and lead poisoning, cases settled, 1933–38 (Industrial Commission of Wisconsin), 22: 111, 1940
and myocarditis (Ziegler), 18: 81, 1936
and resuscitation (Teleky), 18: 125, 1936
cardiac changes from (Ehrich, Bellet and Lewey), 27: 31, 1945
cardiac deviations in (Schweitzer and Bosch), 26: 31, 1944
case of muscle gangrene with (Scavas), 22: 79, 1940
cerebral subcortical myelinopathy in (Hsü and Ch'eng), 21: 138, 1939
cerebral vascular lesions after (J. A. M. A., Queries and Minor Notes), 23: 114, 1941
changes in carbohydrate metabolism after (Schulze), 19: 36, 1937
changes of loosely bound blood iron in (Rapiob and Bredtmann), 18: 157, 1936
Carbon monoxide poisoning, chronic (Wotzka), 19: 84, 1937; (Fuhner), 23: 34, 1941
and carbon monoxide in laboratory air (Schick), 20: 195, 1938
and pernicious anemia (Biedermann), 21: 138, 1939
changes of sperma in (Riedl), 22: 97, 1940
diagnosis and treatment (Symanski), 25: 196, 1943
pernicious anemia from (Berger and Grill), 18: 101, 1936
problem of (Gerbis), 18: 20, 1936
experimental (Lewey and Drabkin), 27: 31, 1945
gastrointestinal symptoms simulating ulcer in (Beck), 22: 53, 1940
lack of evidence for (Henderson and Beck), 22: 184, 1940
Carbon monoxide poisoning, circulatory and cardiac damage (Litzner), 18: 126, 1936
circulatory reflex of carotid sinus (Kayser), 21: 166, 1939
danger with generators (Brunsgaards), 26: 73, 1944
detection and treatment (Legge), 20: 62, 1938
determination of hemoglobin and red blood count (Hamperdinck), 20: 120, 1938
domestic (J. A. M. A., Current Comment), 26: 31, 1944
easily separable blood iron and significance in (Rooks), 18: 176, 1936
electrocardiogram in (Steinmann), 19: 152, 1937; (Caccuri), 22: 183, 1940; (Rastelli), 22: 183, 1940
electrocardiographic changes in (Stearns, Drinker and Shaughnessy), 20: 194, 1938; (Rastelli), 23: 33, 1941
elimination of carbon monoxide from illuminating gas (Katz), 19: 36, 1937
experimental examination of new methods of treating methylene blue (Estler), 18: 4, 1936
factors in peripheral lesions following (Seifert), 26: 94, 1944
fatal, in silo (Ronicke), 22: 33, 1940
fatal protracted, heart and brain findings and detection (Walcher), 23: 178, 1941
from coke (Beck), 19: 223, 1937
further investigations (Buresch), 18: 4, 1936
gangrene of foot following (Wilson and Carey), 22: 144, 1940
hazards in work in gradient tunnels of steam operated railroads (Zangger), 19: 108, 1937
heart damage after (Kroetz), 18: 175, 1936
homonymous hemianopsia in (François), 25: 61, 1943
illuminating gas (Barac and Dor), 18: 81, 1936
in animals, effect of methylene blue-glucose (chromosmon) (Sturm and Wohlfahrt), 19: 222, 1937
in church (Eskelund), 18: 175, 1936
in dogs anesthetized with sodium amytal (von Oettingen), 24: 54, 1942
in hat industry (Mayers), 19: 60, 1937; (Mayers and Burke), 19: 133, 1937
in industry, prevention (Mayers), 20: 148, 1938
increase in basal metabolism and blood pressure after (Weil), 26: 55, 1944
judging heart injury after (Symanski), 21: 44, 1939
lesion of spinal cord after (Zipf), 20: 103, 1938
measures employed in France against (Kohn-Abrest), 22: 164, 1940
medico-legal aspect, effect on heart (Beck), 21: 69, 1939
methylene blue and other agents as antidotes in (Cooper), 18: 21, 1936
neurological symptoms in diagnosis of (Dibelius), 20: 79, 1938
neuropsychiatric sequelae (Roth and Harmas), 22: 143, 1940
new knowledge (Mueller), 21: 97, 1939
of heart (Parade and Franke), 22: 97, 1940
of insect larvae (Fleischmann, Lang and Pollaczek), 20: 62, 1938
or combined carbon monoxide and sulfur dioxide (Hetsel), 18: 126, 1936
Parkinsonism (Plath), 21: 69, 1939; (DeMarsier and Georgi), 24: 6, 1942
pernicious anemia in (Bergar and Grill), 19: 9, 1937
problems of nervous and mental sequelae in (Shilito and Drinker), 18: 65, 1936
questions in field of industrial hygiene (Ehrismann), 22: 54, 1940
subacute, with cerebral myelinopathy and multiple myocardial necroses (Neubuerger and Clarke), 27: 73, 1945
symptoms of (Lazareff, Pillmann and Gamburzewa), 18: 81, 1936
syndrome of parietooccipital region and symptomatic epilepsy (Scheller), 19: 153, 1937
testis and hypophysis in gassed rats (Patterson, Smith and Pickett), 21: 44, 1939
therapy in (Castroveili), 18: 30, 1936
treatment (Binet), 22: 78, 1940; (Thurnherr), 26: 117, 1944
treatment of two severe cases by blood transfusion (Koch), 23: 34, 1941
ultraviolet irradiation (Estler), 18: 51, 101, 1936
vascular reflexes (Kayser), 21: 69, 1939
whilst diving (Nimmo), 19: 8, 1937
with prolonged coma, followed by transitory psychosis, peripheral polyneuritis and recovery (Sanger and Gilliland), 22: 97, 1940
Carbon monoxide, pollution of air by Diesel engines (Maurin and Kling), 20: 187, 1938
postmortem demonstration of (Pieczarkowski), 19: 136, 1937
production in compressed air ranges (Brown), 25: 61, 1943
pseudo-hemoglobin, late detection of carbon monoxide poisoning (Barkan), 20: 177, 1938
public health hazard (Franklin), 22: 10, 1940
rate of elimination from blood (Breitenecker), 22: 96, 1940
recovery of poisoned monkeys under X-ray treatment (Cameron), 24: 54, 1942
removal from gases (Schuster), 24: 79, 1942
rôle in myocardial disease (Beck and Suter), 21: 4, 1939

Soviet cartridge respirators for (Glaskoff), 19: 137, 1937
spectrophotometric determination of iodine liberated in oxidation of, by iodine pentoxide (Smaller and Hall), 26: 104, 1944
testing Diesel mine engines with liquid gas (Ternes), 26: 31, 1944
tissue metabolism in (Lasar), 20: 47, 1938
toxicity and dangers (U. S. Public Health Service), 23: 92, 1941
tractor sickness (Paddy), 20: 15, 1938
underground, rôle of bacteria in elimination (Jones and Scott), 22: 21, 1940
uptake by normal men, rate of (Forbes, Sargent and Roughton), 27: 127, 1945
volumetric method for determination (Venturoli), 22: 85, 1940
Carbon tetrachloride (Bowditch), 25: 198, 1943; (Nat. Safety Council), 27: 73, 1945
active crystalline liver substance which protects against (Neale and Winter), 20: 101, 1938
acute nephritis from exposure to (Smith), 25: 150, 1943
acute nephritis from inhalation of (Vallery-Radot, Maurice and Donnart), 20: 182, 1938; (Simon), 22: 124, 1940
and benzene, effects on the organism (Mytnick), 24: 156, 1942
and chloroform, determination in air and soil by colorimetric method (Derosa and Pollard), 24: 17, 1942
and gum acacia, blood plasma proteins as influenced by liver injury induced by (Erickson, Heckel and Knutti), 21: 46, 1939
and phosphorus fatty livers, oxygen consumption and ketone body production in (Esser), 24: 155, 1942
and phosphorus oil, liver function in dogs poisoned with (Aubertin), 20: 101, 1938
and the liver (Brit. Med. J.), 26: 117, 1944
applications in medical therapy (Fasting), 26: 144, 1944
causative influences and clinical types of poisoning by, medico-legal viewpoint (Dervillée), 19: 221, 1937
chemico-toxicological study of (Ciaraviso), 18: 30, 1936
chloroform and phosphorus, phenol in blood in experimental poisoning by, and in mechanical injury to liver (Yanagihara), 21: 167, 1939
chloroform and trichlorethylene in blood, estimation of (Halgood and Powell), 27: 142, 1945
cirrhosis in relation to liver regeneration (Cameron and Karunaratne), 18: 102, 1936
cirrhosis of liver following chronic intoxication with, experimental study (Radhakrishna Rao), 19: 9, 1937
cirrhosis, vitamin A concentration in rat liver during recovery from (Haig and Post), 24: 94, 1942
compound, exposure to (J. A. M. A., Queries and Minor Notes), 25: 198, 1943
effect on cells of fetal rat produced by inhalation of, by mother during gestation (Briese), 20: 198, 1938
effect on circulation (Oelkers and Fiedler), 23: 179, 1941
experimental cirrhosis (Bollman), 20: 120, 1938
experimental hepatomas in mice (Edwards), 24: 38, 1942
experiments with "antinecrotic" material from liver (Barrett, McLean and McHenry), 21: 46, 1939
facts for ventilating engineer (Queensland), 25: 90, 1943
fatal intoxication after use as fire extinguisher (Castrovilli), 22: 8, 1940
fatal poisoning by (Hamperdinck), 18: 81, 1936
hazards in use of (Daubenspeck), 20: 14, 1938; (Sherman and Binder), 27: 7, 1945
in industrial hygiene (Easton), 25: 60, 1943
intoxication, chronic (Stewart and Witts), 26: 186, 1944
kidney and liver damage in rabbits on inhalation of (Vallery-Radot, Maurice, Donnart and Gauthier-Villars), 21: 12, 1939
mild narcosis with low concentrations (Heimann and Ford), 24: 12, 1942
nephrosis (Forbes), 27: 32, 1945
nephrosis due to (Smetana), 21: 167, 1939
phosgene content of smoke from Berger mixture (Esser), 21: 123, 1939
Carbon tetrachloride poisoning (Young), 18: 174, 1936; (Davis and Hanelin), 19: 83, 1937; (Perry), 21: 45, 1939; (Sanford), 26: 10, 1944; (Kouwaler and Noyes), 26: 164, 1944; (Lancet), 26: 164, 1944; (Gocher), 27: 56, 1945; (Whitwell), 27: 73, 1945
acute toxic nephrosis (Kugel), 27: 171, 1945
acute toxic nephrosis; clinical and laboratory study of case of (Corcoran, Taylor and Irvine), 25: 197, 1943
acute treatment of (Allison), 24: 156, 1942
and muscular atrophy (J. A. M. A., Queries and Minor Notes), 24: 55, 1942
effect of choline on fatty liver of (Barrett, Best, MacLean and Ridout), 22: 100, 1940
effect of food on liver fat of animals following (Dillard, Spence and Forbes), 26: 117, 1944
epidemic in parachute plant (Doyle and Baker), 26: 73, 1944
experimental, arterial and venous lipemia (Zoleeza), 19: 221, 1937
experimental, calcium administration (Cantarow, Stewart and Morgan), 20: 182, 1938
experimental, in rats; life span following prophylactic doses of colloidal lipoids (liposol) (Boericke and Wastl), 26: 94, 1944
experimental, ligation of single bile ducts (Stewart and Cantarow), 21: 140, 1939
fatal (Roseling), 24: 179, 1942
from p-dichlorbenzene and (Robbers), 20: 147, 1938
gastrointestinal disease in relation to (Gray), 27: 113, 1945
hepato-renal syndrome in (Schütz), 20: 120, 1938
in industry (Eddy), 27: 136, 1945
preliminary report on use of methionine in hepatitis (Eddy), 27: 171, 1945
protective action of xanthine against (Forbes and Outhouse), 22: 80, 1940
report of 20 cases with 1 death (Dillenberg and Thompson), 27: 171, 1945
simulation of acute abdomen (Graham), 20: 147, 1938
successful treatment of (J. A. M. A., Current Comment), 26: 117, 1944
treated with casein digest and methionine. I. Studies on hepatic dysfunction (Beattie, Herbert, Wechtel and Steele), 26: 193, 1944
sulfonamide drugs as protective agents (Leach and Forbes), 24: 95, 1942
sulfur metabolism. Studies on hepatic dysfunction, III. (Beattie, Herbert, Wechtel and Steele), 27: 73, 1945
with symptomatic toxic epilepsy, case (Hagen), 23: 50, 1941
Carbon tetrachloride polyneuritis; case report (Farrell and Senseman), 27: 31, 1945

observations on industrial dermatology (Foerster), 19: 46, 1937
Dermatitis, occupational (Lane), 21: 76, 1939; (Strandberg), 22: 61, 1940; (Foerster), 22: 169, 1940; (Gastineau), 24: 21, 1942; (Navison), 25: 180, 1943; (Morris), 27: 11, 1945
and related; abstracts from literature, 1935-39 (Schwartz and Warren), 24: 19, 1942; abstracts from literature, 1940-43 (Schwartz and Goldsmith), 27: 35, 1945
dermatoses, prevention of (Renato), 23: 62, 1941
dermatoses, teaching of (Klauder), 25: 202, 1943
due to parachlormetacresol (Guy and Jacob), 23: 189, 1941
diagnosis, prevention and treatment (Schwartz), 24: 76, 1942
following exposure to inorganic selenium compounds (Pringle), 26: 120, 1944
from heat decomposition of dyes (Schwartz and Hocker), 18: 114, 1936

in jute industry (Rao), 26: 190, 1944
incidence and causes in basic industries (Schwartz), 21: 77, 1939
outbreak in plant manufacturing hydrochloric acid (Schwartz), 26: 189, 1944
prevention and care (Mumford), 19: 92, 1937
recognition of (Lane), 25: 15, 1943
Dermatitis of hands among ditto machine operators (J. A. M. A., Queries and Minor Notes), 26: 58, 1944
of hands and feet, caused by rubber (Anderson), 27: 37, 1945
of hands, four commonest varieties (Cornbleet), 24: 120, 1942
oil (Asbeck), 24: 139, 1942; (Griffiths), 26: 57, 1944; (Mackenzie), 26: 58, 1944
oil, prevention in tool and machine shops (New York State Dept. of Labor), 23: 124, 1941
outbreak from hair lacquer (Schwartz), 26: 78, 1944
overtreatment (Gaul), 27: 95, 1945
petroleum; report of 2 cases (Rosenbaum), 25: 203, 1943
plant dermatoses (Schoenfeld), 19: 68, 1937
primrose, prevention with ammonia (Heimke), 21: 28, 1939
problems of proof in claims for recovery (Schwartz), 25: 163, 1943
properties of tung oil (Swancy), 20: 164, 1938
radio-, of hands with malignant degeneration (Cole and Driver), 22: 106, 1940
ragweed, among flour and grain industries (Jordan, Campbell and Osborne), 25: 16, 1943
"red mose" (Carson and Pratt), 25: 203, 1943
respirator (Petro), 24: 180, 1942
stomach (Bauer), 23: 18, 1941
"surgical glove" (Burgess), 23: 207, 1941
syphilis and its relation to industrial dermatoses (Schwartz and Markel), 25: 29, 1943
teak-wood (Jones), 19: 68, 1937
tetryl rash; review of investigations in Australian fuse-filling factories (Murray, Prunster and Anderson), 26: 119, 1944
textile (Davies and Barker), 26: 166, 1944
torch oil, relation to epidermomycosis (ringworm) (Kammer and Callahan), 20: 23, 1938
"tulip fingers" (Lancet), 18: 139, 1936
"tulip fingers"; ragweed (Caulfeild), 18: 115, 1936
vesicata and compensation (Mayers), 18: 184, 1936
zinc, hazard in air-craft industry (Freeman), 24: 182, 1942
Dermatologic aspects of vesicant war gases (Davis), 27: 16, 1945
Dermatology and industry (Downing), 27: 95, 1945
and the public health (Kleber), 26: 96, 1944
Dermatophytosis and occupational dermatitis (Downing), 26: 139, 1944
in industry (Peck, Botvinick and Schwartz), 27: 10, 1945
is it a significant occupational health problem? (Peck and Schwartz), 27: 158, 1945
Dermatoses incident to industrial and domestic occupations (Lain), 26: 139, 1944
industrial, new developments (Schwartz), 26: 165, 1944
new protective cream (Downing, Ohmart and Stebbins), 26: 166, 1944
occupational, causes of (Klauder), 26: 58, 1944
occupational, patch tests (J. A. M. A., Queries and Minor Notes), 27: 136, 1945
of the hands (Lane, Rockwood, Sawyer and Blank), 27: 176, 1945
soap versus industrial dermatoses (Leffingwell and Lesser), 26: 37, 1944
Dermographism, black (Urbach and Pillsbury), 25: 88, 1943

in production of fire-proof materials (Prockat), 20: 159, 1938
in rock drilling (New York State Dept. of Labor), 19: 178, 1937; 20: 128, 1938; (Engineering News Rec.), 20: 89, 1938; (Greenburg, Hatch, Burke and Harris), 22: 167, 1940
in rock-excavation (Hatch), 18: 181, 1936
in stone cutting, requirements (Hatch and Harris), 22: 60, 1940
in wet rock drilling, exhaust ventilation for (Hatch), 20: 26, 1938
industrial (Snyder), 25: 112, 1943
methods of (Leitch), 18: 135, 1936
mining practice in Tri-State district (Nicolson), 21: 125, 1939
Office, work in cooperation with German industrial companies (Lämmert), 20: 159, 1938
progress of industrial sanitation (Hatch), 19: 200, 1937
pulverizing silica sand (Wilhelm), 20: 161, 1938
system design, installation and operation (Kravath), 23: 155, 1941
system, maintenance (Frazier), 20: 207, 1938
use of concentrated calcium chloride solution (Galambos), 24: 141, 1942
when effective? (Bloomfield), 18: 28, 1936
with low resistance exhaust systems, I, II, III (Kravath), 23: 82, 83, 1941
Dust, cotton batting, report on workers exposed to (Smith), 24: 141, 1942
cotton, histamine in, and in blood of cotton workers (Haworth and Macdonald), 19: 199, 1937
count data with wet drilling and ventilation (Flinn and Miller), 21: 23, 1939
count technic in Tri-State mines (Chellson), 22: 150, 1940
counting cell, two-cavity (McCormick), 27: 142, 1945
counting, new ocular micrometer for (Page), 19: 230, 1937
counts, and their significance (Berns), 24: 163, 1942
counts, methods of (Berns), 24: 142, 1942
counts, minimizing possible errors (Richardson, Warren and Williamson), 27: 163, 1945
counts, significance of (DallaValle), 21: 200, 1939
dangerous (Hawes), 19: 157, 1937
deposit in human lungs of small particles suspended in air (Findeisen), 18: 39, 1936
Dust determination, advances (Blacktin), 25: 72, 1943
filter-paper method comparable to impinger results (Brown), 27: 64, 1945
guide book for recording particle counts and other information (U. S. Bureau of Mines), 27: 64, 1945
labyrinth apparatus, behavior and uses of (Wohlbier), 20: 186, 1938
midget microprojector (Brown), 27: 20, 1945
modification of Owens II counter for combined determination of suspended and precipitated dust (Abramovich and Shapiro), 18: 183, 1936
of components of heterogeneous mineral systems (Goldman and DallaValle), 21: 124, 1939
of leakage through clothing (Chachrina), 18: 111, 1936
photometric method (Cadden and Roetman), 21: 198, 1939
portable field colorimeter for industrial hygiene use (Thomas and Silverman), 24: 125, 1942
Dust disasters: consequences, causes and control of dust explosions (Price), 18: 49, 1936
Dust diseases and silicosis (Sayers and Jones), 18: 109, 1936
and silicosis, National Conference, 1936 (Zinsmer), 18: 109, 1936
cruising laboratory (New York State Dept. of Labor), 20: 87, 1938
new aspects and approaches to problem (Dernehl and Nau), 27: 169, 1945
of textile industry (Hurtado), 20: 106, 1938
Russia (Lancet), 25: 40, 1943
Dust, disperse systems in gases (Whytlaw-Gray), 19: 64, 1937
dispersion measurement by Owens dust counter, effect of moisture (Pick and Schurtschilow), 18: 28, 1936
dissemination, effect of angle of drilling (Brown and Schrenk), 20: 160, 1938
dissemination, relation to water flow through rock drills (Brown and Schrenk), 20: 199, 1938
dry, hygienic disposal of collected (Snyder), 25: 137, 1943
during operations at Mt. Weather testing adit (Johnson and Agnew), 22: 39, 1940

