STATE COMMUNITY COLLEGE

March 4, 1994

ENVIRONMENTAL SCIENCE CURRICULUM COMMITTEE

Dear Committee Member:

State Community College will host an exhibit during the week of March 15. This exhibit is designed to enlighten students about job opportunities in the **environmental science industry.** Because environmental science is one of the country's fastest growing scientific occupational fields, we want to make sure our students are abreast of this intriguing industry.

As an expert in environmental science, your assistance is needed. Will you please forward any available information your company may have regarding current and future career opportunities. We will appreciate the opportunity to display brochures, posters, or any additional information from your company which will assist students in learning more about the environmental science industry.

Also, the Audio Visual Department at State Community College is in the process of developing a video tape, featuring area companies. If you are interested submitting information for the exhibit or if you would like to be a part of the video tape, please contact Stephanie A. Anthony for additional information. We encourage your participation.
