Chemical Manufacturers Association
2501 M. Street N.W.
Washington, D.C. 20037

Attention: Carol R. Stack, Ph.D.

Dear Dr. Stack:

The V.C. report which you sent on March 19th looks good,
with a couple of minor corrections:

1. Page 4, the 6th line from the bottom - Dr. Duffield
2. V.C. Research Coordinators' Charter, line 7,
what does TRTG mean?
3. V.C. Research Coordinators, the name UNIROYAL, INC.
should follow my title.

Uniroyal no longer manufactures V.C. or P.V.C. However,
Phase VIII will deal with Epidemiology of workers included
in the previous (Equitable) report so Uniroyal will be involved.
I am willing to continue to serve if CMA desires it. I have
felt from the beginning that V.C. presented probably our best
opportunity to determine the effect of a well documented animal
carcinogen on humans exposed over a wide range of concentrations.

Sincerely,

Walter D. Harris