Dust—*Cont'd.*
early stages of lung reaction to (Akasaki), 19: 199, 1937
effect of exposure in mining and milling of pyrophyllite (Easom, Trice and Carpenter), 22: 38, 1940
effect of grinding on solubility and toxicity (Travers), 22: 38, 1940
effect of, on lighting in mines (Jones and Gyles), 19: 206, 1937
effect of precipitated silica and iron oxide on incidence of primary lung tumors in mice (Campbell), 23: 13, 1941
electric precipitator for trapping dust (Begoon), 26: 62, 1944
electrostatic action of flannel bag filtration (Fluggede-Smidt), 18: 99, 1936
elimination, cleaning of *air* and gas by thermal repulsion (Blacktin), 22: 60, 1940
elimination in the textile industry (Kufferath), 27: 120, 1945
excretion from lungs, radiographic studies of (Barclay, Franklin and Macbeth), 21: 53, 1939
excretion from lungs, roentgenographic studies of (Barclay, Franklin and Macbeth), 20: 183, 1938
Dust explosions (Modern Industry), 26: 126, 1944; (National Fire Protection Assn.), 27: 86, 1945
during grinding of synthetic resins (Keicher), 27: 66, 1945
hazards from powdered metals (Brown), 24: 23, 1942
hazards in handling aluminum, magnesium or zinc powder (Brown), 23: 126, 1941
industrial (Brown), 27: 102, 1945
industrial: causes and methods of prevention (Higiene y Seguridad), 24: 61, 1942
prevention by use of stone dust in German coal mines, report from hygienic standpoint (Bruns, Coelen and Ehrismann), 22: 65, 1940
protection of American coal mines by rock dusting (Forbes), 22: 65, 1940
safety codes for prevention of (U. S. Dept. of Labor), 18: 116, 1936
Dust, exposure to, and crusting of nasal mucous membranes (J. A. M. A., Queries and Minor Notes), 26: 72, 1944
extraction in modern gasworks (Drummond), 27: 161, 1945
ferric oxide, lung carcinoma after inhalation in youth (Dreyfus), 18: 152, 1936
ferromanganese, inflammability of (Bauer), 23: 127, 1941
filter for mine air (Adler and Rees), 18: 12, 1936
filter, new type (Monmouthshire and South Wales Coal Owners' Assn.), 25: 45, 1943
filter performance affected by dust feed, particle size and density (Rowley and Jordan), 21: 206, 1939
filter performance affected by kind of, rate of feed and air velocity (Rowley and Jordan), 20: 206, 1938
filters, testing (Neumann), 18: 168, 1936
filtration, nasal, improved method for determining (Lehmann), 19: 228, 1937
filtration, nasal, significance in asbestosis (Lehmann), 19: 228, 1937
free grinding (Schoeffler), 25: 162, 1943
free space surrounding hot bodies (Watson), 19: 65, 1937
from a hammer mill, catching (Ralston and Conley), 24: 58, 1942
from blasting, control by water mist (Brown and Schrenk), 20: 160, 1938
fumes, gases, vapors, poisonous, detection of (Weber), 18: 182, 1936
further lung-dusting experiments (Barclay and others), 25: 12, 1943
gas and vapor protection of workers in metal industry (Gerbis), 18: 83, 1936
geochemistry applied to problems of silicosis (Brammall and Leech), 19: 230, 1937
grain, respiratory diseases among grain handlers (Smith, Greenburg and Siegal), 23: 89, 1941
granite, methods for quantitation of impinger samples (Pool, Wuraftic and Kelly), 24: 80, 1942
grinding and sanding castings without (Iron Age), 23: 58, 1941
harmful industrial (Sayers), 20: 105, 1938
harmfulness for humans, measured by animal reactions (McCord, Fleming, Ainslee and Johnston), 19: 13, 1937
Dust hazard and control in mining (Harrington), 20: 51, 1938
and employer responsibility (Cummings), 18: 135, 1936
control, collection, in surface plants (Lynch), 21: 101, 1939
in ceramic whiteware industry (Merritt), 23: 183, 1941
in foundries, Australian (Ross and Shaw), 26: 92, 1944
in foundries, control (Osmond), 20: 20, 1938; (Trice), 22: 188, 1940; (Merritt), 23: 56, 1941
in foundries, industrial health hazards and employer responsibility (McConnell), 18: 94, 1936
in mechanical mining, data on controlling (Owings), 23: 152, 1941
in stone quarrying, dressing and manufacturing, properties of minerals and dusts (Hass), 20: 22, 1938
in tremolite talc mining; and roentgenological findings (Siegal, Ross and Greenburg), 25: 127, 1943
siliceous, industries in North Carolina involving (Easom and Trice), 19: 155, 1937
Dust, hospital; light as hygienic safeguard (Garrod), 26: 149, 1944
hydrolysis of rock-forming minerals (Brammall and Leech), 19: 176, 1937
implanted, response of pleural surfaces (Bradley and First), 21: 53, 1939
in air, continuous recorder (Jeppe and Halliday), 20: 109, 1938
in cement plants (Anselm), 21: 173, 1939
in coal mines; use of konimeter for assessing concentrations of airborne coal dust (Staton), 27: 85, 1945
in cotton spinning mill, chemical composition of (Ponomarenko), 18: 162, 1936
in factories making fireclay and silica bricks (Mansen and Büttner), 21: 99, 1939
in granite monument cutting in South Carolina (Brown), 22: 19, 1940
in hard headings and suppression (Graham and Walton), 21: 173, 1939
in industrial work, some data on (Harrington), 21: 199, 1939
in manufacture of refractory materials (Prockat), 20: 65, 1938
in milling of grain (Anguolo and Gallego), 21: 218, 1939
in mining processes (Patterson), 21: 217, 1939
in porcelain trimming, redesign of work booths to reduce dust count (Ceramic Industry), 20: 161, 1938; 21: 125, 1939
in steel foundries; methods of preventing production or inhalation of dust, and reducing use of materials containing free silica (Great Britain, Ministry of Labor and National Service), 27: 19, 1945
in stone and earth industry (Arbeitsschutz), 23: 77, 1941
incombustible, in prevention of coal-dust explosions (Smellie and Bryan), 20: 54, 1938
Dust, industrial, analysis of means of pneumatic separators (Romashov), 26: 125, 1944
and mortality from pulmonary disease (Lanza and Vane), 21: 169, 1939
and pulmonary inflammation (Replah), 27: 51, 1945
and pure mineral, physiological response of peritoneal tissue to (Miller and Sayers), 19: 40, 1937
aspects of disperse systems in air and gases (Lessing), 19: 45, 1937
control and collection. IV. Cloth collectors; V. Baffle-type collectors (Powers), 27: 41, 1945
disease due to inhalation of (Middleton), 18: 129, 1936
estimating toxicity of (Pravdin), 24: 161, 1942
examination of constituents (Stassens), 19: 15, 1937
further remarks on note on characteristic properties (Briscoe, Matthews, Holt and Sanderson), 20: 51, 1938
health injury from (Schuiz), 21: 216, 1939
identification of (Air Hygiene Foundation), 21: 22, 1939
investigations on quartz and sericite analysis (Sartorius and Jötten), 18: 54, 1936
new characteristic properties (Briscoe, Matthews, Holt and Sanderson), 19: 176, 228, 1937
physics and protection against (Goodall), 25: 21, 1943
pneumoconiosis (Hamlin), 26: 134, 1944
porous solid filters for sampling (Matthews, Holt, Sanderson and Briscoe), 19: 66, 118, 1937
respiratory protection (Telsky), 21: 28, 1939
response of peritoneal tissue to (Miller and Sayers), 23: 95, 1941
roentgenological examination of exact structure (Gärtner), 21: 199, 1939; 23: 77, 1941
sampling and analysis of (Bloomfield), 18: 87, 1936
sampling by the labyrinth apparatus (Briscoe, Matthews, Holt and Sanderson), 19: 229, 1937
Dust, inflammation of mucous membranes of air passages and stomach-intestinal tract in dusty occupations (Komant), 19: 13, 1937
influence on teeth of gem polishers (Schmittner), 21: 74, 1939
influence on tuberculous infection (Vorwald and Landau), 20: 18, 1938
inhaled, and composition of stone in relation to silicosis (Shaw), 21: 215, 1939
injurious, protection against, in industry (Kranenburg, Groeneveld and Boerma), 19: 88, 1937
injury, procedure in making an investigation (Telsky), 21: 22, 1939
intravenous injection of, experiments on pathologic tissue changes (Stoeckel), 19: 226, 1937
investigations in ceramic industry, I, II, III (Bloor, Goodall, Webb), 21: 147, 148, 1939
iron alloys, dangers arising from gas and (Jötten), 25: 81, 1943
iron, in lung (Humperdinck), 25: 64, 1943
laboratory studies in fan-abrasion problem (Lincoln), 23: 97, 1941
law of size distribution and statistical description of particulate materials (Roller), 19: 230, 1937
leakage, method of evaluating from air filters (Acheson and Shumaker), 24: 102, 1942
lime, prevention of skin irritation from (J. A. M. A., Queries and Minor Notes), 25: 43, 1943
limitations to the use of the konimete (Chubb), 25: 113, 1943
losses and smelter gas volumes, determination of (Christensen), 18: 10, 1936
lung function and X-ray pictures in legal estimation of lung damage (Schmidt, Gaubats and Holtzmann), 18: 8, 1936
lungs, systematic investigations. IV. Iron content of lungs of 131 workers in dusty trades (Gerstel), 25: 82, 1943
magnesium alloy, collected under water (National Safety News), 25: 71, 1943
masks, observations on (Lehmann), 18: 186, 1936
Dust measurement (Grundmann), 26: 20, 1944
and the silicosis problem, necessity of reliable methods (Hass), 19: 228, 1937
flue (Engel), 25: 72, 1943
gravimetric, tyndallmetric and konimetric (Faber), 20: 159, 1938
spectrophotometry for (Adamian-Adamov), 19: 15, 1937
tyndallmetric method and new apparatus (Berek, München and Schäfer), 19: 14, 1937
Dust, measuring the average particle diameter of powders, air permeation apparatus (Gooden and Smith), 23: 97, 1941
methods for control of hygienic exposures (Coburn), 21: 199, 1939
methods of allaying, in underground mines (Owings), 25: 91, 1943
methods of industrial hygiene procedure (Harrold), 21: 218, 1939
methods of measuring small amounts (Faber), 21: 101, 1939
microprojector for determining particle-size distribution and number concentration of (Brown and Yant), 18: 10, 1936
microscopic appearances of experimentally produced dust nodules in peritoneum (Miller and Sayers), 18: 24, 1936
Dust, mine, dispersability of (Tideswell and Wheeler), 20: 51, 1938
effect of aluminum on solution of (Rabson), 22: 38, 1940
experiments on wetting of (Bryan and Smellie), 19: 200, 1937
microchemical determination of free and combined silica (Rabson), 27: 84, 1945
micro-technique for size grading (Rabson), 27: 84, 1945
mineral composition of (Walker), 18: 55, 1936
notes on dispersability of (Tideswell and Wheeler), 21: 198, 1939
"Perminal W" and calcium-chloride treatment of haulage-roads (Price), 19: 231, 1937
prevention in mine workings (Brit. Med. J.), 18: 168, 1936
produced during drilling, prevention (de Silans), 18: 28, 1936; (Hilldick-Smith), 23: 36, 206, 1941
quantitative analysis of (Clark and Reynolds), 18: 54, 1936
reduction and suppression on machine cut faces (Monmouthshire and South Wales Coal Owners' Assn.), 25: 19, 1943
reduction at coal face (Jones), 25: 162, 1943
reduction near underground loading points (Graham, Skinner and Walton), 20: 90, 1938
reduction of (Graham), 19: 91, 1937

ST0851866

Dust, mine—*Cont'd.*
road, sampling of (Simpkin and Wild), 19: 178, 1937
road, treatment of (Hay and Tideswell), 18: 136, 1936
sampling with thermal precipitator (Patterson), 21: 217, 1939; 22: 150, 1940
Dust, mineral, action on connective tissue, studied with corneal biomicroscope (Policard and Rollet), 21: 173, 1939
mineral, reaction of body, with and without infection (Gardner), 20: 199, 1938
mineral, size frequency of particles (Green), 19: 14, 1937
mineralogic and physical properties of minerals and dusts with regard to dust hazard in stone quarrying and dressing (Hass), 20: 22, 1938
mixed, and particle size, influence on roentgen picture of industrial dust and dust in lungs (Gärtner), 22: 168, 1940
movement of, laboratory tests (Bryan and Smellie), 20: 187, 1938
nasal filtration of (Lehmann and Reichmann), 21: 100, 1939
nature and amount encountered in asbestos fabricating plants and effects on workers' health (Fulton and others), 18: 26, 1936
nodules in peritoneum, experimentally produced, microscopic appearance of (Miller and Sayers), 18: 24, 1936
of tarred roads, cancer of lung from (Valade), 21: 112, 1939
or gaseous impurities in air or in moving gases, method for determining (Guillet and Leclerc), 19: 17, 1937
or smoke particles, movement in temperature gradient (Cawood), 19: 65, 1937
particles, atmospheric, petrographic identification of (Foster and Schrenk), 20: 107, 1938
particles in flowing gases, self movement of (Glaser), 26: 105, 1944
passage of visible particles through blood capillaries and into lymph stream (Field and Drinker), 19: 69, 1937
phagocytosis of foreign material in lung (Robertson), 23: 80, 1941
photronreflectometer for measuring turbid systems (Libby), 20: 110, 1938
pneumoconiosis among mica and pegmatite workers (Dreessen, DallaValle, Edwards, Sayers, Easom and Trice), 23: 11, 1941
pneumoconiosis, pulmonary disease due to (Telsky), 20: 183, 1938
polarizing comparison microscope for use in petrographic measurements (Faust), 22: 188, 1940
precipitation, electrical (Waychess), 21: 56, 1939
prevention and elimination (Ceramic Industry), 19: 178, 1937
prevention by use of carbonate minerals (Dod and Lewis), 22: 129, 1940
prevention, design of paint spraying and sandblasting nozzles (Freudenthal), 20: 22, 1938
problem, air cleaning application (Heat. & Vent.), 26: 84, 1944
problem, solving (Ortman), 20: 161, 1938
produced with water sprayed on outside of drill steel (Johnson and Agnew), 22: 86, 1940
pulmonary diseases caused by (Easom), 25: 145, 1943
pumice, note on (Smith and Siegel), 22: 38, 1940
quartz, silica content of rabbits' blood after prolonged inhalation of (Schönfelder), 19: 43, 1937
quartz, study of lungs (Wiljus), 26: 71, 1944
reducing (National Safety News), 26: 84, 1944
removal from furnace gases (Howat), 25: 46, 1943
removal, fundamental factors in design of exhaust systems (Hatch), 18: 93, 1936
removal in foundry shake-out of large steel castings (Tanner), 24: 125, 1942
removal, insurance carrier and control of occupational diseases (Lamenso), 20: 187, 1938
removal, new electrostatic precipitator (Penney), 20: 21, 1938
respirator for use in industry (J. A. M. A., Foreign Letters), 20: 131, 1938
respirators (Smolczyk), 19: 90, 1937
-retaining ability of nose in asbestosis (Ehrhardt), 23: 120, 1941
-retention, nasal, in Mansfeld miners, its relation to silicosis (Lehmann), 19: 13, 1937
-retention, nasal, in Thomas slag workers (Lehmann), 19: 13, 1937
review of literature on effects of breathing dusts (Harrington and Davenport), 18: 159, 1936; 20: 18, 1938
road, freed from tar products, effects on incidence of primary lung-tumors in mice (Campbell), 19: 193, 1937
Dust sampling, Bureau of Mines midget impinger (Littlefield, Feicht and Schrenk), 20: 66, 1938
Bureau of Mines midget impinger (Schrenk and Feicht), 22: 19, 1940
by impinger, nomograms for computation of data (DallaValle), 21: 56, 1939
efficiency of impingers for collecting lead dusts and fumes (Littlefield, Feicht and Schrenk), 20: 186, 1938
for physical, chemical and petrographical examination, system for obtaining from mine air (Watson), 19: 67, 117, 1937
investigations, memorandum of committee on (Patterson), 19: 177, 1937
investigations, papers (Trans. Institute of Mining and Metallurgy), 20: 187, 1938
methods in Witwatersrand gold mines (Lambrechts), 23: 122, 1941; (Jeppe and Biccard), 24: 142, 1942; (Lambrechts), 26: 19, 1944
microprojection method for counting impinger samples (Brown, Baum, Yant and Schrenk), 20: 89, 1938
technic for routine use of konimeter (Littlefield, Brown and Schrenk), 20: 158, 1938
technic for use of impinger (Brown and Schrenk), 20: 186, 1938
with midget impinger with hand-operated pump (Littlefield and Schrenk), 20: 158, 1938
Dust, aerial examination of workers, use of miniature and full-size roentgenograms (Saupe), 23: 184, 1941; 24: 15, 1942
sericite and steel grinding, injurious effect on guinea pig lungs (Weiland), 20: 86, 1938
silica, at Hiwassee Dam (Hatch and Shaw), 23: 14, 1941
silica, in lung tissue, determination of, by fluorescent microscopy (Oberdalhoff), 21: 217, 1939
silica, rules relating to control of, in rock drilling (N. Y. State Dept. of Labor), 19: 166, 1937
silica, suppression and removal, in pottery industry (Great Britain, Ministry of Labor and National Service), 27: 63, 1945
siliceous, experimental cirrhosis of liver from injection of (Simson), 20: 85, 1938
siliceous, in roofing-coating industry, collecting and reclaiming, 22: 61, 1940
siliceous industrial, chemical properties of (Briscoe), 22: 86, 149, 1940

siliceous industrial, chemical study (Briscoe), 21: 100, 1939
the determination of invisible particles (Halberstadt), 23: 122, 1941
the distribution of ceramic powders determined by particle size air analyzer (Roller), 19: 199, 1937
the of abrasive powders, microprojection and sedimentation methods (Jones), 20: 158, 1938
smoke, fogs, clouds (aerosols) as problems relating science, economics and health (Lobse), 20: 128, 1938
standard air filter test (Rowley and Jordan), 22: 19, 1940
standards for analyzing concentration (U. S. Dept. of Labor), 21: 101, 1939
stone, of high dispersability (Hatternley and Tideswell), 25: 92, 1943
storms and their possible effect on health (Brown, Gottlieb and Labours), 18: 9, 1936
suppression and collection, use of cyclones (Smellie), 24: 141, 1942
suppression at coal face, use of water sprays (Monmouthshire & South Wales Coal Owners' Assn.), 27: 19, 1945
suppression by wet cutting at Sneyd Collieries (Cumberbatch and Terrell), 26: 103, 1944
suppression in Pittsburgh mines, investigation (Davis and Gardner), 25: 137, 1943

