Dear Doctor McNally:

In Re: George Zepp, age 55
284 Auburn Ave
Atco, N.J. 08004

Herewith reprots of examinations made on the above named at this Office on July 23, 1971 as per your request.

Occupational History: Owens-Corning for past 21 years in production work.

Past Medical History: Has had the usual childhood diseases. Bursiti, both shoulders 4 years ago. Treated by Dr Stanley Brown. No operations. No serious illness. Smoked since age 14, at least 1-2 packs daily. Alcohol occasional.

Chief Complaints: Dyspnea at time with walking fast or exertion. No chest pain elicited. Cough minimal, slight mucus in AM. Minimal wheezing variable. Partial nasal obstruction due to nose injury producing some difficulty breathing.\

General Physical examination: Head and Neck: Nose depressed, old injury. Paryial nasal onstruction. Wears glasses. Cranial nerves intact. No adenopathy. Thyroid normal.

Chest: SLight build. Some barrel-shaped configuration noted Br athsoundsare diminished bilaterally. Minimal rales bilaterally. Especially both bases. Hyperresonance.

Fluroscopic examination of the chest reveals theheart to be small and centrally placed, normal in pulsation. Both diaphragms are severly restricted in motion. Xrays of the chest reveals the heart to be small and centrally placed. The hilar areas show some increase in density. The left hemithorax reveals fine lacy infiltration into most of the lower lobe areas with radiolusency of the upper lobe areas. The right hemithorax also shows a similar picture with a greater degree of radiâlusconcy in the upper lobe. There is a suggestion of multiple cystic areas bilaterally. Possibly several large air-cysts occupying the right upper lobe. The Right apex shows some apical cap thickening. The peripheral lung fields are clear. The lateral projection reveals typical barrel-shaped configuration with flattening of diaphragms. Lower lobe infiltrates noted.

Impression: Pneumoconiosis, moderate, asbestosis, occupational, with emphysematous cysts , multiple, upper lobes.

Pulmonary Function Study:
Predicted Vital Capacity- 3910cc; Performed VC- 2300cc= 59%.
Timed Vital Capacity- Moderate reduction.
Maximum Ventilatory volume- 49.2l/Min= Markedly reduced.
Flow rates A & B- Moderate and marked reduction respectively.
Impression: Pulmonary fibrosis and emphysema type. 02 209 0756

E. SPENCER PAISLEY, M.D., F.C.C.P.
801 WHITE HORSE PIKE
HADDON HEIGHTS, N. J. 08035

#2: George Zepp.

Cardiac Examination essentially normal. B.P. 140/70.
Abdoemen: Soft relaxed. NO scars. Non-tender. No visceromegaly.
GU System- essentially normal male.
Bones and Joints: Essentially normal. No gross deformaty.
Neurological examination essentially normal.
Skin: Clear. No edema. No clubbing of fingers.

Laboratory Work as follows:
Hemoglobin- 16.5Gms; Hematocrit 49%; WBC- 8.3; Segs- 66%; Lymphs- 30%; eosin.-3%; basofiles.- 1%.
Serum electrolytes Na; K; Cl; CO2 all essentially normal.
SMA-12 all essentially normal. Urine normal.
P. P. D Intermediate 1+.

Impression: Pneumoconiosis, moderate severe, asbestosis, occupational;
Emphysematous cysts, multiple, upper lobes

This patients pulmonary problem warrants hime being placed in a less aggravating environment for work. He has been advised about not smoking.

Thank you for the privilege of this evaluation.

Very truly yours,

E. Spencer Paisley, M.D.

AUTHORIZATION REQUEST
FOR MEDICAL RECORDS -
GEORGE KEPP

Mr. W. L. Kreutz - T/26
Mr. K. E. Grimmie-Berlin
Mr. F. H. Schaumle - Berlin
Mr. K. J. Sepessy- T/19

I have referred the authorization for request of medical records to Mr. W. L. Kreutz our Special Counsel. This will facilitate the administrative handling of this request and processing of the Workmen's Compensation claim.

From a medical standpoint it would appear from Dr. Paisley's letter, your comments and my review that the patient does have some degree of asbestosis which is related to his work of the last twenty-one years at the Berlin plant.

If you agree with this diagnosis and etiology it would be reasonable to communicate this to the Aetna Insurance representative when he contacts you concerning this case.

If you have any further questions please let me know.

In re:George Zepp, 284 Auburn Avenue, Atco, New Jersey

Dear Dr. McNally:

Please be advised that this office represents the above captioned petitioner pursuant to his Workmen's Compensation claim arising out of his occupational accident.

In order that we may adequately proceed with this claim it is necessary that we secure all relevant medical data.

I enclose herewith an Authorization duly signed by the petitioner permitting your release of the above information.

Kindly forward a copy of your entire bill for services rendered indicating thereon whether the same has been paid and by whom.

In the event there should be any future billing, please do so through this office.

Thank you very much.

Very truly yours,

EVANS AND O'BRIEN
