correct?

A Yes. The patient I examined was in connection with litigation.

Q Prior to that request, you had no expertise and claim no expertise in the field of state-of-the-art as it relates to asbestos and disease; is that correct?

A That is correct. I hadn't read it, therefore, I was not an expert.

Q You have never reviewed any corporate documents of companies such as Owens-Corning Fiberglas?

A No. I don't think they would add to my knowledge of the medical literature.

Q So you have no firsthand knowledge whatever about what OCF or Owens-Corning Fiberglas actually knew about any hazards?

A No. I don't pretend to have any knowledge about what they actually knew, only about what medicine and science knew.

MR. IGNATOWSKI: I think that is all I have.