Explosion at Gresford, September 22, 1934, report (Iron and Coal Trades Rev.), 19: 138, 1937
at Markham No. 1 Blackshale colliery, 10th May, 1938 (Sandlands), 21: 58, 1939
gas and dust, in Mine No. 1, Pond Creek Pocahontas Co., Bartley, W. Va. (Ankeny, Glenn, McCall and Owings), 22: 159, 1940
gases, toxicology of (Baum), 23: 150, 1941
high school disaster of London, Texas (Smith), 19: 179, 1937
in gasoline tank, iron sulfide as cause (Könemann), 19: 28, 1937
Explosions and explosives, studies during fiscal year of 1943 (Huff), 27: 67, 1945
and fire hazards from flammable vapors, gases, liquids and dusts (Burke), 24: 186, 1942
and fires in coal and metal mines, United States, fiscal year ended June 30, 1943 (Harrington and Fene), 27: 67, 1945
and fires investigated to determine causes (Ford, Burke and Moskowitz), 23: 196, 1941
and gassing risks in cleaning, examination and repair of stills, tanks etc. (Great Britain, Ministry of Labor and National Service), 27: 22, 1945
coal dust, clinical picture of injuries (Ishiniahi), 20: 69, 1938
coal dust, from electric arcs (Thomas and Wheeler), 21: 127, 1939
coal dust, incombustible dust in prevention of (Smellie and Bryan), 20: 54, 1938
coal dust, tests of salt as substitute for rock dust in prevention (Greenwald, Howart and Hartmann), 23: 20, 1941
device for arresting (Allsop, Hartwell and Wheeler), 21: 179, 1939
dust, consequences, causes and control (Price), 18: 49, 1936
dust, during grinding of synthetic resins (Keicher), 27: 66, 1945
dust, report of committee on hazards (National Fire Protection Assn.), 27: 86, 1945
firedamp, electricity as cause of, in Ruhr mines (Ztschr. f. Gewerbehyg.), 19: 203, 1937
fires and accidents, from inflammable fluids, prevention of (Mints), 25: 93, 1943
from air-oxygen mixtures (Berger), 24: 24, 1942
gas, prevention by controlling oxygen concentration (Jones and Kennedy), 18: 14, 1936
hazards from metallic dusts (Brown), 24: 23, 1942
hazards in handling aluminum, magnesium or zinc powder (Brown), 23: 126, 1941
hazards in storage-battery rooms (Jones, Campbell, Dillon and Benson), 23: 20, 1941
hazards in use of acetylene in industrial occupations and preventive measures (Hansen), 19: 139, 1937
hazards in working magnesium alloys, preventive measures (Kremer and Rahe), 21: 58, 1939
hazards of auxiliary fans in coal mines (Harrington and Warnecke), 27: 120, 1945
hazards of soybean processing (Price and Brown), 18: 72, 1936
hygiene of stone dusting to prevent (Bruns, Cashn and Ehrismann), 22: 65, 1940
ignition of firedamp by incandescent electric lamps (Cotté), 19: 28, 1937
in acetylene generators, medium-pressure (Jones, Scott, Kennedy and Huff), 27: 67, 1945
in coal mines caused by smoking (Harrington and Parker), 23: 139, 1941
in collieries, marked reduction in toll of, through investigation and research (Iron and Coal Trades Rev.), 19: 139, 1937
in experimental mine in Gelsenkirchen (Schultes-Rhonhof), 20: 94, 1938
industrial dust (Brown), 27: 102, 1945
industrial dust; causes and methods of prevention (Higiene y Seguridad), 24: 61, 1942
inflammable vapor (Shotwell), 22: 23, 1940
inflammation of dust clouds (Wheeler), 19: 27, 1937
investigations of combustibles in Boston manholes in 1934 (Jones, Campbell, Goodwin and Yant), 18: 141, 1936
methane gas reserves and risk of shot firing in intensive coal mining (MacVie), 18: 189, 1936
naphthalene dust and fume (Gliwitzky), 21: 192, 1939
prevention of (Cohen), 25: 117, 1943
risk in compressed air systems (Matthews), 19: 165, 1937
static electricity in dry-cleaning processes (Hartshorn and Ward), 20: 209, 1938
tests of coal dust explosibility (Greenwald), 22: 65, 1940

treatment of coal dust in mines (Harrington), 22: 24, 1940
Explosives and explosions, studies on, during fiscal year of 1943 (Huff), 27: 67, 1945
and flammable liquids, gases, chemicals; national fire codes (National Fire Prevention Assn.), 26: 127, 1944
coal-mining, ignition of firedamp by (Payman and Wheeler), 20: 208, 1938
commercial blasting, methods for determination of toxic gases produced by (Suvorov), 26: 173, 1944
dermatitis from (Schwartz), 26: 140, 1944
effects of carbonaceous blasting accessories on gaseous products from (Holtz and Murphy), 25: 93, 1943
gases from, poisoning by (Schwarz), 22: 100, 1940
irritant, effects on the skin (Swanston), 26: 36, 1944
military, industrial hazards (Rogers), 24: 23, 1942
permissible, accident prevention by proper use of (Harrington and Howell), 18: 116, 1936
safety measure at Picatinny Arsenal (Larned), 27: 122, 1945
sheathed (Grimshaw), 24: 144, 1942
tetranitroesthane-hydrocarbon mixtures (Stettbacher), 25: 69, 1943
toxic reactions (Eddy), 26: 73, 1944
toxicology of (Nilsson), 25: 196, 1943
Eye-sight, faulty stereopsis in publishing industry (Radway), 25: 2, 1943
sight of workers, industry's obligation to protect (Davidson), 24: 60, 1942
strain in industry (Lancet), 22: 152, 1940
strain, relief of, on a fine assembly process (Mitchell), 19: 19, 1937
tests in the industries (Science), 23: 98, 1941
Eyes: Determination of carbon dioxide in air and in gas mixtures, 21: 200, 1939
Eyes *see also* Vision, Blindness
Eyes, accidents, industrial (Yanes), 21: 177, 1939
accidents, protection against (Great Britain, Factory Dept.), 21: 156, 1939
accidents, standards for industrial protective goggles (Sauerteig), 19: 138, 1937
action of light on, and occupational risks (Gaudara), 22: 63, 1940
and eyelids, injuries of (Kirby and Town), 26: 145, 1944
anterior segment contusion syndrome (Davidson), 25: 108, 1943
arc flash conjunctivitis; actinic conjunctivitis from electric welding arc (Rieke), 25: 173, 1943
artificial silk keratitis (Rankine), 18: 137, 1936
biochemistry of the lens; pathogenesis of electric cataract (Bellows and Chinn), 24: 60, 1942
Eyes, burns, acid or alkali (Middleton), 18: 122, 1936
application of cod-liver oil (Tichova), 23: 208, 1941
caused by exposure to electric welding, formation of hole in macula (Wördemann), 19: 20, 1937
caused by lewisite (Cogan), 25: 156, 1943
caused by lime (Torres Estrada), 23: 125, 1941
caused by lime, use of rabbit peritoneum to prevent severe effects (Brown), 24: 60, 1942
caused by poison gas, treatment (J. A. M. A., Queries and Minor Notes), 25: 44, 1943
ultraviolet (J. A. M. A., Queries and Minor Notes), 24: 114, 168, 1942
Eyes, Canadian Ophthalmological Society meeting, standards for various types of work (Canadian Med. Assoc. J.), 21: 28, 1939
cancer of eye and adnexa, relation to occupation (Lane), 19: 118, 1937; 21: 178, 1939
casualties treated on hospital ship (Schenck, Silcox and Godfrey), 26: 146, 1944
Eyes, cataract *see also* Cataract
Eyes, cataract and the photographic industry (J. A. M. A., Queries and Minor Notes), 25: 40, 1943
cataract caused by electricity (Connole), 19: 20, 1937; (Djacos), 19: 20, 1937; (Kaßel), 22: 44, 88, 1940
cataract caused by shock of electric current (Borsellino), 18: 41, 1936
cataract, exogenous (Rauch), 23: 16, 1941
cataract in the glass industry (Pluhar), 23: 161, 1941
cataract, traumatic, special reference to chain-making industry in Staffordshire (Roberts), 25: 173, 1943
changes in intraocular tension caused by measured muscular activity in dogs (Ershkovich and Shevalev), 20: 187, 1938
changes in retina in chronic lead poisoning (Lobeck), 18: 100, 1936
chemical burns (Moss), 19: 47, 1937
chemical burns, first aid in (Kaplan), 18: 149, 1936
chemical burns, improved treatment for (Oaks), 27: 139, 1945
chemical burns, therapy (Dashevskii and Marmorstein), 23: 188, 1941
chemical injuries: treatment (Whalman), 25: 207, 1943
chemical injury of cornea in camphor factory (Matsuoka), 26: 101, 1944
color perception in the transportation industry (Kagan-Bernstein), 18: 40, 1936
color sense in dyers (Arnold), 20: 92, 1938
compensation for ocular injuries in the U. S. (Davidson), 27: 185, 1945
condition of, in workers with synthetic rubber (Pitman), 18: 166, 1936
conjunctivitis of presumed virus causation in shipyard (Ricke), 24: 182, 1942
corneal inflammation from hydrogen sulfide in caisson workers (Hartmann), 20: 47, 1938
corneal injuries in relation to vitamin A (Clarkson), 26: 122, 1944
corrosions, old and new precepts (Thies), 24: 61, 1942
course of dark adaptation in oxygen deficiency (Bunge), 19: 163, 1937
detection and control of defective vision in industry (Reid), 25: 207, 1943
dimethylsulfate poisoning in relation to ophthalmology (de Grave), 19: 196, 1937
disease appearing in underwater caisson workers (Barbat and Bastion), 19: 68, 1937
disease caused by hydrogen sulfide in viscose-artificial silk industry (Hortsch), 19: 94, 1937
disease in artificial silk factories (Akagi), 22: 132, 1940
droplet precipitation on corneal surface in furniture workers (Böcklers), 20: 64, 1938
economic importance of visual disability in industry (Greenburg), 23: 124, 1941
edema of the cornea in hydrocyanic poisoning (Amsler), 22: 33, 1940
effect of fluoroscopy (J. A. M. A., Queries and Minor Notes), 25: 38, 1943
effect of oxygen at pressure of three atmospheres (Behnke, Forbes and Motley), 18: 90, 1936
effect of red light on photographers (Natanson and Vinogradov), 19: 21, 1937
effect of sand, alabaster and cement (Machlin), 24: 22, 1942
effect of sulfur chlorides on (J. A. M. A., Queries and Minor Notes), 21: 15, 1939

industrial cataracts (Roberts), 25: 173, 1943
industrial dermatoses of eye specialists (Kashauskas), 19: 234, 1937
industrial eye health problems (Kuhn), 26: 16, 1944
industrial eyestrain, measures needed where fine work is done (Great Britain, Dept. of Factories), 21: 56, 1939
industrial ophthalmology (Snell, Culler and Kuhn), 24: 106, 1942
Eyes, injuries at aircraft plant (Callahan), 27: 118, 1945
calcium crystals in cornea after erosion with calcium (Lisch), 24: 137, 1942
caused by acridin among coal workers (Leopoldsberger), 23: 123, 1941
caused by electricity (Fisher), 24: 41, 1942
caused by sap of Euphorbia peplus (spurge) (Hartmann), 22: 169, 1940
cost of (U. S. Dept. of Labor), 24: 77, 1942
difficulty in estimation for accident insurance (Zabor), 18: 46, 1936
first-aid (Town), 25: 108, 1943; (Dickson), 26: 81, 1944; (Whitney), 27: 139, 1945
in industry, determination of disability (Sherman), 27: 61 and 118, 1945
in steel plant (Tanaka), 20: 92, 1938
Eyes, injuries, industrial (Minton), 20: 208, 1938; 21: 78, 193[illegible]; (Gawler), 22: 132, 1940; (Walker and Austen), 23: 124, 1941; (Archer-Hall), 23: 188, 1941; (Phelan), 24: 59, 1942; (MacNalty), 24: 105, 1942; (Sutton), 25: 156, 1943; (Sherman), 26: 193, 1944; (Dickson), 27: 61, 1945
and domestic (Clark), 26: 81, 1944
caused by flying objects (Fisher), 27: 117, 1945
in one-eyed (Yanes), 19: 124, 1937
prevention (Minton), 19: 47, 1937
problem of simulation (Vila Ortiz), 25: 108, 1943
procedures and appliances in treating (Clark), 26: 16, 1944
treatment (Osburn), 27: 99, 1945
Eyes, injuries, late recovery from severe ocular injury (Tumarkina), 27: 80, 1945
management of (Hughes), 26: 145, 1944
medicolegal considerations in workmen's compensation for (Sens), 18: 46, 1936
penetrating wounds of the eye-ball in industry (Phelan), 24: 190, 1942
perforating (Snell), 27: 118, 1945
perforating, penicillin in treatment of (Scobee), 27: 139, 1945
shipyards (McElroy and Svenson), 26: 122, 1944
survey of 2000 industrial (Collier), 26: 169, 1944
treatment and care of common (Martin), 26: 122, 1944
Eyes, injury by hydrogen sulfide in refinery (Lichtner), 20: 188, 1938
instrument for removal of foreign body from cornea (Harding), 25: 188, 1943
keratitis associated with exposure to n-butyl alcohol (butanol) (Cogan and Grant), 27: 113, 1945
keratitis, study of 84 cases fitted with contact lenses (Mann), 27: 39, 1945
Eyes, keratoconjunctivitis, actinic (Scobee and Grilley), 26: 169, 1944
control measure recommended for industry (Heiman), 26: 6, 1944
epidemic (Sanders, Gulliver and others), 25: 94, 1943; (Kuh), 25: 85, 1943; (U. S. Public Health Service and Com. of Ophthalmology of the A.M.A.), 25: 177, 1943; (Brit. Med. J.), 25: 155, 1943; (Carlisle and Sherman), 25: 155, 1943; (Bedell), 26: 33, 1944; (Bach), 26: 34, 1944; (Wold), 26: 71, 1944; (Millington), 26: 134, 1944; (Curry and Lowell), 27: 29, 1945; (Braley), 27: 91, 1945
epidemic and herpetic, isolation and identification of causative agent (Maumenee, Hayes and Hartman), 27: 169, 1945
epidemic; case report with systemic manifestations (Curry and Lowell), 26: 183, 1944
epidemic; correlation of epidemiologic data and results of serum virus neutralization tests (Korns, Sanders and Alexander), 26: 160, 1944
epidemic; Detroit experience (Molner and Cooper), 26: 160, 1944
epidemic; distribution in the U. S. (Bedell), 26: 71, 1944
epidemic, epidemiology of (Perkins, Korns and Westphal), 26: 6, 1944
epidemic, from subjective viewpoint (Allen), 26: 71, 1944
epidemic, treatment of; preliminary report of 10 cases (Braley and Sanders), 25: 106, 1943
epidemic, treatment with sodium sulfathiasole dexoxyephedrine (Gradle), 25: 173, 1943
flash, infra-red therapy (Cogan, Kinsey and Drinker), 26: 33, 1944
infectious, added to manual of "Control of Communicable Diseases" (U. S. Public Health Service), 25: 107, 1943
Eyes, lead amaurosis (Neuman), 19: 119, 1937
manifestations in patient with meningotyphus of swineherds (Babel), 21: 177, 1939
manifestations of head injuries (Lyle), 26: 37, 1944
medical aspects of aviation (Cargill), 21: 56, 1939
mercurialism, colored reflex from anterior capsule of lens in (Atkinson), 26: 6, 1944
miller's nodule on upper eyelid (Ludwig), 18: 41, 1936
methyl alcohol poisoning, pathology of (Fink), 27: 58, 1945
mustard gas lesions, in eyes of rabbits and men (Mann and Pullinger), 25: 201, 1943
new method for determining night blindness (Metcalfe), 23: 17, 1941
night vision (Solandt and Best), 25: 170, 1943
nonsurgical aspect of ocular war injuries (Cordes), 26: 15, 1944
nursing care of, in industry (Mumford), 27: 40, 1945
occupational acrichinin keratitis (Kaplan and Lapidus), 21: 127, 1939
occupational cancer and injury to, caused by tar, coal, pitch, oils and paraffin (Méd. du travail), 21: 220, 1939
occupational diseases and injuries of, and workmen's compensation (Gardner), 20: 25, 1938
occupational diseases of, during 20 years of Soviet (Iofe and Kaplan), 20: 187, 1938
occupational injury with bobbin (Plitas), 21: 127, 1939
occupational keratitides and corneal dystrophies (Davidson), 22: 23, 1940
ocular affections in alimentary arsenic poisoning (Chepurin), 18: 139, 1936
ocular changes induced by hydrogen sulfide (Sjögren), 21: 220, 1939
ocular disease caused by pitch (Peloruskaia), 19: 119, 1937
ocular disturbance caused by motor gas (Koslowski), 21: 9, 1939
ocular effects of altitude flying and deep sea diving (Carson), 27: 143, 1945
ocular injuries in soda factory at Slavinsk and prophylaxis (Buscmich), 18: 140, 1936
ocular lesions caused by light and radiation (Giovanni), 21: 177, 1939
ocular lesions following electric flash (Baratta), 19: 20, 1937
ocular problems of war workers (Ade), 26: 169, 1944
ophthalmia caused by electricity as an industrial accident (Avalos), 21: 103, 1939
optic neuritis and meningeal spirochetosis (Levy-Valensi, de Seze and Teyssier-Commenoo), 21: 189, 1939
organic compounds, ocular pathology due to (Pike), 27: 32, 1945
orthoptic training for aviators (Schwichtenberg), 21: 28, 1939
paracentesis in treatment of chemical ocular burns (Bereznikaja), 21: 126, 1939
particle remover, new (Biederman), 24: 106, 1942
particles of steel within the globe of (Gulliver), 25: 188, 1943
pentachlorophenol, irritation from (J. A. M. A., Queries and Minor Notes), 27: 74, 1945
perforating corneal wound, treatment with penicillin and sulfadiazine (Sanders), 27: 100, 1945
performance and question of fitness for defense service (Velhagen), 20: 53, 1938
photophthalmia, treatment of, following exposure to rays of welding arc (Benson), 25: 156, 1943
priceless possessions (Greenburg), 22: 87, 1940
problems in industry (Holt), 26: 169, 1944
protection in defense industries (Haller), 25: 25, 1943
protection of, regulations (Great Britain, Dept. of Factories), 21: 157, 1939
protective equipment for, in industry (Allen and Carmen), 23: 126, 1941
protective glasses for subduing contrasts, comparison of Umbral and Neophan (Hartinger), 23: 100, 1941
reaction of lens and cornea to infra-red rays (Bakker), 22: 108, 1940
recent developments in prevention of blindness program (Bigelow), 27: 26, 1945
relation between foveal visual acuity and illumination under reduced oxygen tension (McFarland and Halperin), 23: 19, 1941
relation between refraction, vocation, and vocational selection (Bereznikaia), 18: 166, 1936
relief of eyestrain on fine assembly process (Mitchell), 19: 19, 1937
removal of intraocular foreign body (Minsky), 26: 146, 1944
removal of metallic foreign bodies from eyeball and orbit (Spaeth), 25: 135, 1943
removal of non-magnetic foreign body from the ciliary region (Pierse), 26: 81, 1944
requirements in officially and federally controlled services (Velhagen), 20: 54, 1938
retinitis in stokers (Lyritzas), 19: 162, 1937
retrobulbar neuritis and amblyopia caused by poisons (Terrien), 20: 125, 1938
safety glass program (Tisher), 27: 165, 1945
scarring and shrinking of conjunctiva as industrial injury in dyers (Brückner), 24: 138, 1942
sclero-keratitis following phosphorus injury (Lyle and Cross), 25: 17, 1943
shield for use in industry (Sharp), 19: 47, 1937

conductivity, gas analysis by measurement of; physical prerequisites (Lieneweg), 27: 85, 1945
control of indoor environment in tropics (Crowden and Angus), 21: 82, 1939
cooling workers in hot industry (Houghton, Ferderber and Gutberlet), 24: 63, 1942
cramps, first aid (Buchanan), 25: 161, 1943
desert climate: physiologic and clinical observations (Ladell, Waterlow and Hudson), 27: 70, 1945
disease, clinical aspects (Collings, Shoudy and Shaffer), 26: 39, 1944
disease in man, pathogenesis (Schlegel and Böttner), 24: 36, 1942
disease, statistics of 265 cases (Bordon, Waddill and Grier), 27: 167, 1945
dry, cardiovascular adjustments of man in rest and work during exposure to (Taylor, Henschel and Keys), 25: 191, 1943
effect of cooling isolated parts on comfort of man resting in hot, humid environment (Burch and Sodeman), 27: 48, 1945
effect of exercise in hot atmospheres on pulse rate (Lee and Boissard), 23: 100, 1941
effect of hyperthermias on distribution of water and electrolytes in brain, muscle and liver (Yannet and Darrow), 20: 113, 1938
effect of salt deficiency in man (McCance), 20: 133, 1938
effect of salt-sugar drinks on metabolism in high temperatures (Mittelstedt, Blinova, Novakovskaia and Sverdlova), 18: 63, 1936
effect of sun stroke on central nervous system (Schmidt), 23: 110, 1941
effect of sustained muscular effort in hot climate on loss of fluids and chlorides (London), 21: 81, 1939
effects on lungs of breathing through narrow orifice (Hill), 18: 190, 1936
electrical thermal storage (Rhodes and Reed), 18: 190, 1936
end organs, stimulation by temperature changes (Oppel and Hardy), 19: 237, 1937
Heat exchange and regulation in radiant environments (Winslow, Gagge and Herrington), 23: 42, 1941
between air and water; use of water-air chart for solving problems (Goodman), 23: 160, 1941
of man in desert (Adolph), 20: 210, 1938
of man with his environment, practical system of units for description of (Gagge, Burton and Bazett), 25: 28, 1943
Heat exhaustion, experimental, effect of sodium chloride intake on work performance during exposure to dry heat (Taylor, Henschel, Mikhail and Keys), 26: 47, 1944
exhaustion, experimental, peripheral type of circulatory failure (Keetoo), 22: 118, 1940
flow into tunnels (Gock and Patterson), 23: 63, 1941
humid, cardiac output in rest and work in (Asmussen), 23: 42, 1941
humid, salt economy in (Daly and Dill), 19: 146, 1937
hyperpyrexia (Saffert), 19: 102, 1937
in industry, adaptation to (Lehmann and Szakall), 20: 56, 1938
inhaled, effects on air passages and lungs; experimental investigation (Morita, Henriques and McLean), 27: 109, 1945
instruments and methods for recording thermal factors (Yaglou), 18: 93, 1936
L. Hill's nasal reflex and thermoregulatory skin reflexes (Lehmann), 21: 129, 1939
Heat loss and efficiencies of fuels in residential heating (Sherman and Cross), 19: 122, 1937
determination of radiation and convection exchange by partitional calorimetry (Winslow, Herrington and Gagge), 19: 70, 1937
effect of water intake on reactions to reduced cooling power (Gregory and Lee), 19: 29, 1937
from clothed body, influence of air movement upon (Winslow, Gagge and Herrington), 22: 66, 1940
from cylindrical moist body, influence of air movement and atmospheric conditions (Canny and Martin), 21: 206, 1939
human, hygroscopic properties of clothing in relation to (Nelbach and Herrington), 25: 27, 1943
linearity criterion applied to partitional calorimetry (Gagge), 19: 70, 1937
new method of partitional calorimetry (Winslow, Herrington and Gagge), 19: 70, 1937
through tiled roofs (Beckett), 19: 3, 238, 1938; 21: 83, 1939
through windows (Ruedy), 20: 30, 1938
Heat, measurement of environmental warmth (Belford), 20: 55, 1938
narrowing of air tubes of lung produced by dry warm conditions (Hill), 18: 189, 1936
observations on paper by G. von Schlichting (Liese), 25: 169, 1943
pathological reactions produced by work in hot moist humid environment in Witwatersrand gold mines (Dreosti), 19: 203, 1937
performance in relation to environmental temperature. Reactions to hot, humid environments (Eichna, Bean, Ashe and Nelson), 27: 108, 1945
permissible working time in high temperatures and humidities (Ehrismann and Hasse), 20: 189, 1938
physiologic effects of high temperature (Macht), 27: 48, 1945
physiological fatigue from exposure to (Ferderber, Houghten and Fleisher), 24: 88, 1942
Physiological fitness for the desert (Adolph), 26: 1944
physiological reactions applicable to workers in hot industries (Houghten, Gutberlet and Ferderber), 25: 124, 1943
plasma and cells during experimental salt deficiency (McCance), 20: 93, 1938
production, nutrition and growth in man (Pemberton), 20: 113, 1938
radiation as cause of skin pathology: genesis of skin cancer (Wanlek), 24: 22, 1942
reactions of human body to physical environment (Brunt), 26: 179, 1944
reactions to high effective temperatures (Fleisher and others), 21: 205, 1939

Heat regulation and blood temperature (König), 26: 179, 1944
and muscular work (Liberson), 21: 30, 1939
during active work (Nielsen), 20: 28, 1938
exchanges of energy between body and environment (Sheard and Williams), 19: 181, 1937
Heats of human (Newburgh, Herrington and Gagge), 27: 48, 1945
physiological reactions and sensation of pleasantness under varying atmospheric conditions (Winslow, Herrington and Gagge), 20: 165, 1938
Heat, relative roles of extremities in body heat dissipation; normal circulation and peripheral vascular disease (Sheard, Roth and Horton), 21: 181, 1939
relief (Smith), 25: 192, 1943
requirements of buildings, effect of weather conditions on (Dufton), 20: 30, 1938
requirements of single-glazed and double-glazed test houses (Carr and others), 21: 32, 1939
retaining properties of clothing computed on physiological basis (Angus), 19: 70, 1937
salt tablets for, possible overdosage (J. A. M. A., Queries and Minor Notes), 20: 4, 1938
seasonal variation in reaction to hot atmospheres (Houghten, Rosenberg and Ferderber), 22: 109, 1940
sensitivity of body to, and spatial summation of end organ responses (Hardy and Oppel), 19: 237, 1937
sickness, experimental study of stimulants in prophylaxis of (Schlegel and Böttner), 26: 180, 1944
significance of fluids and chloride in efficiency of workers in hot trades (Lehmann and Szakall), 20: 56, 1938

or suicide by veronal? (Palmiere), 18: 107, 1936
treatment (Wirth), 20: 43, 1938
value of methylene blue in therapy of carbon monoxide and (Ztschr. f. Gewerbehyg.), 20: 15, 1938
Hydrogen cyanide, quantitative determination of (Moeller and Stefansson), 19: 159, 1937
vapor, detection of toxic gases (Great Britain, Dept. of Scientific and Industrial Research), 20: 203, 1938
Hydrogen fluoride alkylation plants, safety in operation of (Benson), 27: 82, 1945
exposure (Benson), 26: 74, 1944
Hydrogen ion concentration of skin in workers (von Czetsch-Lindenwald), 24: 21, 1942
Hydrogen peroxide, aerosol (Abramson), 25: 48, 1943
Hydrogen selenide, exposure to (Dudley and Miller), 20: 13, 1938
poisoning by (Senf), 24: 91, 1942

Review, 19, 349 (1937)

Hydrogen sulfide and cadmium, ventilation and atmospheric pollution (American Public Health Assn.), 26: 18, 1944
and carbon dioxide, resorption through skin (Schmid), 19: 160, 1937
and carbon disulfide, apparatus for measuring and recording (Stackhouse and Reynolds), 24: 102, 1942
and carbon disulfide hazards in viscose rayon industry (Pennsylvania Dept. of Labor and Industry), 21: 45, 1939
and carbon disulfide in viscose rayon plant, determination of (Frauenhof), 18: 134, 1936
and carbon monoxide poisoning in industrial processes and protection against them (Neitzel), 23: 145, 1941
and mercaptan sulfur in gases and aqueous solutions, rapid determination of (Shaw), 23: 16, 1941
and sulfur dioxide, determinations of small concentrations in air (Gurevich and Vendt), 19: 135, 1937
arsine and stibine; accidental generation in a metal refinery (Dernehl, Stead and Nau), 26: 137, 1944
arsine and stibine mixture; accidental industrial poisoning (Nau, Anderson and Coee), 26: 137, 1944
as mining hazard (Segal), 18: 178, 1936
automatic detection and control of (Clough), 27: 84, 1945
cause of eye diseases in viscose-artificial silk industry (Hertsch), 19: 94, 1937
changes in the reactivity of the body due to (Pavlenko), 24: 92, 1942
detection by lead acetate paper (Johnson and Colegrave), 22: 190, 1940
detector (Behrens), 22: 129, 1940
effect of humidity on toxicity of (Susman), 18: 178, 1936
effect of prolonged breathing in dogs (Moser), 24: 11, 1942
gas, angina pectoris after breathing (Hellfors), 21: 138, 1939
gas, source of industrial hazard (Robinson, Camp and Chamberlain), 24: 179, 1942
in air, colorimetric determination (Smirnov), 20: 22, 1938
in air, photocolorimetric determination of, as copper sulfide (Kastner), 22: 129, 1940
in caisson workers, corneal inflammation (Hartmann), 20: 47, 1938
in coal gas, instrument for indicating and recording traces (Reed), 20: 162, 1938
in the organism, kinetics of oxidation (Tichomravov), 27: 53, 1945
injury of eye by, in refinery (Lichtaer), 20: 188, 1938
methods for detection of toxic gases in industry (Great Britain, Dept. of Scientific and Industrial Research), 19: 201, 1937
micromethod for nephelometric determination by photoelement (Prinin and Smolyanskaya), 22: 85, 1940
occupational dangers (Rodenacker), 23: 146, 1941
ocular changes induced by (Sjögren), 21: 220, 1939
photocolorimetric method for determining small concentrations of (Suslova), 25: 47, 1943
Hydrogen sulfide poisoning, acute (Gunina), 27: 55, 1945
chronic, in dogs (Moser), 23: 119, 1941
fatal, in settling plant of paper mill (Lange), 18: 49, 1936
in cleaning sulfuric acid tanks (Bauer), 22: 10, 1940; 23: 119, 1941
in viscose rayon industry (Hamilton), 22: 180, 1940
incipient, eye inflammation only symptom (Howes), 27: 10, 1945
primary methods to safeguard against (Illinois Labor Bull.), 25: 12, 1943
protective substances in (Malov, Nikolaev and Rudenko), 20: 178, 1938
Hydrogen sulfide produced by bacteria in lead mine (Edington), 21: 138, 1939
recorder (Stackhouse), 22: 85, 1940
sodium nitroprusside test papers for detection of sulfur dioxide and (Sciacca and Solarino), 23: 206, 1941
sulfur dioxide, ammonia, chlorine, hydrogen cyanide gases, toxicity of (McCallan, Setterstrom and others), 23: 52, 1941
sulfur dioxide and carbon disulfide, combating and removal of, from staple fiber and rayon mills (Vihlein), 27: 41, 1945
toxicity and dangers (U. S. Public Health Service), 23: 180, 1941
Hydrolysis of rock-forming minerals (Brammall and Leech), 19: 176, 1937
Hydroquinone, monobenzyl ether of, occupational leucoderma (Schwartz, Oliver and Warren), 22: 192, 1940
Hydroselenic acid (seleniuretted hydrogen) (Staessens), 22: 81, 1940
Hygiene and medicine, industrial (Martuscu), 23: 44, 1941
coordination in modern industrial practice (Sappington), 27: 177, 1945
problems (Probst), 27: 37, 1945
scope of (Cunningham), 27: 26, 1945
Hygiene and medicine, occupational; its role in Britain in wartime (Merewether), 25: 55, 1943
Hygiene and sanitation, industrial; protecting plant manpower (U. S. Dept. of Labor), 23: 135, 1941
Hygiene, industrial (Greenburg), 22: 174, 1940; (Sayers), 23: 2, 1941; (National Institute of Health), 23: 43, 1941; (Pinto and Bowditch), 24: 112, 1942; (Petrie), 26: 90, 1944
activities in the Public Health Service (Townsend), 25: 119, 1943
activities in the United States (Sayers and Bloomfield), 19: 32, 1937
activities of state and local services in a war year (Trasko), 25: 189, 1943

Jaundice *see also* **Weil's disease** *and* **Leptospirosis**

Jaundice, correlation of icterus index (acetone precipitation method) with quantitative serum bilirubin (Sterner and Cusack), 27: 116, 1945
- in tin works, epidemic hepatitis (Holm), 21: 67, 1939
- infectious, epidemic (Wilhelm), 24: 72, 1942
- infectious, epidemic, methylene blue test in (Gellis and Stokes), 27: 169, 1945
- infectious, epidemiology and laboratory diagnosis (Molner and Kasper), 24: 72, 1942

Jaundice, leptospira icterohaemorrhagiae, treatment with immune serum of young white mice, infected with (Larson), 25: 67, 1943

Jaundice, leptospiral, as an occupational hazard (Stiles and Sawyer), 24: 52, 1942
- cases (Deubel), 24: 34, 1942; (White and Prevost), 24: 35, 1942; (Rathbun and Wagbeistein), 24: 36, 1942; (Wilen, Snavely and Bruno), 24: 71, 1942; (Lester, Denison, Posey and Tate), 24: 173, 1942; (Balkin), 26: 94, 1944
- clinical and laboratory diagnosis of (Raves), 24: 72, 1942
- epidemiological features, Baltimore (Ward and Turner), 24: 116, 1942
- Honolulu (Alicata and Breaks), 25: 185, 1943
- New York City; serological survey (Tiffany and Martorana), 24: 172, 1942
- Weil's disease (Hoagland, Harris and Chinen), 25: 185, 1943
- Weil's disease, positive agglutination in suspected cases (Packchanian), 24: 36, 1942

Jaundice, spirochetal (Great Britain, Home Department), 19: 18, 1937; (N. E. Med. J.), 19: 105, 1937; (Bloom and Walker), 23: 143, 1941; (Bruno, Wilen and Snavely), 26: 30, 1944
- among coal miners (Swan and McKeon), 18: 11, 1936; (Alcay and Sollier), 20: 143, 1938; (Magnin), 21: 113, 1939; (Rees), 21: 135, 1939
- among coal miners in Northumberland and Durham (Swan and McKeon), 20: 79, 1938
- among coal miners in west of Scotland (Stewart), 21: 189, 1939
- among fish workers (Smith and Davidson), 18: 164, 1936; (Davidson), 20: 143, 1938; (Glotzer), 21: 7, 1939; (Elton), 21: 135, 1939
- among Saar coal miners (Krauss), 21: 66, 1939
- among sewer-workers (Maxwell), 18: 11, 1936; (Stuart), 21: 113, 1939
- as compensable disease (Martin), 20: 143, 1938; (Great Britain, Secretary of State), 22: 136, 1940
- as occupational disease (J. A. M. A., Foreign Letters), 20: 41, 1938; (Martin), 23: 142, 1941
- caused by leptospira sejroe with meningitis and paralysis (Mortensen), 21: 163, 1939
- diagnosis of, in Virginia (Reid and Holt), 24: 36, 1942
- epidemiology of (Alston and Brown), 19: 149, 1937; (Hougardy), 21: 42, 1939
- experimental studies (Ono), 21: 42, 1939
- fatal case of Weil's disease (Gardner), 23: 45, 1941
- in Brisbane (Johnson, Brown and Derrick), 19: 194, 1937
- in certain occupations (Alston), 18: 11, 1936
- in England (Lancet), 18: 114, 1936
- in Glasgow tripe workers (Stuart), 20: 118, 1938
- in north-east Scotland (Davidson and Smith), 22: 30, 1940
- in the United States (Blake), 23: 7, 1941
- laboratory rats as source of infection (Korthof), 20: ?, 1938
- leptospira of hitherto unknown serological type (Peterson and Christensen), 21: 163, 1939
- leptospiral infection from stream (Neale), 18: 11, 1936
- macroscopic agglutination test for Weil's disease (Smith and Tulloch), 20: 7, 1938
- protection test in mice for identification of (Larson), 23: 198, 1941
- rats as vectors of leptospira (Roelcke), 21: 113, 1939
- report of a case (Durand), 24: 72, 1942
- report of 51 cases in Puerto Rico and United States (Larson), 23: 198, 1941
- vaccination of guinea pigs and human beings against leptospiral infections (Smith), 19: 194, 1937

Jaundice, thymol turbidity test: new indicator of liver dysfunction (Maclagan), 27: 117, 1945
- trinitrotoluene (Evans), 24: 38, 1942
- Weil's disease (Suarez), 25: 200, 1943
- Weil's disease, in the District of Columbia, four cases (Manchester, Larson and Thomas), 26: 134, 1944
- Weil's disease, incidence, diagnosis and treatment; two cases (Kramer), 25: 37, 1943
- Weil's disease, pathology, comparison with yellow fever (Harris), 25: 7, 1943
- Weil's disease, two cases, in Sydney, Australia (Downes), 25: 7, 1943

Lead—*Cont'd.*
absorption, mobilization and excretion of (Tompsett), 22: 98, 1940
acetate and arsenic trioxide, growth and reproduction of rats fed, and lead and arsenic content of newborn rats (Morris, Laug, Morris and Grant), 21: 93, 1939
acetate and lead arsenate, effect on rats (Laug and Morris), 21: 93, 1939
acetate, changes in rats and dogs fed (Finner and Calvery), 21: 165, 1939
acetate, effect on oxygen uptake of rat liver slices (Baernstein and Grand), 24: 137, 1942
acetate, lead arsenate and arsenic trioxide, chronic effects on dogs (Calvery, Laug and Morris), 21: 93, 1939
acetate paper, detection of hydrogen sulfide by (Johnsen and Colegrave), 22: 190, 1940
action of, on workers in various occupations (Naevestad), 19: 9, 1937
amaurosis (Neuman), 19: 119, 1937
and arsenic, absorption through skin, 22: 99, 1940
and arsenic content of Canadian tobacco (Zeidler and Wagner), 20: 67, 1938
and arsenic in urine (Webster), 24: 7, 1942
and arsenic, influence of calcium and phosphorus on storage and toxicity (Grant, Calvery, Laug and Morris), 21: 93, 1939
and arsenic ingestion and excretion in man (Webster), 23: 201, 1941
and arsenic, pathological changes in rats and dogs fed diets containing (Finner and Calvery), 21: 165, 1939
and arsenic, variations in arginase concentrations caused by administration of (Lightbody and Calvery), 21: 93, 1939
and certain inorganic compounds, allowable concentration (American Standards Assn.), 26: 124, 1944
and common compounds, toxicity of (Fairhall, Sayers and Miller), 22: 180, 1940
and high blood pressure (Günther), 21: 43, 1939
and its compounds, isolated injuries to skin from (Engelhardt and Meerkamp), 18: 89, 1936
and lead poisoning tests (Smith, Rathmell and Marcil), 24: 7, 1942
and mixed poisonings, liver in (Pernice), 19: 107, 1937
and non-lead workers, chromaxie of, before and after work (Schütz), 21: 93, 1939
and zinc mines, Kansas, survey of (Dills and Nichols), 20: 105, 1938
anemia, infantile, appearance of silver impregnated erythrocytes (Kasahara and Nagahama), 19: 84, 1937
anemia, mechanism of development, nature of splenic and liver substances which decrease erythrocytes (Kin), 22: 98, 1940
anemia, metabolism of hemoglobin in (Maugeri), 22: 181, 1940
arsenate and lead acetate, effect on rats (Laug and Morris), 21: 93, 1939
arsenate, changes in rats and dogs fed (Finner and Calvery), 21: 165, 1939
arsenate, effect of exposure on orchardists and consumers of sprayed fruit (Neal and others), 23: 176, 1941
arsenate, effect on liver (Glahn, Flinn and Klein), 20: 180, 1938
arsenate, effect of yeast on incidence of cirrhosis produced by (Von Glahn and Flinn), 22: 122, 1940
arsenate, federal control of spray residues on fruits and vegetables (Frisbie), 18: 83, 1936
arsenate in man, absorption and excretion (Fairhall and Neal), 20: 185, 1938
arsenate, lead acetate and arsenic trioxide, chronic effect on dogs (Calvery, Laug and Morris), 21: 93, 1939
arsenate poisoning of sheep and cattle (McCulloch), 22: 182, 1940
arsenate poisoning, psychosis following (Glotfelty), 24: 73, 1942
arsenate poisoning, with recovery; case report (Kilgore and Rhoads), 25: 34, 1943
arsenate, relative toxicity of components of (Fairhall and Miller), 23: 201, 1941
arsenate spray residue, 24 hour urinary output in exposed persons (Webster), 24: 7, 1942
atmospheric content of, and correlation with basophilic aggregation tests in storage battery workers (McCord, Walworth, Johnston and Fisher), 19: 195, 1937
azide, toxicity of (Fairhall, Jenrette and others), 25: 128, 1943
benzene, X-ray and radium, blood dyscrasias caused by (Heid and Lieberson), 20: 103, 1938
benzine, danger of (Kraut and Lehmann), 25: 66, 1943
benzine, subacute lead tetraethyl poisoning from (Taeger), 27: 114, 1945
biochemical behavior of, influence of calcium, phosphorus, and vitamin D on lead in blood and bone (Sobel, Yuska, Peters and Kramer), 22: 121, 1940
blood, plasma-cell partition of (Bambach, Kehoe and Logan), 25: 104, 1943
calcium and phosphorus of healthy persons, mineral movement between plasma and erythrocytes (Schmitt and Basse), 21: 10, 1939
citrate complex ion in the physiology and therapy of lead poisoning (Kety), 24: 73, 1942
colic and mercury poisoning, blood proteins in (Renato), 21: 94, 1939
colic in two children (Colomb), 22: 53, 1940
commercial, possible factor in bronchiogenic carcinoma: report of 2 cases (Black), 25: 147, 1943
compounds, study of ingestion of (Kehoe), 22: 96, 1940
concentration, tissues, in disease (Riggs, Letonoff and Reinhold), 26: 136, 1944
content in chemical blood examinations, what should be considered pathologic? (Ehrhardt), 19: 225, 1937
content of bile (Schmitt and Basse), 21: 10, 1939
content of blood and feces in healthy persons and in lead poisoning, quantitative determination by diphenylthiocarbazone (Taeger and Schmitt), 19: 202, 1937
content of human blood (Chalmers), 22: 121, 1940
content of human blood (Willoughby and Wilkins), 20: 202, 1938
content of liver, investigation of lead-injured herbivorous animals (Gabel), 23: 200, 1941
content of "normal" urine (Meston), 26: 165, 1944
content of urine and relation to diagnosis of poisoning (Reith and van Dijk), 22: 34, 1940
control of exposure to pottery glazes (Rothmann), 21: 125, 1939
damage to nervous system, appraisal of (Schmuttermayer), 19: 195, 1937
deposition and removal in soft tissues (Fairhall and Miller), 23: 201, 1941
Lead detection *see also* Lead determination
Lead detection, histochemical, in bones (Sieber), 18: 134, 1936

detection, histochemical, in calcified human arteries (Kratzsch), 20: 21, 1938
detection, histochemical, in human bones (Timm), 18: 182, 1936
detection in ethyl lead and volatility of tetraethyl lead (Siebeneck), 21: 55, 1939
detection, microchemical (Costeanu), 21: 25, 1939
detection, microchemical, new test (Jurany), 22: 85, 1940
detection of early injury by observing skin vessels (Otto and Hahn), 22: 35, 1940
determination (Hubbard), 20: 20, 1938
determination by dithizone (Bambach and Burkey), 25: 47, 1943
determination by dithizone (Clifford), 25: 209, 1943
determination by dithizone (Crisp and Webster), 24: 80, 1942
determination by dithizone (Fischer and Leopoldi), 18: 88, 1936
determination by dithizone (Fischer and Leopoldi), 23: 155, 1941
determination by dithizone (Koselka and Kluchesky), 23: 205, 1941
determination by dithizone (Miller), 20: 21, 1938
determination by dithizone, in air (Prikhnya), 22: 102, 1940
determination by dithizone, in biological material, modified method, 21: 24, 1939
determination by dithizone, in human tissues (Bagchi, Ganguly and Sirdar), 21: 191, 1939
determination by dithizone, in urine (Morton), 18: 134, 1936
determination by dithizone, modifications of method (Bambach), 21: 218, 1939
determination by dropping-mercury-electrode procedure (Feicht, Schrenk and Brown), 25: 21, 1943
determination by electrolytic and dithizone methods (Müller), 21: 25, 1939
determination by histochemical method, in digestive tract (Schönlebe), 19: 84, 1937
determination by microanalysis (Fairhall and Keenan), 24: 40, 1942
determination by microanalytic method, in body fluids (Straube and Beck), 21: 147, 1939
determination by polarography, in biological material (Cholak and Bambach), 24: 18, 1942
determination by polarography, in bones (Weinig), 25: 79, 1943
determination by polarography, in urine (Reed and Gant), 24: 117, 1942
determination by spectroanalysis, in body fluids (Beck and Straube), 21: 123, 1939
determination in air (Air Hygiene Found. of America), 21: 24, 1939
determination in biological material (Cholak, Hubbard, McNary and Story), 20: 20, 1938
determination in biological material (Fabre), 19: 202, 1937
determination in biological material (Murray and Stephens), 22: 59, 1940
determination in biological material (Smith, Rathmell and Williams), 24: 18, 1942
determination in blood (Kraft-Ström, Wülfert and Sydnes), 19: 202, 1937
determination in blood and urine, value in diagnosis of lead poisoning (Feil), 19: 202, 1937
determination in blood, as health department laboratory service (Kaplan and McDonald), 24: 157, 1942
determination in blood, urine and feces after injections of calcium and magnesium sulfate (Massione and Zanotti), 22: 161, 1940
determination in blood, urine and feces of normal and lead poisoned persons (Massione and Beltrami) 22: 161, 1940
determination in cerebrospinal fluid of normal and lead poisoned persons (Schmitt and Basse), 19: 84, 1937
determination in drinking water (Ingleson), 21: 24, 1939
determination in urine (Kench), 23: 38, 1941
determination in urine, simple method for (Preti and Maugeri), 18: 67, 1936
detoxication (Hesse), 22: 122, 1940
detoxication (Hesse and Meissner), 27: 32, 1945
diseases among riveters (Neumann), 20: 67, 1938
distribution after injection, effect of irradiation (Crawford, Stewart, Willoughby and Smith), 21: 11, 1939
distribution in circulatory system, experimental (Antonioli and Pozzato), 22: 52, 1940
distribution in human bones (Tompsett), 18: 99, 1936
dust and fumes, efficiency of impingers for collecting (Littlefield, Feicht and Schrenk), 20: 186, 1938
dyes, mass poisoning in spraying operations (Gerbis), 18: 21, 1936
effect of calcium and phosphorus on metabolism of (Shields and Mitchell), 23: 177, 1941
effect of calcium and phosphorus on retention by growing organism (Lederer and Bing), 22: 160, 1940
effect of ingested lead on organism. I. Studies on rat (Horwitt and Cowgill), 20: 81, 1938
effect of nicotinic acid on increased porphyrinuria in painters (Gross, Sasaki and Spies), 21: 117, 1939
effect of vitamin C on workers exposed to (Marchmont-Robinson), 23: 175, 1941
effects on body (Lancet), 21: 142, 1939
electrolytic deposition from biological material (Bambach and Cholak), 23: 205, 1941
elimination in urine by calcium preparations, blood picture, and phosphate metabolism, normal persons (Schmitt and Basse), 19: 128, 1937
encephalitis precipitated by acute infection (California and Western Medicine), 19: 173, 1937
encephalopathy as cause of death? (Beintker), 19: 36, 1937
encephalopathy, case (Rastelli), 22: 162, 1940
encephalopathy in children and adults, clinicopathologic study (Akelaitis), 23: 178, 1941
encephalopathy simulating cerebral tumor (Nussey and Drybrough-Smith), 23: 73, 1941
encephalopathy, surgical treatment of (Haverfield, Bucy and Elonen), 22: 161, 1940
encephalopathy with post mortem temperature rise (Taeger), 20: 145, 1938
Lead estimation *see* Lead determination
Lead excretion, diurnal variation (Webster), 24: 6, 1942
exophthalmic goitre caused by (Waniek), 22: 162, 1940
exposure and gastric ulcers (Csépai), 21: 43, 1939
exposure, basophilic aggregation test for (J.A.M.A., Queries and Minor Notes), 27: 94, 1945
exposure, safety precautions in (Ottawa), 18: 5, 1936
exposures in the printing industry in Virginia (Homewood and Worsham), 24: 157, 1942
from colored crayons (Ruf and Fluck), 22: 22, 1940
fume, comparison of methods for sampling (Case), 23: 155, 1941
fume hazard, in shipyards (Kehrlein), 26: 115, 1944
gangrene and encephalopathy (Rutishauser), 18: 159, 1936
gout (Ramond), 21: 71, 1939
gout, case (Boulin and Violle), 20: 196, 1938

S108519O6

Lead—*Cont'd.*
hazard at Mt. Isa mines; original method for examination of blood for polychromasia (Windsor-McLean), 21: 9, 1939
hazard at soldering benches (Hatch), 21: 200, 1939
hazard, during repair of burned ship (Fleischer and Viles), 25: 147, 1943
hazard in automobile body plants (Humperdinck), 21: 71, 1939
hazard in automobile body workers and prevention (Trüby), 21: 71, 1939
hazard in brass foundry (McClure), 24: 56, 1942
hazard in making bushings of lead bronze (Weber), 20: 61, 1938
hazard in manufacture of storage batteries, control of (Elsten and Winn), 25: 147, 1943
hazard in milk canning industry (Wisconsin State Board of Health), 25: 61, 1943
hazard in storage battery industry, control of (Dreessen and others), 23: 176, 1941
hazard in typesetting (Lederer), 19: 106, 1937
hazard of average individual, physiological effects of small amounts (Minot), 21: 165, 1939
hazard, ratio of large to small lymphocytes in exposed persons (Shiels), 18: 158, 1936
in blood, first white blood changes in persons exposed (Müller), 21: 43, 1939
in bone, studies in deposition of. I. Calcification and lead deposition (Barrett), 25: 172, 1943
in bone, studies in deposition of. II. Calcium-phosphorus and lead-phosphorus ratios (Barrett), 26: 57, 1944
in bone tissue, identification and localization (Fairhall), 25: 83, 1943
in drinking water, basophilia after taking (Winkler and Wiesbrock), 21: 166, 1939
in hair as indication of exposure (Melnick and Cowgill), 21: 25, 1939
in human body, distribution and diagnostic significance (Myers, Gustafson and Thrune), 18: 37, 1936
in renal calculus (Trumper and Gordy), 23: 117, 1941
in teeth, content of (Manlbetsch and Rutishauser), 18: 182, 1936
in tissues, and coronary heart disease, in painter (J.A.M.A. Queries and Minor Notes), 26: 51, 1944
in urine after single doses, elimination of (Ohmura), 18: 163, 1936
in urine and feces (Bagchi and Ganguly), 20: 109, 1938
in urine and feces, effect of sodium citrate administration on excretion of (Letonoff and Kety), 25: 172, 1943
in urine, comparison of methods of analysis (Marriott), 25: 14, 1943
in urine, new methods for determination of minute amounts of (Ross and Lucas), 18: 40, 1936
in urine of workers at Mt. Isa Mines, Queensland (Shiels), 18: 111, 1936
in urine, quantitative determination of (Traeger), 18: 53, 1936
in urine, rapid microanalytical method (Kayc), 27: 76, 1945
in urine, significance of excretion of (Fairhall), 22: 9, 1940
injury, early, recognition of, with porphyrin determination (Otto), 20: 179, 1938
injury to painters (Rennert), 20: 146, 1938
intoxication, clinical and subclinical (Abraham and Baird), 25: 34, 1943
intoxication, influence of calcium on porphyria (Schreus and Christ), 18: 176, 1936
line, pseudo, in Javanese and Madurese, melanin and ultra-melanin (Breyer), 21: 141, 1939
mine, sulfuretted hydrogen produced by bacteria in (Edington), 21: 138, 1939
minerals in normal and pathologic brain tissue (Alexander and Myerson), 20: 88, 1938
miners, acute silicosis in (Thomas and Cummins), 20: 64, 1938
mobilization after treatment with potassium iodide and sodium bicarbonate (Shachnovskaia), 18: 128, 1936
mobilization and mineral metabolism in lead poisoned persons (Schmitt and Taeger), 19: 225, 1937
mobilization, studies in (Tompsett and Chalmers), 22: 9, 1940
oxides, oxides, white, and dry-colors (Eckfeldt), 22: 181, 1940
new antidote (Zancan), 26: 135, 1944
paint, respirator used in burning of (Gollasch), 18: 13, 93, 1936
Lead poisoning (Lind), 18: 37, 1936; (Teleky), 18: 80, 1936; (Schwarz), 21: 44, 1939; (Replek), 24: 118, 1942; (Schweisheimer), 26: 187, 1944
accidental, from inhalation of fumes in cutting metal bridge (Batta, Firket and Leclerc), 22: 182, 1940
acute and latent, early diagnosis (Smith, Rathmell and Marcil), 21: 142, 1939
acute, quantitative experiments (Tartler), 24: 7, 1942
alkali reserve and pH of urine before and after injections of calcium and magnesium (Massiou and Bareggi), 23: 178, 1941
among cigar workers (J. A. M. A., Foreign Letter), 20: 121, 1938
among printers (Lind), 18: 22, 1936
and carbon monoxide poisoning, cases, 1933-38 (Wisconsin Industrial Commission), 22: 111, 1940
and chronic nephritis in young people in Queensland (Murray), 22: 59, 1940
and duodenal ulcer (Sabatini), 22: 122, 1940
and parathyroid (Reinhart), 21: 70, 1939
and porphyria (Watson), 18: 99, 1936; (Carrié), 18: 80, 1936; (Vigliani and Angeleri), 18: 128, 1936; (Vigliani and Waldenström), 19: 129, 1937; (Putnoky and Stimegi), 20: 179, 1938; (Spühler), 22: 161, 1940; (Gabel), 23: 200, 1941
and silicosis among pottery workers (Flinn, Dreessen, Edwards, Riley, Bloomfield, Sayers, Cadden and Rothman), 21: 171, 1939
and stippled red cells (J. A. M. A., Queries and Minor Notes), 23: 178, 1941
and the Parkinson syndrome, not related (J. A. M. A., Queries and Minor Notes), 22: 52, 1940
as etiological factor in cirrhosis of liver (Bassano), 19: 36, 1937
atypical, caused by tap water (Altmann and Nowotny), 18: 129, 1936
basophilic aggregation and reticulocytes in clinical conditions (Pearlman and Limarzi), 21: 70, 1939
basophilic aggregation test (Hyler and Bradley), 20: 145, 1938
by imbedded shot (Haenisch), 18: 80, 1936
calcium and magnesium in prophylaxis (Mangel and Santi), 20: 121, 1938
calcium phosphate administration (Shachnovskaia), 18: 128, 1936
calcium therapy (Schwetzenmayer and Bauer), 18: 128, 1936; (Taeger), 20: 48, 1938
calcium therapy in toxic neuralgia (Seghini), 23: 117, 1941

cancer incidence among lead workers (Black), 22: 181, 1940
cause and prevention of (Medellin), 24: 137, 1942
causing scurvy, treated by transfusion (Ramel and Schenk), 26: 72, 1944
Lead poisoning, chronic (Williams), 21: 115, 1939; (Nyfeldt), 19: 173, 1937
ascorbic acid in treatment, report of failure (Dannenberg, Widerman and Friedman), 22: 146, 1940
changes in retina in (Lobeck), 18: 100, 1936
effect on arterial blood pressure in dogs (Fouts and Page), 25: 83, 1943
effect on arterial blood pressure in rats (Griffith and Landauer), 27: 57, 1945
from theatrical grease paint (Bartleman and Dukes), 18: 80, 1936
with symptomatology referring to cardiovascular-renal system (Preti), 19: 128, 1937
Lead poisoning, clinical aspects of (Johnson), 20: 61, 1938
clinical entity during reconditioning of warships (Hankins), 26: 30, 1944
clinical, plasma-cell partition of lead blood in (Blumberg and Scott), 18: 99, 1936
combined arm-nerve paralysis in (Gerbis), 18: 5, 1936
comparison of punctate basophilia and ratio of large to small lymphocytes in diagnosis and prevention of (Shiels), 19: 224, 1937
concentration of lead in workers at Mt. Isa Mines, Queensland (Shiels), 18: 111, 1936
coproporphyrinuria and hemoglobin metabolism; experiments in (Bjorkman), 24: 38, 1942
criteria for diagnosis (Belknap), 23: 49, 1941
danger of iodine therapy in (Fellinger), 18: 129, 1936
dermatitis from red lead (J. A. M. A., Queries and Minor Notes), 21: 177, 1939
detection in motor car factory (Molitor, Arnoldson and Hausser), 21: 94, 1939
detection of stippled erythrocytes in sternal puncture in (Henning and Keilhack), 22: 146, 1940
diagnosis, danger of emphasizing laboratory findings in (Mayers), 19: 225, 1937
diagnosis, lead content of urine and relation to (Keith and van Dijk), 22: 34, 1940
diagnosis, treatment (Gant), 21: 94, 1939
diverticulosis of colon after (Hartmann), 19: 151, 1937
doubtful, diagnostic utility of stippled cells after potassium iodide dosage in (Böhm and Fellinger), 19: 60, 1937
early diagnosis by quantitative determination of porphyrin (Schäfer), 20: 196, 1938
effect of protein intake (Baernstein, Grand and Neal), 24: 136, 1942
effect of S-Hydril (Schmitt and Lossie), 21: 10, 1939
effect of therapeutic agents in treatment (Smith), 25: 79, 1943
effect of vitamin C (Holmes, Campbell and Amberg), 21: 166, 1939; 22: 78, 1940; (Pillemer, Seifter, Kuehn and Ecker), 23: 8, 1941; (Linka), 25: 172, 1943
encephalopathy, case report (Santillan, Soriano and Ongjoco), 24: 56, 1942
estimation of lead in tissues (Murray and Stephens), 22: 59, 1940
excretion of coproporphyrin III (Mertens), 19: 195, 1937
Lead poisoning, experimental, blood changes as studied by fluorescent microscope (Pesch and Lemke), 25: 202, 1943
blood regeneration by water soluble liver factor (Loureau, de Sacy and Arthus), 21: 143, 1939
effect of arsenates on the storage of lead (Fairhall, Miller and Weaver), 25: 178, 1943
influence of acid and alkaline diets on porphyrinuria (Capellini), 21: 143, 1939
influence of acidosis and alkalinity (Maugeri and Capellini), 22: 181, 1940
influence of histamine shock on basophilia of erythrocytes (Eck, Boye and Fonty), 22: 181, 1940
rate of intestinal absorption (Pozzato and Antonioli), 22: 161, 1940
silver-impregnatable erythrocytes (Kasahara and Nagahama), 21: 11, 1939
stability of anemic conditions (Loureau, de Sacy and Arthus), 21: 11, 1939
treatment (Binet and Pérel), 22: 35, 1940
Lead poisoning, fatal subacute occupational (Ehrhardt), 21: 212, 1939
from drinking new wine (Duy), 18: 37, 1936
from lead colors in spraying operations (Gerbis), 18: 21, 1936
from spray dyes in leather and artificial leather industry (Humperdinck), 22: 35, 1940
gastrointestinal involvement (Otto and Kuhlmann), 21: 212, 1939; (Gray), 27: 113, 1945
hazards in soldering operations (Daulcospeck, Tienson and Noyes), 27: 30, 1945
hemopoiesis in (Kench, Gillam and Lane), 25: 79, 1943
hepato-nephritis after abortion (Rathery, Duperat and Maschat), 24: 7, 1942
high calcium therapy (Gray and Greenfield), 22: 52, 1940
hygienic conditions in printing plants in Naples (Tecce and Bessero), 21: 11, 1939
in blast-furnace operations, prevention (Bauer), 26: 30, 1944

lesions caused in man (Sedlacek), 24: 3, 1942
observations on injury from (Utz), 22: 95, 1940
poisoning, decrease of dural poisoning by propaganda (Lottermoser), 19: 61, 1937
research in damage to experimental animals (Gerlach), 19: 38, 1937
Metal, liver damage from chronic action of (Tallenberg), 19: 150, 1937
non-ferrous, industrial hygiene problems in recovery from scrap (Illinois Labor Bull.), 25: 46, 1943
of medical importance, used in aviation industry (Schmidt), 27: 173, 1945
poisoning, acute, significance in legal medicine and industrial pathology, Pt. 2 (Esser), 18: 159, 1936
poisoning, prevention in industrial operations (Pierce), 25: 6, 1943
poisons (McDonald), 25: 128, 1943
polishers, silicosis among (Smith), 19: 198, 1937
silver, toxicity (Heiman), 25: 103, 1943
smelters, non-ferrous, health hazards (Walworth), 27: 131, 1945
toxicity when administered intravenously in various forms (Mascherpa), 26: 12, 1944
toxicological study of special steels (Fabre and Kahane), 21: 214, 1939
white, brass and bronze castings, for railroad rolling stock, safe practice in manufacturing (Haines), 25: 104, 1943
workers in Prague, morbidity of (Tschauder), 26: 52, 1944
workers, numbness of fingers in (J. A. M. A., Queries and Minor Notes), 27: 152, 1945
workers, relative sterility of hands (Lominski and Thomson), 27: 98, 1945
Metallic dusts and explosion hazards (Brown), 24: 23, 1942
Metallkunde (Zeitschrift für Gewerbehygiene und Unfallverhütung), 20: 16, 1938
in tank, liver injury from acute poisoning (Adler-Herzmark), 21: 214, 1939
welding and flame cutting, effective controls of hazards (Part 1) (Stern), 26: 160, 1944
welding and flame cutting, effective controls of hazards (Part 2) (Stern), 26: 161, 1944
Metallurgy, use of sound and supersonic waves, experiments in clearing fume, fog and smoke (Gottschalk and St. Clair), 19: 200, 1937
Metaplasia, myeloid, industrial solvents as etiologic agents (Rawson, Parker and Jackson), 23: 180, 1941
Metcalf, Henry C.: Selection and education of employees, 24: 112, 1942
Metcalfe, E. E.: A new method for determining night blindness, 23: 17, 1941
Metge, E.: Spinous process tears, 19: 215, 1937
Methane *see also* Firedamp
Methane, apparatus for detection of, involving use of a photoelectric cell (Perepelitsa), 24: 161, 1942
charts and ventilation efficiency (Nelson), 19: 17, 1937
distance recorder for firedamp (Lloyd), 20: 203, 1938
gas reserves and risks in shot-firing under intensive coal mining (MacVie), 18: 189, 1936
indicating detectors in anthracite mines (Currie), 18: 110, 1936
ignition by pyrites during coalcutting (Allsop and Wheeler), 21: 156, 1939
Léon-Montluçon detector (Hudspeth), 21: 201, 1939
Methanol, American standard allowable concentration (Amer. Standards Assn.), 26: 148, 1944
inhalation, chronic poisoning from (Humperdinck), 25: 59, 1943
poisoning. 1. Exposure of dogs to methanol vapor in air (Sayers, Yant, Schrenck and others), 24: 155, 1942
toxicity of (Benedicenti), 18: 127, 1936
Methemoglobin anemia after ethylene nitrite poisoning (Seggel), 19: 39, 1937
can methylene blue form it in living organism? (Sturm and Franke), 19: 223, 1937
formation and Heinz bodies in poisoning with amido- and nitrobenzol compounds (Freifeld, Schilova and Ludvinovsky), 19: 107, 1937
formation from aniline (Heubner and Schwedtke), 19: 82, 1937
formation from aniline (Schwedtke), 20: 101, 1938
formation from aniline, influence of alcohol on (Schwedtke), 20: 102, 1938
formation from dinitrobenzene (Heubner and Lo-Sing), 20: 102, 1938
formation from nitrobenzene (Schwedtke and Lo-Sing), 20: 102, 1938
Methyl alcohol and formaldehyde in air, method for determination of (Ackerbauer and Lebowich), 26: 85, 1944
and printers' spray (J. A. M. A., Queries and Minor Notes), 21: 15, 1939
and toxic methyl compounds (Flury and Wirth), 19: 106, 1937
determination of (Iofinova-Goldfein), 18: 164, 1936
in fusing of collars, toxic concentration (Greenburg and others), 21: 190, 1939
poisoning, acute (Menne), 21: 46, 1939
poisoning, acute; report of 18 cases (Jacobson, Russell, Grimm and Fox), 27: 132, 1945
poisoning, report of 42 cases (Kaplan and Levreault), 27: 133, 1945
poisoning; survey of 30 cases (Tonning), 27: 132, 1945
Methyl bromide burns (Butler, Perry and Williams), 27: 134, 1945
detection and determination of traces of (Lubatti), 27: 162, 1945
gas, as fumigant (Tarleton and Dworsky), 26: 87, 1944
in air, determination of small quantities (Busbey and Drake), 21: 26, 1939
in the atmosphere, continuous determination of (Williams, Haines and Heindel), 27: 162, 1945
in the atmosphere, determination of low concentrations (Williams), 27: 162, 1945
intoxication (Holling and Clarke), 27: 172, 1945
intoxication (Wyers), 27: 134, 1945
intoxication of large group of workers (Johnstone), 27: 154, 1945
local and mild systemic toxic effects (Watrous), 25: 35, 1943
poisoning (Schifferli), 25: 103, 1943
poisoning (Gray), 27: 172, 1945
poisoning as result of industrial exposure (Heimann), 26: 137, 1944
poisoning, effects on the nervous system (Carter), 27: 74, 1945
poisoning, fatal case (Miller), 26: 55, 1944
poisoning; 4 cases in H. M. ship (Clarke, Roworth and Holling), 27: 134, 1945
poisoning, new industrial hazard (Viner), 27: 171, 1945

S108519I8

Methyl bromide—*Cont'd.*
poisoning, with nervous system manifestations (DeJong), 27: 8, 1945
Methyl butyl ketone, hexanone, response of guinea pigs to (Schrenk, Yant and Patty), 18: 103, 1936
2-Methylbutyraldehyde (isovaleraldehyde), poisoning by (Wilkinson), 23: 51, 1941
Methyl cellulose, and ethyl cellulose, observations on ingestion by rats (Deichmann and Witherup), 26: 57, 1944
Methyl chloride, dangers of, as substitute for freon (Barach, Yaglou and McCord), 26: 53, 1944
intoxication from refrigerant (Duvoir and Gaultier), 24: 9, 1942
liquid (Willson and others), 26: 77, 1944
poisoning (Jones), 25: 10, 1943
poisoning, industrial, porphyrinuria in (Chalmers, Gillam and Kench), 23: 74, 1941
poisoning, late effects (J.A.M.A., Queries and Minor Notes) 27: 112, 1945
poisoning, occupational (Flury and Klimmer), 23: 31, 1941
Methyl formate, response of guinea pigs to (Schrenk, Yant, Chornyak and Patty), 18: 155, 1936
isobutyl ketone, acute response of guinea pigs to inhalation of (Specht), 20: 124, 1938
methacrylate, monomeric: studies on toxicity (Spealman, Main, Haag and Larson), 27: 134, 1945
propyl ketone (pentanone) response of guinea pigs to (Yant, Patty and Schrenk), 18: 102, 1936
violet, indelible pencil necrosis (Glass), 22: 80, 1940
Methylcholanthrene, benzpyrene and tar, on rabbit skin, analysis of effects; elements in tumor production (Friedewald and Rous), 27: 152, 1945
Methylene blue, action on cyanide poisoning in turtle (Johlin), 23: 116, 1941
and glucose (chromosmon), action on animals poisoned with cyanide (Sturm and Panser), 19: 223, 1937
and glucose (chromosmon) effect on carbon monoxide poisoning in animals (Sturm and Wohlfahrt), 19: 222, 1937
and other agents as antidotes in hydrocyanic acid and carbon monoxide poisoning (Cooper), 18: 21, 1936
can it form methemoglobin in living organism (Sturm and Franke), 19: 223, 1937
in carbon monoxide and hydrocyanic acid poisoning, 20: 15, 1938
injection of, in treating carbon monoxide poisoning (Estler), 18: 4, 1936
test in infectious epidemic hepatitis (Gellis and Stokes), 27: 169, 1945
therapy in nitrobenzene poisoning (Leinoff), 19: 39, 1937
treatment, inhalation of carbon dioxide, and bilateral vagotomy in experimental research on respiration during carbon monoxide coma (Di Prisco), 21: 166, 1939
treatment of illuminating gas poisoning (Brachtl), 18: 158, 1936
Methylene chloride, oxygen-nitrogen mixtures, inflammability of (Jones, Kennedy and Scott), 26: 125, 1944
Methylene dichloride intoxication in industry (Collier), 18: 81, 1936
Methyl-ethyl-ketone, toxicity of materials used in lining beer cans, 20: 14, 1938
Metol dermatitis, notes on (Drew), 25: 15, 1943
occupational disease of photography (Wagner), 26: 120, 1944
Metol poisoning (Böstrom), 25: 179, 1943
Metropolitan Life Insurance Company: Few women killed in occupational accidents, 25: 116, 1943

reduction and suppression on machine cut faces (Monmouthshire and South Wales Coal Owners' Assn.), 25: 19, 1943
reduction at coal face (Jones), 25: 162, 1943
sampling (Simpkin and Wild), 19: 178, 1937
suppression by water and roof control at working face (Great Britain, Ministry of Fuel and Power, 1944), 27: 19, 1945
suppression in the Pittsburgh seam (Davis and Gardner), 25: 137, 1943
tests of salt as substitute for rock dust in prevention of coal dust explosions in (Greenwald, Howart and Hartmann), 23: 20, 1941
treatment on travelling roads (Hay and Tideswell), 18: 136, 1936

Mines, effect of rate of advance in workings having different types of roof (Institute of Mining Engineers), 20: 208, 1938
effect on susceptible strata of wet treatment at coal face (Withers), 27: 162, 1945
elimination of carbon monoxide by bacteria (Jones and Scott), 22: 21, 1940
environmental conditions, report, 1938–39 (Great Britain, Medical Research Council), 22: 113, 1940
environmental conditions, study of Kata thermometer cooling power and effective temperature (Nelson), 25: 114, 1943
face props in inclined seams; movements of roof, floor and props (Institute of Mining Engineers), 18: 169, 1936
fire risks and electricity in (Horsley), 20: 209, 1938
firedamp (Forstmann), 24: 103, 1942
firedamp, ignition and movement in air (Coward), 24: 163, 1942
French, ankylostomiasis in (Villejean), 19: 172, 1937
gas analysis by Haldane-type apparatus (Berger and Schrenk), 21: 26, 1939
gas evolution and rate of face advance (Carter and Hudson), 18: 169, 1936
gases and effects (J. A. M. A., Queries and Minor Notes), 20: 9, 1938
gases and vapors at surface disasters (Jones), 27: 22, 1945
glass in underground lighting (McMillan and Holmes), 21: 186, 1939
gold, critical review of dust sampling methods employed in Witwatersrand (Lambrechts), 26: 19, 1944
gold; silicosis in gold miners of Belliére (Amsler and Cady), 22: 57, 1940
gold, silicosis in, thesis of Jacque Cady (Magnin), 21: 217, 1939
gold, ventilation as a means to prevent silicosis in Ontario (Gibson), 25: 18, 1943
gold, Witwatersrand, review of dust sampling methods (Lambrechts), 23: 122, 1941
haulage accidents in normal circumstances (Institute of Mining Engineers), 19: 179, 1937; 21: 203, 1939
hazards from gases in metal mines and protection against them (Denny), 21: 98, 1939
hazards of butane fuel in mines and tunnels (Berger and Schrenk), 26: 149, 1944
health and working environment of nonferrous metal mine workers (Dreessen and others), 25: 62, 1943
hookworm prevention, Germany (Bussmann), 22: 142, 1940
hot and deep, control of atmospheric conditions. Energy output of coal miners (Moss), 18: 43, 1936; time study of coal-face workers (Moss and Halls), 18: 43, 1936; sweating and permeability of human skin (Whitehouse), 19: 181, 1937; dust in hard headings (Graham and Walton), 21: 173, 1939; (Shaw and Graham), 21: 198, 1939
Inspection, Federal (Harrington), 25: 29, 1943
Inspection in 1938 (Colliery Guardian), 22: 74, 1940
Iron ore, in Lake Superior region, controlling health hazards in (Urban), 26: 83, 1944
lead in urine of workers at Mt. Isa, Queensland (Shiels), 18: 111, 1936
lead, sulfuretted hydrogen produced by bacteria (Edington), 21: 138, 1939
light with compressed air electric lamps (Jones and Maynard), 18: 152, 1936
lighting, effect of dusts (Jones and Gyles), 19: 206, 1937
limitations to use of konimeter, report to Monmouthshire and South Wales Coal Owners' Association (Chubb), 25: 113, 1943
medical examinations before employment, order of German Minister of Employment, 1940 (Reichs. gesundheitsbl.), 23: 192, 1941
mercury poisoning (Davenport and Harrington), 24: 39, 1942
Midland Counties' Institution of Engineers, presidential address (Felton), 19: 95, 1937
North of England Institute of Mining and Mechanical Engineers, presidential address (Mills), 19: 94, 1937
oxidation of carbon monoxide and hydrogen by bacteria (Jones and Scott), 22: 60, 1940
quicksilver, salivation hazards (Soule), 24: 179, 1942
Reichsknappschaft (mine insurance association), 23: 88, 1941
removal of dust clouds by utilization of waste workings (Monmouthshire and South Wales Coal Owners' Assn.), 25: 112, 1943
report of committee on shot-firing and alternatives (Institute of Mining Engineers), 20: 55, 1938
rescue apparatus, new Auer cartridge for (von Hoff), 20: 92, 1938
Research Committee, Lancashire and Cheshire Safety in: Runways on endless over-rope haulage, 20: 28, 1938
Research Committee, North of England Safety in: Derailments in horse-haulage operations, 21: 203, 1939
resistance of stemming (Taylor), 21: 104, 1939
rock-bursts: cause and prevention (Sinclair), 18: 189, 1936
roof behavior of machine-cut faces (Institute of Mining Engineers), 22: 153, 1940
roof caving and practice on longwall machine faces (Jenkins), 23: 45, 1941
roof control in longwall faces (Poole and Walker), 21: 127, 1939
roof support by use of steel props at coal face (Institute of Mining Engineers), 21: 203, 1939; (Carr), 22: 153, 1940
Ruhr, electricity a cause of firedamp explosions in (Ztschr. f. Gewerbehyg.), 19: 203, 1937
safety and accident prevention (Boone), 24: 62, 1942
safety, chemical laboratory as aid (Kraft), 26: 63, 1944
safety, examination of colliery wire ropes, detecting rope failure (Iron and Coal Trades Rev.), 19: 165, 1937
Safety in Mines Research Board, annual reports (Great Britain, Ministry of Fuel and Power), 18: 13, 187, 1936; 20: 27, 1938; 21: 57, 207, 1939; 25: 24, 112, 1943; 26: 43, 1944; 27: 121, 1945
safety legislation, what is wrong (Andrews), 19: 186, 1937
safety provisions at top of inclines (Institute of Mining Engineers), 21: 156, 1939
safety, State action, some basic standards (Andrews), 20: 54, 1938
salt, pathological study of workers (Reale), 21: 177, 1939
Schneeberg, examinations by Reich committee for cancer research (Brandt), 20: 142, 1938
Schneeberg-Neustädt, investigation of lung damage in miners (Neitzel), 19: 136, 1937
silicosis and tuberculosis among workers in the Gold Coast (Murray and Crocket), 24: 160, 1942
silicosis in workers in Schauinsland mines (Wintern), 22: 166, 1940
silicosis survey in Coeur d'Alene mining district of Idaho (Ellis, Smith and others), 25: 99, 1943
sporotrichosis on the Witwatersrand (du Toit), 25: 100, 1943

  in rock drilling, rules relating to control of (New York State Dept. of Labor), 19: 166, 1937
  in steel foundries; methods of preventing production or inhalation of dust, and reducing use of materials containing free silica (Great Britain, Ministry of Labor and National Service), 27: 19, 1945
  solubility of (King), 20: 88, 1938
  suppression and removal, in pottery industry (Great Britain, Ministry of Labor and National Service), 27: 63, 1945
Silica, effects of injection of streptococcus viridans and of, in rabbit's carotid artery (Ramsey and Gaiser), 19: 44, 1937
  fluff (Jacobson), 18: 136, 1936
  free, chemical determination in dusts (Kaplan and Fales), 20: 185, 1938
  free, content of fine dust produced by rock drilling (Shaw and Graham), 21: 198, 1939
  free crystalline, in etiology of silicosis and silico tuberculosis (Jötten and Poppinga), 18: 130, 1936
  free crystalline, significance in etiology of silicosis and silicotuberculosis, addendum (Jötten), 19: 63, 1937
  fumes in quartz-fusing operations, control (Riley and DallaValle), 21: 176, 1939
  gel, use in air conditioning (Patterson), 19: 143, 1937
  in body fluids, depression of solubility (King and Roman), 21: 124, 1939
  in living organisms, nature of, silica of constitution and of interposition (Kahane and Antoine), 19: 161, 1937
Silica in lung tissue, absolute colorimetric determination in chemical toxicology (Kaiser), 20: 21, 1938
  amount in cases of silicosis (Bonifazi), 23: 96, 1941
  detection by X-ray diffraction analysis (Sweany, Klaas and Clark), 21: 75, 1939
  determination by fluorescent microscopy (Oberdalhoff), 21: 217, 1939
  free and combined silica in silicotic lungs (Youngsberg and Youngsberg), 22: 102, 1940
  method of expressing content of lung (Collins and Dible), 18: 28, 1936
  of miners, chemical analysis and pathology (Badham and Taylor), 20: 151, 1938
  study of crystalline siliceous minerals in silicotic lungs by the X-ray diffraction method (Jephcott, Gray and Irwin), 20: 107, 1938
  ultramicroscopic (Faber), 19: 228, 1937
  with and without silicotic lesions (King and Belt), 23: 150, 1941
Silica in mine dust, microchemical determination of free and combined silica (Ralson), 27: 84, 1945
  in mine dust, wetting with solution of electrolyte and soaps (Donets Inst.), 24: 124, 1942
  in tissues of persons without exposure to siliceous dusts (Belt, Irwin and King), 18: 53, 1936
  influence on development of tubercle bacillus (Heim de Balsac, Fernbach and Rullier), 23: 36, 1941
  influence on tubercle bacillus (Vorwald and Delahant), 21: 17, 1939
  lupoid-sarcoid reaction induced by foreign body (German), 22: 167, 1940
  method of neutralizing (Denny and Robson), 22: 19, 1940
  microchemical investigations on siliceous dusts (Matthews), 20: 204, 1938
  micrometric method for estimation of quartz in rock (Shaw), 19: 133, 1937
  photometric determination of silicic acid in biological material (Bodnar and Török), 22: 61, 1940
  physiological and pathological aspects (King and Belt), 20: 199, 1938
  precipitated, and iron oxide, effect on incidence of primary lung tumors in mice (Campbell), 23: 13, 1941
  precipitated, fibrotic nodules in tracheo-bronchial lymph glands of mouse, caused by breathing (Campbell), 24: 124, 1942
  quick method for determination (Stephenson), 18: 55 1936
  sand, pulverizing (Wilhelm), 20: 161, 1938
  secondary, factor in silicosis in South Wales (Cox), 22: 14, 1940
  solubility of (King), 20: 157, 1938
  solution and excretion of (King and McGeorge), 20: 128, 1938
  water soluble, photometric determination of (Kahler), 24: 19, 1942
Silicates and dusts from Witwatersrand gold mines (Frankel), 27: 130, 1945
  and quartz solubility (Lucas and Dolan), 21: 124, 1939
  in tissues, leaching of (Williams and Irwin), 20: 185, 1938
Silicates, silicium, silicosis (Giese), 23: 184, 1941
Silicatosis? sericitosis? (Teleky), 18: 84, 1936
Silicic acid, biochemistry of. V. Solution of silica and silicate dusts in body fluids. VI. Solution and excretion of silica (King and McGeorge), 20: 127, 128, 1938
  biochemistry of. IX. Minerals in lung residues and air-borne dusts from coal mines; isolation and identification of (Nagelschmidt and King), 25: 81, 1943
  determination of (Schoklitsch), 18: 54, 1936
  effect on phagocytosis (Zanetti and Piccioli), 23: 204, 205, 1941
  in biological material, photometric determination of (Bodnar and Török), 22: 61, 1940
Silico-anthracosis of coal miners (Cummins), 18: 26, 1936
Silico-tuberculosis in large industrial center (Douglas and Tompkins), 22: 166, 1940
  in stevedores (Israel and Hetherington), 22: 14, 1940
Silicon and dust deposits in tissues of persons without occupational exposure to siliceous dust (Belt, Irwin and King), 18: 53, 1936
  and fluorides, hazards from (J. A. M. A., Queries and Minor Notes), 26: 118, 1944
  and silicon halogens (J. A. M. A., Queries and Minor Notes), 24: 90, 1942
  compounds, organic, identification of organic silicon compounds in silicotic lungs (Holzapfel), 25: 40, 1943
  compounds, organic, toxicity of, tetraethyl-orthosilicate (Kasper, McCord and Frederick), 20: 9, 1938
  dioxide inoculation for tuberculosis in guinea pig (Hollon, Sprick and others), 25: 41, 1943
  in blood, quantitative spectrographic determination (Richter), 21: 174, 1939

lung function in (Roelsen), 24: 39, 1942; during and after moderate exercises (Roelsen and Eskildsen), 25: 62, 1943
lung function in, minute volume in healthy persons and in silicotics (Böhme), 21: 74, 1939
management of the silicotic patient (Bamberger), 26: 157, 1944
massive conglomerate lesion, differentiated from pulmonary neoplasm (Rendich and Cassidy), 26: 49, 1944
medicolegal aspects of (Waters), 22: 165, 1940
medicolegal problem (Bovard), 25: 194, 1943
mineral content of silicotic lungs of earthenware worker (Sundius, Bygden and Bruce), 19: 90, 1937
mineralogic study of (Emmons and Wilcox), 19: 156, 1937
minerals that cause (Gossner), 19: 111, 1937
miners', and the measures of fighting it (Dust Inst.), 24: 24, 1942
"miner's lung", analysis of 227 cases (Gill), 23: 181, 1941
mines inspection in 1938 (Colliery Guardian), 22: 74, 1940
minority opinion (Troje), 26: 182, 1944
motion picture film entitled "Stop silicosis" (U. S. Dept. of Labor), 20: 157, 1938
nature of condition in man (Enser), 18: 132, 1936
necessity of including in compensable occupational diseases (Pancheri), 23: 192, 1941
new documents on (Martin), 19: 226, 1937
new radiographs and comments (Conrozier and Magnin), 19: 226, 1937
nutritional condition of silicotics (Schlomka, Naumann and Bechstein), 20: 200, 1938
observations on the development of (Davis), 27: 111, 1945
occupational disease in France (Martin), 24: 15, 1942
occupational disease in Sweden. Clinical and industrial medicine study (Bruce), 25: 194, 1943
occurrence and control (Pierce), 25: 39, 1943
pathology of lungs and other organs in (Matz), 20: 156, 1938
pathology of lungs in (Vorwald), 24: 13, 1942
pathology of silicotic nodule (Walsh), 21: 18, 1939
pathology, report of county pathologist in Monmouthshire (Jones), 26: 157, 1944
physiological functions during rest and exercise (Enser and Simonson), 26: 156, 1944
physiological response of peritoneal tissue to certain industrial and pure mineral dusts (Miller and Sayers), 19: 40, 1937
precautions in control of (Matthias and Landwehr), 19: 10, 1937
pre-employment examinations of North Carolina Division of Industrial Hygiene (Trice), 22: 139, 1940
present status (Lanza), 22: 11, 1940
prevalence of (J. A. M. A., Foreign Letters), 20: 157, 1938
prevention (Haldane, Haynes, Shaw and Graham), 21: 170, 1939
prevention by metallic aluminum (Denny, Robson, and Irwin), 19: 197, 1937; 21: 143, 1939; (Jötten), 23: 76, 1941
prevention, identification of aluminum hydrate films (Germer and Storks), 22: 61, 1940
prevention in porcelain industry (Hartmann), 18: 26, 1936
silicosis problem (Møller), 24: 99, 1942; (Shank), 25: 47, 1943
and reliable methods of dust measurement (Hass), 19: 228, 1937
contribution of Canadians, 20: 86; 1938
in Scotland, geological aspects (Tyrrell), 19: 177, 1937
medical and social phases (Sanders), 18: 132, 1936
practical discussion (Sander), 19: 167, 1937
solved in Wisconsin (Nelson), 18: 131, 1936
silicosis, prognosis in (Farrell, Sokoloff and Charr), 23: 55, 1941
program for prevention and compensation of (U. S. Dept. of Labor), 19: 175, 1937
progress in prevention of accidents and of silicosis in Witwatersrand mines (Joseph), 22: 82, 1940
protect grinders against (Kleditz), 20: 200, 1938
protection against (Harrington), 20: 108, 1938
protection against injurious dust in industry (Kranenburg, Groeneveld and Boerma), 19: 88, 1937
silicosis, pulmonary, and sand dunes (Velu), 20: 161, 1938
contribution to diagnosis by investigation of silica in blood and sputum (Oyanguren and Bartholin), 26: 181, 1944
hygienic and clinical-roentgenological investigation in Japanese foundry (Kuroda), 18: 27, 1936
new radiologic-social classification (Lorca and others), 26: 158, 1944
roentgenographic changes due to mitral stenosis simulating those due to silicosis (Ryder and Reineke), 27: 129, 1945
Silicosis, quartz and sericite in lungs (Davson), 22: 19, 1940
R-1 tubercle bacilli recovered from silicotic and normal guinea pigs (Dowd), 18: 113, 1936
radiographs and commentaries (Conrozier and Magnin), 18: 70, 1936
reaction of body to mineral dusts, with and without infection (Gardner), 20: 199, 1938
recent developments (Gardner), 22: 125, 1940
record (Ohio Industrial Comm.), 25: 39, 1943; 26: 107, 1944
recovery metabolism of silicotics (Böhme), 20: 183, 1938
relation of nasal dust retention of Manafeld miners to (Lehmann), 19: 13, 1937
report of Chief Inspector of Factories for 1938 (Great Britain, Home Office), 22: 2, 1940
report of Miners' Phthisis Medical Bureau (Union of South Africa) three years ended July 31, 1938, 22: 147, 1940; three years ended July 31, 1941, 26: 180, 1944
report of Saranac Laboratory for year ending September 30, 1937 (Gardner), 20: 155, 1938
research (Banting), 19: 11, 1937
research on control of (Harrington), 20: 155, 1938
respiratory efficiency and radiological appearance of lungs (Killick), 21: 52, 1939
respiratory insufficiency in (Castrovilli and Iberti), 22: 187, 1940
review for industrial hygienist and medical practitioner (Hamlin), 26: 157, 1944
review of literature on effects of breathing dusts (Harrington and Davenport), 18: 9, 159, 1936; 20: 18, 1938
roentgen examination of chest for diagnostic surveys (Air Hygiene Foundation), 22: 166, 1940
roentgen picture in different industries (Bruce and Jönsson), 27: 27, 1945
roentgen ray in diagnosis and prognosis (Doughty), 24: 39, 1942
roentgenologic diagnosis; "electric eye" to determine densities (Cole and Cole), 22: 36, 1940
roentgenological aspects of (Ernst), 20: 200, 1938
roentgenology of massive conglomerate lesions (Camiel), 27: 169, 1945
sandblasters', in foundries of Oberhesse and Hesse-Nassau (Büttner), 20: 64, 1938
sandblasting and (Bergerhoff), 19: 87, 1937
serial examination of workers exposed to dust, comparison of miniature roentgenograms and full size films (Saupe), 24: 15, 1942
serial examinations of workers in "Schauinsland" mines (Wintern), 22: 166, 1940
serial roentgen examination of Joachimsthal miners (Saupe), 22: 37, 1940
seven-year record (Ohio Industrial Comm.), 27: 22, 1945
severe, behavior of right heart (Letterer), 21: 54, 1939
severe, estimation according to (German) law of February, 1929, with special consideration of question of indemnification for attendant diseases (Schulz), 18: 16, 1936
sidero-, radiologic evidence in hematite iron ore workers (Fawcitt), 26: 93, 1944
silica content of tissues with and without (Belt and King), 23: 150, 1941
silicium, silicites (Giese), 23: 184, 1941

Skin disease caused by acridin among coal workers (Fopoldsberger), 23: 123, 1941
arsenite and caustic soda spray, protection against (J. A. M. A., Queries and Minor Notes), 23: 189, 1941
chemicals in water (J. A. M. A., Queries and Minor Notes), 22: 194, 1940
chrysoidine sulfamid (rubiazol) (Sezary and Horowits), 18: 137, 1936
combined sensitivity to chemical and mycotic infection (Norwood and Evans), 22: 151, 1940
cutting compounds; nature, growth and control of bacteria in the compounds (Lee and Chandler), 23: 123, 1941
cutting-oil, prevention of (Biram) 25: 133 1943
defective leather (Jäger and Jäger), 20: 91, 1938
diphenylchlorarsine in solution (Gillert), 18: 165, 1936
dyes in cotton printing factory (Hebestreit), 20: 91, 1938
ethylene bromide from water level indicator (Pleeser), 20: 189, 1938
handling resin-lined cans (Schwartz and Russell), 23: 78, 1941
hypersensitivity to turpentine and its substitutes (Schmidt), 24: 20, 1942
intolerance to turpentine and substances of turpentine group (Flandin, Rabeau and Ukrainczek), 19: 137, 1937
Kubotox [insecticide], 21: 102, 1939
lubricating oil (Feil), 20: 188, 1938; (Hausser), 21: 126, 1939
mint (Sams), 22: 131, 1940
mites (Oppenheim), 18: 165, 1936
nicotinic acid (Watrous), 21: 177, 1939
oil (Flandin, Rabeau and Ukrainczyk), 20: 205, 1938; (Lane), 23: 78, 1941
oils (Hopf), 20: 53, 1938
opium derivatives (Touraine and Sgemana), 19: 68, 1937
organ keys of galalith (Simon), 20: 189, 1938
orthodichlorobenzene (Downing), 22: 106, 1940
poisoning from Brazilian woods, I, II, III (Friese), 19: 23, 118, 1937
red lead (J. A. M. A., Queries and Minor Notes), 21: 177, 1939
sensitivity to fluorescent light (James), 23: 207, 1941
sensitivity to urease (Arch. Dermatol. and Syphil.), 19: 162, 1937
sensitization to flour in flour workers (van Dishoeck and Roux), 22: 62, 1940
sensitization to paraphenylendiamine (Gougerot and Delzant), 20: 205, 1938
synthetic resins and waxes (Schwartz), 18: 137, 1936

ST0851953

Skin disease caused by—*Cont'd.*
textile bleaching compounds (National Safety News), 23: 207, 1941
tulips (Tourraine and Neret), 20: 205, 1938
use of eau de Javel in hairdressing establishments (Rabeau and Ukrainczyk), 22: 63, 1940
Skin diseases, cheilitis caused by sensitivity to oil of cinnamon in bubble gum (Miller), 23: 60, 1941
chromates, protective clothing and ointments for workers (J. A. M. A., Queries and Minor Notes), 25: 15, 1943
coal-miners' dermatosis, "colliers' stripes" (Bettley), 23: 122, 1941
cutaneous eruptions among industrial workers (Downing), 21: 150, 1939
cutaneous hazards in citrous fruit industry (Schwartz), 20: 163, 1938
cutaneous hazards in fur industry (Levin and Behrman), 21: 103, 1939
dermatosis caused by chlorinated naphthalene (Burnier), 18: 138, 1936
dermatoses caused by predominantly external causes (Luts), 22: 193, 1940
detoxifying and antiallergic action of sodium thiosulfate (Wendt), 20: 63, 1938
diagnosis of industrial and non-industrial (Downing), 18: 90, 1936
discussion of papers by Döllken and Bering (Friboes), 23: 79, 1941
effect of exposure to chlorinated hydrocarbons (Mayers and Silverberg), 21: 28, 1939
effect of naphtha products on skin, experimental (Rosental), 23: 158, 1941
epidermophytia interdigitalis in miners (Carrié and Zantopf), 24: 21, 1942
eruptions caused by industrial fats and oils. I. Folliculitis (Nakauchi), 24: 181, 1942; II. Perna disease (Nakauchi), 24: 181, 1942
erysipeloid as occupational disease (Klauder), 21: 27, 1939
erythema nodosum and occupation (J. A. M. A., Queries and Minor Notes), 24: 182, 1942
etiologico-pathogenetical experiences and prophylaxis (Bonnevie), 22: 61, 1940
flour illnesses (van Disboeck and Roux), 22: 107, 1940
folliculitis in brass plating workers (J. A. M. A., Queries and Minor Notes), 24: 181, 1942
furunculosis, treatment of miners' (Möhlenbruch), 25: 15, 1943
grain itch (Méd. du Travail), 19: 46, 1937; (Rogers), 26: 37, 1944
granuloma, chronic, in industrial dermatology (Miller), 21: 151, 1939
halowax acne (J. A. M. A., Queries and Minor Notes), 25: 85, 1943
halowax acne, "cable rash", outbreak among electricians (Schwartz), 25: 155, 1943
hazards in airplane manufacture (Schwartz), 23: 206, 1941
hazards in American industry (Schwartz), 22: 191, 1940
heat urticaria (Lewis), 21: 112, 1939
hemp sensitivity, case (Miescs-Rief), 18: 165, 1936
hypodermatic granulations of farcy, case (Delarue and Tambareau), 21: 67, 1939
importance of anamnesis in curing eczema (Hauch), 20: 52, 1938
in aircraft industry (Lounsberry), 22: 151, 1940
in butcher, caused by swine disease (Flandin, Ferrand and Rateau), 19: 93, 1937
in butcher, lupus exfoliativus and tuberculosis cutis (Keining), 22: 142, 1940
in cement workers in Dept. of Gironde (Dervillée and Carrère), 18: 40, 1936
in chemical industry, treatment and prevention, (Meyer), 20: 91, 1938
in chimney sweepers (v. Seemen), 23: 122, 1941
in cigar makers in contact with tobacco leaves (Vero and Genovese), 23: 97, 1941
in creosote worker, multiple warts (Haldin-Davis), 18: 55, 1936
in fishermen caused by fresh water sponges (Szentkiralyi), 19: 234, 1937
in flour workers, hypersensitivity to flour and persulfate (van Disboeck and Roux), 23: 157, 1941
in flower handlers (Rabeau and Ukrainczyk), 20: 188, 1938
in food industry (Schwartz), 27: 59, 1945
in hairdressers (Tzank and Sidi), 22: 131, 1940
in laundresses, role of chromium and chlorine (Rabeau and Ukrainczyk), 22: 87, 1940
in machine operators; their control (Schweinheimer), 26: 120, 1944
in meat handlers (J. A. M. A., Queries and Minor Notes), 20: 24, 1938
in melinite factories, clinical studies (Trémolières, Goiffon and Robert), 23: 54, 1941
in 1000 cases, especially eczema; selection and skin tests (Flandin, Rabeau and Ukrainczyk), 22: 42, 1940
in 1000 workers, etiology and pathogenesis (Flandin and Rabeau), 22: 41, 1940
in plate printers (Neal), 22: 108, 1940
in sugar workers (J. A. M. A., Queries and Minor Notes), 21: 102, 1939
in trades manufacturing and using dyes, new method of hand-washing (Kötzing), 18: 90, 1936
in varnishing plant, skin tests (Munkwitz), 19: 234, 1937
in workers handling lemons (Lacroix), 22: 193, 1940
in workers in leather factories in Ostaschow and Klinsy (Jasnitzki, Kroon, Israilevitsch and Berson), 18: 29, 1936
in workers in new chemical plant (Rochstead), 23: 158, 1941
in workers with plants containing rotenone (Racouchot), 22: 130, 1940
Skin diseases, industrial (Sezary), 20: 53, 1938
and compensation (Peters), 18: 55, 1936
diagnosis of (Schwartz), 20: 164, 1938
in central Germany (Grüneberg), 21: 220, 1939
intracutaneous tests in (Peters), 19: 46, 1937
prevention of (Morris), 25: 42, 1943
Skin diseases, keratitis, from working with creosote (Birdwood), 20: 188, 1938
lacquer disease (Bonnin and André), 19: 161, 1937
lacquer itch (Riedel) 22: 152, 1940
leaf of aloe vera in treatment of roentgen ray ulcers (Loveman), 20: 24, 1938
leather buffers' nodes (Warren), 22: 107, 1940
lesions produced by beton (concrete blown under water (Benevolski), 18: 29, 1936
machine-oil acne (Suga), 24: 59, 1942
medicolegal complications in dermatology caused by Massachusetts workmen's compensation act (Blaisdell), 21: 152, 1939
milkers' vaccinia (Brants), 21: 67, 1939; (Tappeiner), 21: 67, 1939
nature, growth and control of bacteria in cutting compounds (Lee and Chandler), 23: 123, 1941
Skin diseases, occupational, and the State (Little), 20: 164, 1938

clinical aspects and treatment of (Hopf), 23: 158, 1941
criteria for diagnosis (Lane), 23: 18, 1941
defining (Bering), 22: 42, 1940
diagnosis and treatment (Hopf), 21: 102, 1939
fluorescent light and capillary microscopy in treatment (Schmidt, Baum and Jäger), 23: 18, 1941
in Maine (Babalian), 26: 167, 1944
leukoderma (Oliver, Schwartz and Warren), 21: 220, 1939; 22: 192, 1940; 23: 60, 1941
melanosis from pitch (Foerster and Schwartz), 21: 201, 1939
methods of investigation (Schwartz), 21: 125, 1939
predispositions to (Gallivan), 25: 43, 1943

reporting (Neumann), 22: 152, 1940
tannin preparations in prevention and cure of (Jäger), 19: 68, 1937
treatment with vitamin A and D (Dainow), 22: 193, 1940
value of skin tests in prevention (Koch), 23: 157, 1941
Skin diseases, oil folliculitis (J. A. M. A., Queries and Minor Notes), 25: 16, 1943
onychia due to handling sugar (Cummer), 22: 107, 1940
onycholysis in fur workers (Heimann and Silverberg), 24: 20, 1942
papular lesion in chicken feather pickers, 22: 194, 1940
pathogenesis of severe stomatitis with exanthema (Tappeiner), 23: 7, 1941
pathogenesis of skin changes from oxygen-liberating agents (Engelhardt and Suberg), 19: 93, 1937
pathological study of salt mine workers (Reale), 21: 177, 1939
prevention of industrial dermatitis, protective hand creams, soap, and the harmful role of some cleansing agents (Klauder, Gross and Brown), 22: 103, 1940
prevention of oil rashes (Great Brtain, Ministry of Labor and National Service), 26: 96, 1944
protective agents against eczema (Finkenrath), 20: 24, 1938
Reichenstein disease (arsenic hyperkeratosis) (Gottron), 23: 61, 1941
Report of Committee on Industrial Skin Irritants, Industrial Hygiene Section, American Public Health Association (Smyth), 20: 164, 1938
report of conditions at Parsonage Pit, Wigan Coal Corp. (Lancashire and Cheshire Miners' Fed.), 18: 116, 1936
sporotrichosis (Gastineau, Spolyar and Haynes), 24: 19, 1942
tests on 2000 individuals (Zündel), 18: 70, 1936
toxic effects of iroko (Davidson), 23: 188, 1941
types of occupational atrophic skin lesions (Bzowski and Navarre), 18: 184, 1936
under Illinois Workmen's compensation diseases act (Foerster), 22: 130, 1940
urticaria from solvent (J. A. M. A., Queries and Minor Notes), 24: 120, 1942
voluntary sensitizing of skin and mucus by primroses (Helmke), 20: 53, 1938
Skin, effect of bodily work on electric resistance of (Saviano), 21: 105, 1939
effect of chloride of lime (Lebduska, Pidra and Pokorny), 22: 107, 1940
effect of cleansing materials on (Schnorr). I. Healthy skin, 25: 86, 1943; II. In skin disease, 25: 87, 1943
effect of hydrofluoric acid on (Scheuermann), 20: 23, 1938
effect of irritant explosives (Swanston), 26: 36, 1944
effect of some terpenes on (Riedel), 24: 76, 1942
effect of turpentine oil upon normal and hypersensitive (Rokstad and Bonnevie), 25: 107, 1943
examination of factory workers', (Greuer and Peukert), 22: 107, 1940
grafting, immediate, in treatment of burns; preliminary report (Young), 25: 184, 1943
grafting, in treatment of wounds (McIndoe), 26: 38, 1944
grafting, massive repairs of burns (Brown and McDowell), 24: 146, 1942
hazards, in manufacture and processing of synthetic rubber (Schwartz), 27: 95, 1945
hazards, in manufacture and use of cashew nut shell liquid-formaldehyde resins (Schwartz, Birmingham, Campbell and Mason), 27: 157, 1945
hazards in manufacture of glass wool and thread (Schwartz and Botvinick), 25: 106, 1943
human, investigations on sweating and permeability of (Whitehouse), 19: 181, 1937
human, method for testing fat content of (Peukert), 22: 169, 1940
hydrogen ion concentration in workers' (von Czetsch-Lindenwald), 24: 21, 1942
infection, protection of factory workers (Nielsen), 27: 11, 1945
infection, surgical, relation of electrical and hygrometric conditions of atmosphere to (Knipfer), 18: 56, 1936
influence of titration alkalinity of cleansing agents on, natural acid protection (Peukert), 23: 123, 1941
Skin injuries among physicians and nurses caused by mustard gas (Preininger), 20: 189, 1938
caused by lead and its compounds, are there isolated injuries? (Engelhardt and Meerkamp), 18: 89, 1936
from hydrofluoric acid, treatment (Flury), 24: 92, 1942
from occupation, sport, according to season, and from cosmetics, first aid in sudden skin injury (Oppenheim), 19: 235, 1937
in aluminum welding (Beintker), 20: 92, 1938
industrial (Oppenheim), 18: 40, 1936
Skin irritants, chemicals in fabrics as potential (Cox), 25: 203, 1943
irritants, clothing for protection against (Schwartz, Warren and Goldman), 22: 169, 1940
irritation and cancer in the United States Navy (Peller and Stephenson), 20: 5, 1938
irritation from lime dust, prevention of (J. A. M. A., Queries and Minor Notes), 25: 43, 1943
lesion resembling that caused by mustard gas, found in varnish factory (Winterscheid), 25: 68, 1943
lesions as manifestations of systemic poisons (Goldwater), 19: 235 1937
loss of minerals when sweating is avoided (Freyberg and Grant), 20: 29, 1938
lotions for protecing, method of testing (Peuckert and Schneider), 21: 102, 1939
patch tests, results of questionnaire (Downing), 26: 35, 1944
pathology caused by heat radiation (Waniek), 24: 22, 1942
permeability, measuring (J. A. M. A., Current Comment), 19: 71, 1937
prevention of irritation and sensitization to chemical compounds (Goldman), 26: 140, 1944
protection against lime (Pether), 20: 23, 1938
protective ointments (Hopf), 24: 58, 1942

oxygen-nitrogen mixtures, inflammability of (Jones and Scott), 25: 65, 1943
pharmacology of (Krantz, Carr, Musser and Harne), 18: 23, 1936
poisoning in chemical cleaning works; cases (Schiots), 20: 181, 1938
poisoning, fatal, in man with atypical glandular and miliary tuberculosis (Hansen), 18: 174, 1936
poisoning, two cases (Pies), 23: 54, 1941
studies on toxic effects of (Lande, Dervillée and Nun), 22: 33, 1940
toxic effects of (New York State Dept. of Labor), 26: 44, 1938

two cases of angina pectoris from inhalation of (Gerbis), 19: 106, 1937
Trichloroacetonitrile (tritox) and sulfur dioxide, toxicity of (Liese), 26: 54, 1944
Tricresyl phosphate, dermatitis bullosum of acne area following adhesive tape contact on left arm and thorax, possibly due to (Gaul and Henneger), 27: 60, 1945
toxic polyneuritis from manufacture of (Hunter, Perry and Evans), 27: 93, 1945
Triethylene glycol *see* **Glycol, triethylene**
Trillat, M.: Classification of trichlorethylene, 20: 9, 1938
Trimethylxanthine, 1,3,7-(caffeine), effectiveness against fatigue (Huidobro and Amenbar), 27: 168, 1945
Trinitrotoluene (Brit. M. J.), 27: 155, 1945
and tetryl, clinical symptoms (Hilton and Swanston), 24: 10, 1942
aplastic anemia following exposure: 3 case reports (Eddy), 27: 7, 1945
early effects of exposure (Higgins, O'Brien, Stewart and Witts), 27: 114, 173, 1945
effects on the formed elements of the blood (Brill, Cone and Wilson), 26: 52, 1944
excretion of diazotisable amines after intake of TNT. Metabolism of aromatic nitro compounds (Lemberg and Callaghan), 27: 132, 1945
exposure, new test for detection, and appraisal of (Snyder and von Oettingen), 26: 34, 1944
fatal occupational poisoning by (Balacz), 23: 52, 1941
health hazard (Roberts), 24: 53, 1942
health hazards (J. A. M. A., Queries and Minor Notes), 25: 34, 1943
jaundice (Evans), 24: 38, 1942
metabolic disturbances in workers exposed to (McGee, McCausland, Preston and Houff), 27: 132, 1945
Trinitrotoluene poisoning (Cone), 26: 95, 1944
(Proc. of Royal Soc. of Med.), 24: 157, 1942
and diet (Brit. M. J.), 25: 202, 1943
experimental; effect of diet (Himsworth and Glynn), 25: 84, 1943
experimental, estimation of reduced degradation products (Westfall and Smith), 25: 132, 1943
experimental, hematological research (Bizzari), 22: 33, 1940
experimental, notes on the pathology of (Lillie), 26: 12, 1944
porphyrinuria in (Kennedy and Ingham), 24: 157, 1942
treatment of (Luthy), 26: 184, 1944
Trinitrotoluene, removal from the skin by a liquid soap (Norwood), 25: 130, 1943
surveys of liquid wastes from munitions manufacturing, I. (Smith and Walker), 26: 18, 1944
symmetrical, metabolism of (Lemberg and Callaghan), 27: 114, 1945
symmetrical, reduction by a succinic dehydrogenase preparation (Westfall), 26: 19, 1944
tetryl and dinitrotoluene, air-borne, determination of (Cumming and Wright), 27: 173, 1945
tetryl, and fulminating mercury poisoning, munition factories in Finland (Noro), 24: 9, 1942
toxic necrosis of liver from (Palmer, McShane and Lipman), 26: 28, 1944
toxicity (McCausland and Hawkins), 26: 184, 1944
toxicity and potential dangers, experimental studies (von Oettingen, Donahue, Snyder and others), 27: 53, 1945
toxicology of. I. Changes in bloodforming organs and peripheral blood due to subcutaneous injection of TNT (Velling), 27: 54, 1945
Trinitrotoluene, 2,4,6-, determination of, in air (Kay), 23: 96, 1941
determination of, in air (Cone), 25: 91, 1943
estimation of diazotisable amines. Metabolism of aromatic compounds (Lemberg and Callaghan), 27: 131, 132, 1945
metabolism of (Channon, Mills and Williams), 27: 54, 1945
Webster test for derivatives in urine (Ingham), 24: 57, 1942
Triorthocresylphosphate, poisoning by (Stähelin), 23: 115, 1941
poisoning by (Walthard and Walthard), 24: 92, 1942
Tri-o-tolyl phosphate, skin absorption, as shown by radioactive phosphorus (Hodge and Sterner), 26: 118, 1944
Tripe workers, Glasgow, leptospirosis in (Stuart), 20: 118, 1938
Triphenylbenzene, new cancer producing hydrocarbons (Morton, Clapp and Branch), 18: 5, 1936
Tripoli and silicosis (McCord, Meek and Harrold), 25: 148, 1943
as source of silicosis (McCord), 19: 13, 1937

Tubercle bacilli and anthracite dust, experimental inoculation (Cummins), 24: 16, 1942

ST0851964

Tubercle bacilli—*Cont'd.*
bovine, adsorption of early products of by anthracite dust (Cummins), 23: 204, 1941
dead, augmentation of action of anthracite and other dusts by (Cummins), 22: 167, 1940
influence of silica on development of (Heim de Balsac, Fernbach and Rollier), 23: 36, 1941
R-1 strain, cultural characteristics with reference to dissociation (Dowd), 18: 111, 1936
R-1 strain, recovered from silicotic and normal guinea pigs (Dowd), 18: 113, 1936
Tuberculin, diluted "old", adsorbent effect of various dusts on (Cummins and Williams), 21: 49, 1939
Tuberculo-siliosis (Benson), 23: 12, 1941
acute, case (Moore), 20: 202, 1938
Tuberculosis, after-care and re-employment of tuberculous patient (Sandiland), 20: 6, 1938
among employed women; morbidity and mortality trends in relation to age (Doran), 26: 68, 1944
among male industrial workers disclosed by roentgenograms (Cummings, Downs and Berg), 21: 169, 1939
among medical and nursing hospital personnel (Myers and others), 20: 194, 1938
among native employees of Rand gold-mines (Pringle), 20: 119, 1938
among nurses (Hastings and Behn), 24: 89, 1942
among student nurses, incidence of infection (Boynton), 21: 161, 1939
among teachers and cafeteria workers in Roanoke city public schools (Graves), 21: 66, 1939
among tobacco factory workers (J. A. M. A., Foreign letters), 22: 31, 1940
and allied conditions, as seen in industrial population (Marcy), 24: 117, 1942
and anthracosilicosis (Sokoloff), 19: 12, 1937
and caisson disease (J. A. M. A., Queries and Minor Notes), 21: 162, 1939
and industry (Hazlett), 26: 109, 1944
and occupation in Copenhagen in relation to income (Faber and Lindhardt), 18: 136, 1936
and pneumoconiosis among underground workers (Moshkovsky), 24: 122, 123, 1942
and pneumonia, in industrial workers and dependents (Kibbey), 19: 171, 1937
Tuberculosis and silicosis (Capelli), 19: 44, 1937; (Sander), 20: 175, 1938
among mine workers, Gold Coast, interim report, 1941 (Murray and Crocket), 24: 160, 1942
combined, assessment of (Böhme), 20: 127, 1938
differential diagnosis (Gonzalez Ancira), 21: 51, 1939
epidemiological aspects (Pope and Zacks), 18: 8, 1936
essentials in diagnosis of (Gardner), 19: 131, 1937
lesions in cases occurring on Witwatersrand (Simson and Strachan), 18: 108, 1936
pathology of pneumoconiosis (Auerbach), 19: 87, 1937
significance of free and crystalline silicic acid in occurrence and prevention of (Jötten), 26: 182, 1944
simulating neoplasm (Pohle and Ritchie), 22: 127, 1940
Tuberculosis and war industry (Shepard), 26: 159, 1944
annual report of Saranac Laboratory for Study of Tuberculosis, for 1942, 26: 48, 1944
annual report of Trudeau Sanatorium for 1942, with studies of Edward L. Trudeau Foundation for Research and Teaching of, 26: 49, 1944
atypical glandular and miliary, fatal trichlorethylene poisoning in man with (Hansen), 18: 174, 1936
care and after care of tuberculous among European mining population of Rand (Pringle), 20: 119, 1938
Tuberculosis case finding in industry (Long), 23: 46, 1941; (Tabershaw), 25: 110, 1943; (Miale), 26: 3, 1944
Tuberculosis case finding; mass X-rays surveys (Scherer), 27: 48, 1945
miniature X-ray films in (Douglas and others), 23: 71, 1941; (Tice), 23: 71, 1941
survey of 25,556 employees of Santiago, Chile (Viel and Jelic), 26: 4, 1944
survey of 28, 331 workers (Edwards and others), 23: 141, 1941
32,000 chest X-rays completed in Baltimore (Baltimore Health News), 27: 165, 1945
X-ray examinations for (Banszky), 24: 135, 1942
Tuberculosis, changes in lungs of 800 printers (Groth-Petersen), 19: 76, 1937
comparative value of roentgen-photographic methods (Plunkett and others), 24: 2, 1942
compensation problem (Sappington), 25: 5, 1943
conquest of, in industry (Hilleboe and Gould), 26: 159, 1944
contracted from fellow employee held accident (U. S. Monthy Labor Rev.), 23: 103, 1941

problem of (Foley and Andoeca), 27: 90, 1945
Tuberculosis, detection of tubercle bacilli in suspected environments (Pressman), 27: 20, 1945
dust and, effects of sericite and grinding wheel dust on tuberculous guinea pigs (Selter and Weiland), 19: 226, 1937
dust, pathologic anatomy of (Moshkovskii), 19: 63, 1937
employability (Ritter and Dugger), 26: 68, 1944
employment of expatients (Hochhauser), 22: 6, 1940
fatal silicosis without (Naville, Herrmann and Audéoud), 22: 37, 1940
follow-up of 1,041 patients (Stephens), 24: 5, 1942
hazard from tubercle bacilli in environmental air (Sim and Flinn), 22: 4, 1940
hematogenous, and silicosis (Gershon-Cohen and Cohen), 21: 119, 1939
Tuberculosis in industry (Riddell), 19: 216, 1937; (Ornstein), 20: 174, 1938; (Ornstein and Ulmar), 21: 89, 1939; (Riddell), 21: 161, 1939; (Cummings), 23: 3, 172, 1941; (Mann), 25: 57, 1943; (Shepard), 25: 58, 1943; (Edwards), 25: 122, 1943; (Bosworth), 27: 89, 1945
Tuberculosis in North Carolina industry (Vestal), 26: 27, 1944
in relation to pneumoconioses (Cooke), 21: 196, 1939; (Turner), 21: 196, 1939
in silica-risk industries (Sutherland), 22: 165, 1940
in silicotics, incidence of (Pope), 19: 155, 1937
in the Philippines, industrialization and public health (Niederland), 23: 199, 1941
in Vermont, survey (Rabinowitz, Roger and Slocum), 22: 7, 1940
industrial aspects of rehabilitaton of (Hochhauser), 21: 85, 1939
industrial nurse and (MacInnis), 25: 122, 1943
industrial, report of the committee, 1942 (American Trudeau Soc.), 24: 154, 1942
industrialism and (Middleton), 18: 89, 1936
industry and war (Kuh), 25: 122, 1943
infection by, in working places. Obligation of manager (Ztschr. f. ärztl. Fortbild.), 23: 161, 1941

influence of benzene and xylene vapors on (Rix and Schedtler), 23: 113, 1941
influence of dusts on (Vorwald and Landau), 20: 18, 1938
influence of silica on tubercle bacillus (Vorwald and Delahant), 21: 17, 1939
involving genitourinary tract, following trauma (McClelland), 25: 157, 1943
lupus exfoliativus and tuberculosis cutis in butcher (Keining), 22: 142, 1940
lupoid-sarcoid reaction induced by foreign body (silica) (German), 22: 167, 1940
Tuberculosis mortality and industrialization (Wolff) 23: 6, 1941
in industrial populations of Massachusetts and Michigan (Dauer), 21: 161, 1939
in United States, sex differences in (Dauer), 20: 170, 1938
Tuberculosis, non-tuberculous conditions and complications (Koerth, Giles and Thomas), 24: 89, 1942
non-tuberculous, lesions found in mass X-ray surveys (Gould), 27: 116, 1945
occupation and compensation (Brahdy), 24: 34, 1942
occupational (Licurzi), 25: 5, 1943
occupational, and compensable disease (Brahdy), 24: 130, 1942
occupational therapy in treatment (Langmaid), 20: 119, 1938
of intestines in tuberculous anthracosilicosis (Charr and Cohen), 20: 202, 1938
of lungs and related lymph nodes, diagnostic standards (National Tuberculosis Assn.), 21: 135, 1939
of respiratory tract (Reichert), 23: 30, 1941
patient, rehabilitation of—Manitoba program (Cunnings), 26: 131, 1944
Photoroentgen surveys of industrial workers (Farmer and Laws), 27: 48, 1945
productive military, chronic nickel poisoning and (Pomerans), 21: 13, 1939
program of Standard Oil of New Jersey (Adams), 24: 52, 1942
Tuberculosis, pulmonary and asbestosis (Desmeules and Giroux), 26: 28, 1944; (Desmeules, Rousseau, Giroux and Richard), 26: 28, 1944
and buffing rouge (J. A. M. A., Queries and Minor Notes), 24: 52, 1942
and extra-pulmonary, in anthracite miners (Cohen), 21: 194, 1939
and silicosis, similarity of lesions of, specific tissue reaction to phospholipids, suggested explanation (Fallon), 19: 111, 1937
asbestosis with, case (Hanneson), 23: 185, 1941
demonstration of tubercle bacilli in employee group with clinically inactive (Medlar and Reid), 27: 52, 1945
direct and indirect occupational risk in mortality (Cheeseman), 24: 117, 1942
disorder simulating (M. J. Australia), 23: 109, 1941
in industry; control of (Banszky), 25: 167, 1943
in industry, incidence and after-history, 3,755 cases (Bashford and Scott), 19: 149, 1937
in seamstresses, causes and effects of (Wohlhueter de Loriol), 22: 51, 1940
in Wellington, radiological investigation among office and factory workers (Buchler), 27: 5, 1945
in workers in dusty trades, clinical study of (Rathery, Doubrov, Conte and Bargeton), 18: 109, 1936
incidence in miners (J. A. M. A., Foreign Letters), 21: 6, 1939
inhalation of nitric acid vapors as cause of (Taeger), 23: 32, 1941
or anthracosis of coal miners in New South Wales (Badham), 21: 216, 1939
Tuberculosis, quantitative respiratory contagion (Wells and Lurie), 24: 34, 1942
quiescent, anthraco-silicosis and bronchial carcinoma with (Lovelock), 21: 195, 1939
rates, negro, environment factor in (Roth), 21: 6, 1939
relation to pneumoconioses (Sparks), 21: 19, 1939; (Policard), 22: 12, 1940
report of Miners' Phthisis Medical Bureau for three years ended July 31, 1938 (Union of South Africa), 22: 147, 1940
risk among nurses (Rist), 22: 30, 1940
rôle of industry in elimination of (Sawyer), 25: 122, 1943
screening examinations of industrial workers (Collier and MacDonald), 26: 90, 1944
selection of nurses for service to the tubercular (Ickert), 23: 163, 1941
serodiagnosis, differentiation from silicosis (Heine), 24: 14, 1942
Tuberculosis, silico- (Sweany), 21: 75, 1939; (Navarrete Sierra), 23: 204, 1941; (Auerbach and Stemmerman), 26: 70, 1944
Tuberculosis, silico-, and silicosis (Domenici), 21: 19, 1939; (Taylor and Alexander), 21: 19, 1939; (Gaubatz), 23: 56, 1941
among casting cleaners at Soederfors iron foundry (Hedenatedt), 23: 203, 1941
chemical and pathological study of pneumoconiosis (Sweany, Porsche and Douglass), 19: 157, 1937
experimental, heart and pulmonary blood vessels in (Hegemann), 21: 99, 1939
in metallurgical plants (Francesco), 18: 52, 1936
in Westphalian ax polishing plant (Frese), 19: 86, 1937
medical control (Gardner), 21: 119, 1939
significance of free crystalline silica in etiology of (Jötten and Poppinga), 18: 130, 1936; (Jötten), 19: 63, 1937
Tuberculosis, silico-, roentgenological aspects of differential diagnosis (Habbe), 18: 132, 1936
Tuberculosis, silicon dioxide inoculation in guinea pig for (Hollon, Sprick and others), 25: 41, 1943
study of tuberculosis deaths in Silver Bow County, Montana, and of other important causes of deaths in miners (Crouch), 19: 52, 1937
trauma and other occupational factors (Quaintance), 25: 6, 1943
trauma as factor in Pott's disease (Skolnick), 19: 216, 1937

Disabling sickness among 2000 white male glass workers (Report: Gafafer), 24: 28, 1942
Disabling sickness. IV. Duration of disability from the nonrespiratory-nondigestive diseases among male employees with particular reference to the older worker (Report: Gafafer and Sitgreaves), 25: 190, 1943
Disabling sickness. V. Frequency of short-term absences and its relation to total frequency (Report: Gafafer and Sitgreaves), 27: 1, 1945
Disabling sickness. VI. Time lost from short-term absences and its relation to total time lost (Report: Gafafer and Sitgreaves), 27: 25, 1945
Distribution of health services in the structure of state government (Report: Mountin and Flook), 25: 54, 1943
Diurnal variation of urinary lead excretion, 1941 (Report: Webster), 24: 6, 1942
Division of Industrial Hygiene, publications (Hunter), 23: 137, 1941
The effect of arsenates on the storage of lead (Report: Fairhall, Miller and Weaver), 25: 178, 1943
Effect of lead absorption on blood calcium (Report: Jenrette and Fairhall), 25: 202, 1943
An electrostatic method for collecting bacteria from air (Report: Berry), 24: 16, 1942
Epidemic of boils in a group of tunnel workers, April 24, 1942 (Report: Gant, Owens and Schwartz), 24: 139, 1942
Experimental chemotherapy of burns and shock. I. Methods. II. Effects of local therapy upon mortality from shock (Report: Rosenthal), 25: 68, 1943; III. Effects of systemic therapy on early mortality (Report: Rosenthal), 25: 131, 1943; IV. Production of traumatic shock in mice. V. Therapy with mouse serum and sodium salts (Report: Rosenthal), 26: 11, 1944; VIII. 1. Effects of potassium administration, of sodium loss, and fluid loss in tourniquet shock. 2. Electrolyte changes in tourniquet shock (Report: Tabor and Rosenthal), 27: 140, 1945
Experimental studies on the toxicity and potential dangers of trinitrotoluene (TNT) (Bulletin: von Oettingen, Donahue, Snyder, Horecker and others), 27: 53, 1945
Fatigue and hours of service of interstate truck drivers. (Bulletin: Jones, Flinn and others), 24: 32, 1942
Further studies on the pharmacologic action of 2,2 bis (p-chlorophenyl) 1,1,1 trichlorethane (DDT). (Report: Smith and Stohlman), 27: 115, 1945
Health and working environment of nonferrous metal mine workers. (Bulletin: Dreessen and others), 25: 62, 1943
Health of workers in dusty trades. VII. Restudy of a group of granite workers. (Bulletin: Russell), 24: 100, 1942
Histopathological changes following administration of DDT to several species of animals (Report: Nelson, Draize, Woodard and others), 26: 185, 1944
Incidence and prevalence of cancer of the lung (Report: Dorn), 26: 57, 1944
Industrial injuries among the urban population as recorded in the national health survey (Report: Klebba), 24: 67, 1942
The lead and arsenic content of urines from 46 persons with no known exposure to lead or arsenic (Report: Webster), 24: 7, 1942
A medical study of men exposed to measured amounts of carbon monoxide in the Holland Tunnel for 13 years. (Bulletin: Sievers, Edwards and Murray), 25: 8, 1943
The metabolism of 2,2 bis (p-chlorophenyl) 1,1,1-trichloroethane (DDT). I. A metabolite from rabbit urine, di(p-chlorophenyl) acetic acid; its isolation, identification and synthesis (Report: White and Sweeney), 27: 78, 1945
New industrial skin cleanser (Report: Schwartz), 24: 19, 1942
Nursing practices in industry. (Bulletin: Whitlock, Traiko and Kahl), 27: 18, 1945
Occupational and related dermatoses. Abstracts from the literature for the years 1935 to 1939, inclusive. (Bulletin: Schwartz and Warren), 24: 19, 1942
Occupational and related dermatoses. Abstracts from the literature, January 1940 to June 1943, inclusive. (Bulletin: Schwartz and Goldsmith), 27: 35, 1945
Ordinance and code regulating eating and drinking establishments, recommended by the U. S. Public Health Service (Bulletin), 26: 112, 1944
An outbreak of dermatitis from airplane engine covers. (Report: Schwartz and Peck), 25: 155, 1943
The patch test in contact dermatitis (Report: Schwartz and Peck), 26: 165, 1944
Pathologic changes in animals exposed to commercial chlorinated diphenyl (Report: Miller), 27: 8, 1945
Pathologic changes in sheep resulting from exposure to low barometric pressures (Report: Miller), 26: 174, 1944
Pathology of experimental poisoning in cats, rabbits and rats with 2,2 bis-parachlorphenyl-1,1,1 trichlorethane (Report: Lillie and Smith), 26: 185, 1944
The pathology of experimental trinitrotoluene poisoning (Report: Lillie), 26: 12, 1944

The pharmacologic action of 2,2 bis (p-chlorophenyl) 1,1,1 trichlorethane and its estimation in the tissues and body fluid (Report: Smith and Stohlman), 26: 185, 1944
The physically handicapped (Report: Karpinos), 26: 24, 1944
Pollen concentration of the atmosphere (Report: Dahl and Ellis), 24: 144, 1942
Positive agglutination in suspected cases of Weil's disease (Report: Packchanian), 24: 36, 1942
Precautionary measures for workers handling chlorinated naphthalenes and diphenyl compound suggested, 25: 174, 1943
Preliminary report on identification of 2,2 bis(p-chlorophenyl)-1,1,1 trichlorethane (DDT) in the excreta of poisoned rabbits (Report: Stohlman), 27: 115, 1945
A procedure for the handling of field samples of dust and fume (Report: Seifert, Keenan and Fairhall), 27: 142, 1945
Public health administrator's responsibility in the field of occupational disease legislation (Bloomfield and Gafafer), 24: 1, 1942
Publications by the Division of Industrial Hygiene, National Institute of Health, and other U. S. Public Health Service publications on industrial hygiene subjects, 23: 1, 1943
The reportable diseases—diseases and conditions required to be reported in the several states (Fowler), 26: 109, 1944
Sickness absenteeism among industrial workers, final quarter of 1942, with a note on the occurrence of bronchitis and pneumonia, 1933–42 (Report: Gafafer), 25: 141, 1943
Sickness absenteeism among industrial workers, first quarter of 1943, with an inquiry into the occurrence of the respiratory diseases, 1934–43 (Report: Gafafer), 25: 190, 1943
Sickness absenteeism among industrial workers, second quarter of 1943, with a note on the occurrence of the respiratory diseases, 1934–43 (Report: Gafafer), 26: 45, 1944
Sickness absenteeism among industrial workers, third quarter of 1943 (Report: Gafafer), 26: 109, 1944
Sickness absenteeism among industrial workers, final quarter of 1943, with a note on the occurrence of the respiratory diseases, 1934–43 (Report: Gafafer), 26: 155, 1944
Sickness absenteeism among industrial workers, third quarter of 1944 (Report: Gafafer), 27: 87, 1945
Sickness absenteeism among industrial workers, fourth quarter of 1944, with a note on seasonal variation (Report: Gafafer), 27: 147, 1945
Sickness absenteeism among male and female industrial workers, 1933–42, inclusive (Report: Gafafer), 25: 190, 1943
Sickness absenteeism among male and female industrial workers during 1943, and among males during the first and second quarters of 1944, with a note on the respiratory epidemic of 1943–44 (Report: Gafafer), 27: 25, 1945
A soap indicates the presence of mercury fulminate (Report: Mason and Botvinick), 25: 210, 1943
Soft coal miners' health and working environment. (Bulletin: Flinn and others), 24: 57, 1942
Studies in connection with the selection of a satisfactory culture medium for bacterial air sampling (Report: Schneiter, Dunn and Caminita), 27: 183, 1945
Studies on strains of *A. cloacae* responsible for acute illness among workers using low-grade stained cotton (Report: Caminita, Schneiter, Kolb and Neal), 25: 194, 1943
Studies on the mechanism of carbon monoxide poisoning as observed in dogs anesthetized with sodium amytal. (Bulletin: von Oettingen and others), 24: 54, 1942
Study of cadmium poisoning in industry (Report: Division of Industrial Hygiene), 24: 136, 1942
Survey of compounds which have been tested for carcinogenic activity (Bulletin: Hartwell), 25: 67, 1943
Surveys of liquid wastes from munitions manufacturing. I. Trinitrotoluene (TNT) wastes. II. Smokeless powder wastes (Report: Smith and Walker), 26: 18, 19, 1944
Toxicity and potential dangers of nitrous fumes. (Bulletin: von Oettingen), 24: 39, 1942
Toxicity and potential dangers of toluene, with special reference to its maximal permissible concentration. (Bulletin: von Oettingen, Neal and Donahue), 24: 175, 1942
Toxicity and potential dangers of penta-erythritol-tetranitrate (PETN). (Bulletin: von Oettingen, Donahue, Lawton and others), 26: 136, 1944
Toxicity and potential dangers of aerosols, mists and dusting powders containing DDT. (Report: Neal, von Oettingen, Smith and others), 27: 56, 1945
Toxicity and potential dangers of aerosols and residues from such aerosols containing three per cent DDT (Report: Neal, von Oettingen, Dunn and Sharpless), 27: 153, 1945
The toxicity of lead azide (Report: Fairhall, Jearette, Jones and Pritchard), 25: 128, 1943
Treatment of young white mice infected with leptospira icterohaemorrhagiae with immune serum (Report: Larson), 25: 67, 1943
Twenty-four hour output of certain urinary constituents in persons exposed to lead arsenate spray residue (Report: Webster), 24: 7, 1942
A two-cavity dust counting cell (Report: McCormick), 27: 142, 1945
X-ray exposure in manufacture and operation of certain electronic tubes (Report: Bush, Castberg and Macpherson), 26: 188, 1944
and American Public Health Association: Infectious hepatitis and infectious keratoconjunctivitis provisionally added to manual "Control of Communicable Diseases", 25: 107, 1943
